Basics of Virtual Reality Armin Grasnick.2022-01-04 Today, the reality we know can be recorded and reproduced true to reality using technical processes. Space and time are recreated virtually as a copy in artificial reality. However, the reproduction of virtual reality is not limited to a mere copy of what exists. A visitor to the virtual space does not have to be content with the pixelated image of the old familiar, but can encounter unreal phenomena in the illusory world that never existed in real life or are even physically impossible. This enables an expansion of the recorded reality and allows the perception of surprisingly new perspectives. A perspective denotes the perception of a fact from a certain point of view and corresponds to the way of looking at things. But a perspective is also the observation of a scene from a viewing position. From different perspectives the illusion of reality arises during the reproduction by observation. This vision is not based on imagination or hallucination, but is the basic function of virtual reality. This book describes the concepts, systems, and technologies used to create virtual reality from its ancient beginnings to the present, and provides a glimpse into a possible future. This book is a translation of the original German 1st edition *Grundlagen der virtuellen Realität* by Armin Grasnick, published by Springer-Verlag GmbH Germany, part of Springer Nature in 2020. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

*Multitasking in the Digital Age* Gloria Mark.2022-05-31 In our digital age we can communicate, access, create, and share an abundance of information effortlessly, rapidly, and nearly ubiquitously. The consequence of having so many choices is that they compete for our attention: we continually switch our attention between different types of information while doing different types of tasks--in other words, we multitask. The activity of information workers in particular is characterized by the continual switching of attention throughout the day. In this book, empirical work is presented, based on ethnographic and sensor data collection, which reveals how multitasking affects information workers' activities, mood, and stress in real work environments. Multitasking is discussed from various perspectives: activity switching, interruptions as triggers for activity switching, email as a major source of interruptions, and the converse of distractions: focused attention. All of these factors are components of information work. This book begins by defining multitasking and describing different research approaches used in studying multitasking. It then describes how multiple factors occur to encourage multitasking in the digitally-enabled workplace: the abundance and ease of accessing information, the number of different working spheres, the workplace environment, attentional state, habit, and social norms. Empirical work is presented describing the nature of multitasking, the relationship of different types of interruptions and email with overload and stress, and patterns of attention focus. The final chapter ties these factors together and discusses challenges that information workers in our digital age face.

**We Are Prisoners** Oskar Graf.2019-12-07 The autobiography of Oskar Maria Graf, his first major work, was published in 1927. It covers his early youth growing up in the village of Berg by Lake Starnberg, his cruel abuse by his older brother, his escape to Munich, where he worked as a baker,

and then to anarchist communes in Switzerland. Graf is drafted into the army, where he reluctantly serves as a horse-groom on the supply trains. He is discharged as mentally unfit, spends a year in an asylum, then returns to Munich, working in a biscuit factory, starting his literary career and making money on the black market. *We Are Prisoners* paints a fascinating picture of bohemian life in Schwabing, the radical politics of the time, and climaxes with the short-lived Bavarian Soviet Republic of 1919. Many of the characters in the novel became well known artists and writers in Weimar Germany. *We Are Prisoners (A Confession)* is an honest and blithe personal account of momentous events. Graf's quirky literary style combines a self-deprecating and anarchic sense of humour, sympathy for the downtrodden and the Heimat genre of German culture. He behaves disgracefully and provokes laughter and disbelief, but in so doing, he wins our hearts. THOMAS MANN Translated and introduced by Ed Walker.

**Animal Beauty** Christiane Nusslein-Volhard.2019-05-14 An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as “beauty”? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a “sexual selection” distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.

*This is how I Remember, Now* Jim Dine,Gabriele Conrath-Scholl.2008 This book is a selection of photographs of the artist himself, friends (dead and alive), relatives, and the wooden boy (soon to be a real boy) Pinocchio. Jim Dine is attempting in these works to bring, through memory, to life the people around him now and from the past. He has found a way to put aside mortality by the way the camera continually lies.

The Death of Sweet Mister Daniel Woodrell. 2012-04-24 Shug Akins is a lonely, overweight thirteen-year-old boy. His mother, Glenda, is the one person who loves him--she calls him Sweet Mister and attempts to boost his confidence and give him hope for his future. Shuggie's purported father, Red, is a brutal man with a short fuse who mocks and despises the boy. Into this small-town Ozarks mix comes Jimmy Vin Pearce, with his shiny green T-bird and his smart city clothes. When he and Glenda begin a torrid affair, a series of violent events is inevitably set in motion. The outcome will break your heart. This is Daniel Woodrell's third book set in the Ozarks and, like the other two, Give Us a Kiss and Tomato Red, it peels back the layers from lives already made bare by poverty and petty crime. --Otto Penzler, Penzler Pick, 2001
