**Noncitizen Power** Tendayi Bloom. 2023-08-10 In Noncitizen Power Tendayi Bloom applies her novel politics of 'noncitizenism' to global governance. Noncitizenism advocates examining political institutions from the perspectives of those who must live and act despite them. Noncitizen power may be essential in addressing some of our world's apparently most intractable challenges. By analysing civil society engagement in the 2018 UN Global Compact for Migration, Bloom examines how far those with the most direct experiences of difficulties arising from migration governance can contribute to shaping it. Interrogating its underlying narratives and how human agency is understood within them, she highlights how politics, from grassroots activism to global deliberations, necessarily involves real people. This book introduces some of those engaging in noncitizen politics, providing a critical contribution to contemporary debates on solidarity, participation, legitimacy and justice in the international system and in migration politics.

**Whose History Counts** June Bam, Lungisile Ntsebeza, Allan Zinn. 2018-11-29 Originally planned as a fact-based book on the pre-colonial history of the Eastern Cape in the true tradition of history, this ground-breaking book focuses on epistemological and foundational questions about the writing of history and whose history counts. Whose History Counts challenges the very concept of 'pre-colonial' and explores methodologies on researching and writing history. The reason for this dramatic change of focus is attributed in the introduction of the book to the student-led rebellion that erupted following the #RhodesMustFall campaign which started at the University of Cape Town on 9 March 2015. Key to the rebellion was the students' opposition to what they dubbed 'colonial' education and a clamour for, among others, a 'decolonised curriculum'. This book is a direct response to this clarion call.

*Public Workers in Service of America* Frederick W. Gooding Jr., Eric S. Yellin. 2023-08-15 From white-collar executives to mail carriers, public workers meet the needs of the entire nation. Frederick W. Gooding Jr. and Eric S. Yellin edit a collection of new research on this understudied workforce. Part One begins in the late nineteenth- and early twentieth century to explore how questions of race, class, and gender shaped public workers, their workplaces, and their place in American democracy. In Part Two, essayists examine race and gender discrimination while revealing the subtle contemporary forms of marginalization that keep Black men and Black and white women underpaid and overlooked for promotion. The historic labor actions detailed in Part Three illuminate how city employees organized not only for better pay and working conditions but to seek recognition from city officials, the public, and the national labor movement. Part Four focuses on nurses and teachers to address the thorny question of whether certain groups deserve premium pay for their irreplaceable work and sacrifices or if serving the greater good is a reward unto itself. Contributors: Eileen Boris, Cathleen D. Cahill, Frederick W. Gooding Jr., William P. Jones, Francis Ryan, Jon Shelton, Joseph E. Slater, Katherine Turk, Eric S. Yellin, and Amy Zanon

After describing basic financial theory and breaking down the digital asset universe, this book provides fundamental knowledge with respect to this young and rising asset class. It focuses on special issues like the application of technical indicators, investment styles, asset pricing and portfolio construction. **What's Left Now?** Andrew Hindmoor.2018-02-02 Our sense of history shapes how we think about ourselves. One of the distinguishing features of the left in Britain is that it holds to a remorselessly bleak and miserabilist view of our recent political history — one in which Margaret Thatcher's election in 1979 marked the start of a still-continuing fall from political grace made evident by the triumph of a free market get-what-you-can neoliberal ideology, dizzying levels of inequality, social decay, rampant individualism, state authoritarianism, and political corruption. The left does not like what has happened to us and it does not like what we have become. Andrew Hindmoor argues that this history is wrong and self-harming. It is wrong because Britain has in many respects become a more politically attractive and progressive country over the last few decades. It is self-harming because this bleak history undermines faith in politics. Post-Brexit, post-Grenfell, and post the 2010, 2015, and 2017 general elections, things may not, right now, look that great. But looked at over the longer haul, Britain is a long way from being a posterchild for neoliberalism. Left-wing ideas and arguments have shaped and continue to shape our politics.

Reacting to the Global Financial Crisis, governments in the UK, the EU, Australia, New Zealand and the United States have adopted new laws dealing with consumer credit, responsible lending, consumer guarantees and unfair contracts. Drawing together authors from all of these jurisdictions, this book analyses and evaluates these initiatives, and makes predictions as to their likely success and possible flaws.

**The Meritocracy Trap** Daniel Markovits.2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort. Even as the country divides itself at every turn, the meritocratic ideal – that social and economic rewards should follow achievement rather than breeding – reigns supreme. Both Democrats and Republicans insistently repeat meritocratic notions. Meritocracy cuts to the heart of who we are. It sustains the American dream. But what if, both up and down the social ladder, meritocracy is a sham? Today, meritocracy has become exactly what it was conceived to resist: a mechanism for the concentration and dynastic transmission of wealth and privilege across generations. Upward mobility has become a fantasy, and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite. At the same time, meritocracy now ensnares even those who manage to claw their way to the top, requiring rich adults to work with crushing intensity, exploiting their expensive educations in order to extract a return. All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy’s successes. This is the radical argument that Daniel Markovits prosecutes with rare force. Markovits is well placed to expose the sham of meritocracy. Having spent his life at elite universities, he knows from the inside the corrosive system we are trapped within. Markovits also knows that, if we understand that meritocratic inequality produces near-universal harm, we can cure it. When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine, it also illuminates the first steps outward, towards a new world that might once again afford dignity and prosperity to the American people.

**International Education as Public Policy in Canada** Merli Tamtik,Roopa Desai Trilokekar,Glen A. Jones.2020-10-07 In the early twenty-first

century international education emerged as an almost ubiquitous concept within discussions of educational curriculum; the objectives of schools, universities, and colleges; and government policies for K-12 and higher education. Although far from a new phenomenon, many jurisdictions now view international education as a highly competitive global industry. This book provides a comprehensive analysis of international education policy in Canada, tracing the complex history of when, how, and why it emerged as a policy area of strategic importance. Illuminating a uniquely Canadian perspective, influenced by regional interests and federal-provincial tensions, *International Education as Public Policy in Canada* addresses challenging questions: Why was Canada a latecomer in addressing this policy issue? What is the relationship between international education and Canadian immigration policy? How did international education develop as a major Canadian industry? The resulting essays from leading scholars contribute not only to the growing Canadian literature on international education policy but also to a critical, global conversation. Contemplating where the Canadian story of international education is headed, *International Education as Public Policy in Canada* calls for a broader debate on ethical practices in internationalization, focusing on inclusion, equity, compassion, and reciprocity.

**Global Financial Stability Report, April 2015** International Monetary Fund. Monetary and Capital Markets Department. 2015-04-15 The current report finds that, despite an improvement in economic prospects in some key advanced economies, new challenges to global financial stability have arisen. The global financial system is being buffeted by a series of changes, including lower oil prices and, in some cases, diverging growth patterns and monetary policies. Expectations for rising U.S. policy rates sparked a significant appreciation of the U.S. dollar, while long term bond yields in many advanced economies have decreased—and have turned negative for almost a third of euro area sovereign bonds—on disinflation concerns and the prospect of continued monetary accommodation. Emerging markets are caught in these global cross currents, with some oil exporters and other facing new stability challenges, while others have gained more policy space as a result of lower fuel prices and reduced inflationary pressures. The report also examines changes in international banking since the global financial crisis and finds that these changes are likely to promote more stable bank lending in host countries. Finally, the report finds that the asset management industry needs to strengthen its oversight framework to address financial stability risks from incentive problems between end-investors and portfolio managers and