*Sustainability of European Food Quality Schemes* Filippo Arfini, Valentin Bellassen. 2019-11-15 This edited volume evaluates recent EU quality policy, focusing on the structure, governance, technical specifications and performances – economic, environmental and social – of Food Quality Schemes (FQS) in the European Union and South East Asia. The intended benefits of FQS include generating a fair return for farmers and producers, and enabling consumers to make better-informed purchasing choices through effective labeling. In addition, policy makers now consider FQS as a means of guaranteeing not only quality in food production, but also sustainability. Despite these potential benefits, the economic performance of the FQS (e.g. PDO, PGI, organic) has been variable. While some support significant value-added production, with substantial benefits to producers, consumers and wider economies, many others have failed to become economically sustainable. In addition, the environmental and social performance of FQS remains largely unexamined, with the exception of the environmental performance of organic products. The editors examine these discrepancies and offer a nuanced evaluation of the effectiveness of such policies. Several unique features make this volume a key resource for those interested in FQS and in the sustainability of food products. The editors provide a concise description of the value chain, the governance and the technical specifications of 27 FQS in Europe and South East Asia. The editors also provide a sustainability assessment of each of these FQS, and support or question the view that FQS are moving from “quality” to “sustainability.” Finally, the volume serves as a repository of key data on these FQS. Readers have access to the raw data necessary to compute the indicators used in the sustainability assessment (eg. value added, number of jobs, quantity of fertilizers, etc), allowing them to conduct novel re-analysis. The book is designed for an interdisciplinary audience of academics, policy makers, and stakeholders. The compilation of FQS case studies makes it a useful reference for researchers and students of food policy, geography, food anthropology, local and rural development, local agri-food systems and agri-food chains. Stakeholders such as national and European regulators, entities responsible for FQS technical specifications, and embassy staff will also find the information relevant. Additionally, individuals helping to implement food quality schemes, including auditors, producers, and consumer associates, as well as stakeholders in the sustainability of food products, including farmers, farmer's associations, and environmental NGOs, will also find the information relevant and important for their work.

**Electrochemical Impedance** John R. Scully. 1993 The collection of twenty-seven papers published has been grouped into six major categories : corrosion process characterization and modeling, applications of Kramers-Kronig transformations for evaluating the validity of data, corrosion and its inhibition by either corrosion products or specially added inhibitors, corrosion of aluminum and aluminum alloys, corrosion of steel in soils and concrete, and evaluation of coatings on metal substrates.

**Mosses, Liverworts, and Hornworts** IUCN/SSC Bryophyte Specialist Group. 2000-01-01 Bryophytes are of great importance in their ecosystems and for human well-being. They stabilize soil crust through colonization of bare grounds and rocks; they are essential in nutrient recycling, biomass production, and carbon fixing; they control water through an effective retention mechanism; and they have economic value as peat for fuel, horticulture, oil absorption, and as sources of a wide variety of chemical compounds. Bryophytes have long been used for medicinal purposes and provide a food source for reindeer, geese, ducks, sheep, musk-ox, lemmings, and other

rodents. Threats include deforestation, cultivation of forests, reclamation of land, urbanization, roads, dam-building, mining, drainage of wetlands and over-grazing. This plan reviews the situation worldwide and proposes a variety of initiatives. It is aimed at those who work with and care about nature conservation, including governmental and non-governmental organizations as well as politicians and the general interested public.

*Organic Farming, Pest Control and Remediation of Soil Pollutants* Eric Lichtfouse.2009-10-15

Sustainable agriculture is a rapidly growing field aiming at producing food and energy in a sustainable way for humans and their children. Sustainable agriculture is a discipline that addresses current issues such as climate change, increasing food and fuel prices, poor-nation starvation, rich-nation obesity, water pollution, soil erosion, fertility loss, pest control, and biodiversity depletion. Novel, environmentally-friendly solutions are proposed based on integrated knowledge from sciences as diverse as agronomy, soil science, molecular biology, chemistry, toxicology, ecology, economy, and social sciences. Indeed, sustainable agriculture decipher mechanisms of processes that occur from the molecular level to the farming system to the global level at time scales ranging from seconds to centuries. For that, scientists use the system approach that involves studying components and interactions of a whole system to address scientific, economic and social issues. In that respect, sustainable agriculture is not a classical, narrow science. Instead of solving problems using the classical painkiller approach that treats only negative impacts, sustainable agriculture treats problem sources. Because most actual society issues are now intertwined, global, and fast-developing, sustainable agriculture will bring solutions to build a safer world. This book series gathers review articles that analyze current agricultural issues and knowledge, then propose alternative solutions. It will therefore help all scientists, decision-makers, professors, farmers and politicians who wish to build a safe agriculture, energy and food system for future generations.

**The Penguin History of Modern Vietnam** Christopher Goscha.2016-06-30 WINNER OF THE AMERICAN HISTORICAL ASSOCIATION'S JOHN K. FAIRBANK PRIZE SHORTLISTED FOR THE CUNDHILL HISTORY PRIZE 2017 'This is the finest single-volume history of Vietnam in English. It challenges myths, and raises questions about the socialist republic's political future' Guardian 'Powerful and compelling. Vietnam will be of growing importance in the twenty-first-century world, particularly as China and the US rethink their roles in Asia. Christopher Goscha's book is a brilliant account of that country's history.' - Rana Mitter 'A vigorous, eye-opening account of a country of great importance to the world, past and future' - Kirkus Reviews Over the centuries the Vietnamese have been both colonizers themselves and the victims of colonization by others. Their country expanded, shrunk, split and sometimes disappeared, often under circumstances far beyond their control. Despite these often overwhelming pressures, Vietnam has survived as one of Asia's most striking and complex cultures. As more and more visitors come to this extraordinary country, there has been for some years a need for a major history - a book which allows the outsider to understand the many layers left by earlier emperors, rebels, priests and colonizers. Christopher Goscha's new work amply fills this role. Drawing on a lifetime of thinking about Indo-China, he has created a narrative which is consistently seen from 'inside' Vietnam but never loses sight of the connections to the 'outside'. As wave after wave of invaders - whether Chinese, French, Japanese or American - have been ultimately expelled, we see the terrible cost to the Vietnamese themselves. Vietnam's role in one of the Cold War's longest conflicts has meant that its past has been endlessly abused for propaganda purposes and it is perhaps only now that the events which created the modern state can be seen from a truly historical perspective. Christopher Goscha draws on the latest research and discoveries in Vietnamese, French and English. His book is a major achievement, describing both the grand narrative of Vietnam's story but also the byways, curiosities, differences, cultures and peoples that have done so much over the centuries to define the many versions of Vietnam.

Organic Agriculture Acram Taji,John Reganold.2006-06-20 With global revenue surpassing twenty-five billion dollars annually, organic agriculture is a highly visible and rapidly growing component of

agricultural production. In *Organic Agriculture: A Global Perspective*, Paul Kristiansen, Acram Taji, and John Reganold, and their international group of contributors scientifically review key aspects of organic agriculture. At the intersection of research, education, and practice, the contributors look at the organic agricultural movement's successes and limitations. The first half of this book critically evaluates the agricultural production of both plants and livestock in organic farming systems. All major aspects of organic agriculture are explored, including historical background and underlying principles, soil-fertility management, crop and animal production, breeding strategies, and crop protection. This global and comprehensive overview also addresses the economic, social, and political aspects of organic farming. These include economics and marketing; standards and certification; environmental impacts and social responsibility; and research, education, and extension. The book is a unique and timely science-based international work documenting current practices in organic agriculture and evaluating their strengths and weaknesses. For more than two decades, research into organic methods by mainstream scientists has generated a large body of information that can now be integrated and used for assessing the actual impacts of organic farming in a wide range of disciplines. The knowledge of selected international experts has been combined in one volume, providing a comprehensive review of organic farming globally. Researchers, teachers, extensionists, students, primary producers and others around the world who are interested in sustainable agriculture will find this book to be a valuable and reliable resource.

**Constitutional Review Systems Around the World** Arne Marjan Mavcic. 2018-04-17 This book contains a comparative constitutional analysis of the constitutional/judicial review systems in 208 countries. It gives a broader overview and deeper knowledge of such systems around the world. The study was created by the students research group of the European Law School to the New University in Slovenia, conducted by professor Arne Marjan Mavčič. The institutional and functional comparative method is making readers familiar with constitutional systems of different countries, drawing on features for individual world regions and considering specific types of constitutional and judicial review. Using a special systemic presentation model, the researchers treat different systems and institutions that hold their exclusive decision-making power on constitutional matters. Their review quite often covers legislative acts that are the highest legal instruments of a specific legal and political system. This gives each constitutional/judicial review institution a special status with power to provide constitutional and/or review under the system of the separation of powers, especially in relation to the legislative power in that it may even annul statutes adopted by the legislative body. Each systemic presentation model is completed depending on the currently available data (sources).

**The Oxford Handbook of Roman Epigraphy** Christer Bruun, J. C. Edmondson. 2015 Inscriptions are for anyone interested in the Roman world and Roman culture, whether they regard themselves as literary scholars, historians, archaeologists, anthropologists, religious scholars or work in a field that touches on the Roman world from c. 500 BCE to 500 CE and beyond. The goal of *The Oxford Handbook of Roman Epigraphy* is to show why inscriptions matter and to demonstrate to classicists and ancient historians, their graduate students, and advanced undergraduates, how to work with epigraphic sources--

**The «Voyage D'Outremer»** Bertrandon de La Brocquière. 1988 De la Broquière set off for the Holy Land in 1432 for the purpose of spying out the possibilities of a new crusade to be led by the Duke of Burgundy. He returned overland, through the Turkish Empire, alone. His observations of the land, the people, the rulers, the food and the customs make fascinating reading. There is also a long section on the organization and tactics of the Ottoman Army, and the ways that the Europeans can use to defeat it. De la Broquière is a highly competent spy and a very observant tourist.

**Political Violence in South Asia** Ali Riaz, Zobaida Nasreen, Fahmida Zaman. 2018-09-24 Political violence has remained an integral part of South Asian society for decades. The region has witnessed and continued to encounter violence for achieving political objectives from above and from below.

Violence is perpetrated by the state, by non-state actors, and used by the citizens as a form of resistance. Ethnic insurgency, religion-inspired extremism, and ideology-driven hostility are examples of violent acts that have emerged as challenges to the states which have responded with violence in the form of civil war and through violations of human rights disregarding international norms. This book explores various dimensions of political violence in South Asia, namely in Bangladesh, India, Nepal, Pakistan, and Sri Lanka. Each chapter either speaks to an important aspect of the political violence or provides an overall picture of the nature and scope of political violence in the respective country. Political violence is understood in the larger sense of political, that is, above and beyond institutions, and also as an integral part of social relationships where social norms and the role of individual agency play seminal roles. The contributions in this book incorporate both institutional and non-institutional dimensions of political violence. Exploring how everyday life in South Asian states and societies is transformed by the engagement with violence through direct and indirect methods, this book adopts an interdisciplinary framework; diverse methods are employed - from ethnographic readings to more macro level analyses. The phenomenon is explored from historical, sociological, and political perspectives. This book will be useful as a supplementary text in courses on South Asian Studies in general and South Asian Politics in particular.

Labels and Libels Letha Böhringer, Jennifer Kolpacoff Deane, Hildo Engen.2014 This volume investigates the diverse meanings assigned to and adopted by lay religious women in northern Europe between the thirteenth and sixteenth centuries. While many outstanding studies have unearthed the local or regional significance of such women, little comparative or transregional scholarship exists to date. Moreover, traditional emphasis on medieval ecclesiastical condemnation of beguines has obscured the extent to which their communities were intertwined with supportive local social structures. Exploring the multiplicity of contemporary perspectives in the Belgian, Dutch, French, and German contexts over time, the volume traces not only the women's relationships to various authorities and institutions, but also the specific terms used to represent and respond to 'beguines'. Illuminating the kaleidoscopic ways in which medieval people categorized, described, and engaged with such women, the collected essays also underscore the extent to which simple dualities of 'clerical' and 'lay', 'elite' and 'popular', and 'orthodox' and 'heretical' are insufficient constructs with which to map intersections of medieval gender, lay religiosity, and society. In doing so, they propose new avenues and coordinates for exploring the sociospiritual topography of medieval Europe.

Global Development of Organic Agriculture Niels Halberg.2006-01-01 Agriculture and food systems, including organic agriculture, are undergoing a technological and structural modernization strongly influenced by growing globalization. Organic agricultural movements can be seen as a tangible effort towards more sustainable development. However, there are large differences between, on the one hand, industrialized farming and consumption based on global food chains and, on the other, smallholder farmers and resource poor people primarily linked in local food markets in low-income countries. This book provides an overview of the potential role of organic agriculture in a global perspective. The book discusses in-depth political ecology, ecological justice, ecological economics and free trade with new insights on the challenges for organic agriculture. This is followed by the potential role of organic agriculture for improving soil fertility, nutrient cycling and food security and reducing veterinary medicine use, together with discussions of research needs and the importance of non-certified organic agriculture.

**Organic Farming, Prototype for Sustainable Agricultures** Stéphane Bellon,Servane Penvern.2014-04-23 Stakeholders show a growing interest for organic food and farming (OF&F), which becomes a societal component. Rather than questioning whether OF&F outperforms conventional agriculture or not, the main question addressed in this book is how, and in what conditions, OF&F may be considered as a prototype towards sustainable agricultures. The book gathers 25 papers introduced in a first chapter. The first section investigates OF&F production processes and its capacity to benefit from the systems functioning to achieve higher self-sufficiency. The second one proposes an overview of organic performances providing commodities and public goods. The third one focuses on organics development pathways within agri-food systems and territories. As well as a strong theoretical component, this book provides an overview of the new challenges for research and development. It questions the benefits as well as knowledge gaps with a particular emphasis on bottlenecks and lock-in effects at various levels.

*The Rejection of Consequentialism* Samuel Scheffler.1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

*Roman Port Societies* Pascal Arnaud,Simon Keay.2020-09-03 In this book, an international team of experts draws upon a rich range of Latin and Greek texts to explore the roles played by individuals at ports in activities and institutions that were central to the maritime commerce of the Roman Mediterranean. In particular, they focus upon some of the interpretative issues that arise in dealing with this kind of epigraphic evidence, the archaeological contexts of the texts, social institutions and social groups in ports, legal issues relating to harbours, case studies relating to specific ports, and mercantile connections and shippers. While much attention is inevitably focused upon the richer epigraphic collections of Ostia and Ephesos, the papers draw upon inscriptions from a very wide range of ports across the Mediterranean. The volume will be invaluable for all scholars and students of Roman history.

*Life Writing in the Long Run* Sidonie Smith,Julia Watson.2016 Life Writing in the Long Run gathers twenty-one essays by Sidonie Smith and Julia Watson written in collaboration or solo and published over the last quarter-century. Available in print, eBook, and open access versions, this collection captures decades of exciting developments in the field, making it indispensable reading for courses on modes and media of self-presentation in cultural, gender, and literary studies and feminist theory.

*Mediterranean Diasporas* Maurizio Isabella,Konstantina Zanou.2015-11-19 Mediterranean Diasporas looks at the relationship between displacement and the circulation of ideas within and from the Mediterranean basin in the long 19th century. In bringing together leading historians working on Southern Europe, the Balkans, and the Ottoman Empire for the first time, it builds bridges across national historiographies, raises a number of comparative questions and unveils unexplored intellectual connections and ideological formulations. The book shows that in the so-called age of nationalism the idea of the nation state was by no means dominant, as displaced intellectuals and migrant communities developed notions of double national affiliations, imperial patriotism and liberal imperialism. By adopting the Mediterranean as a framework of analysis, the collection offers a fresh contribution to the growing field of transnational and global intellectual history, revising the genealogy of 19th-century nationalism and liberalism, and reveals new perspectives on the intellectual dynamics of the age of revolutions.
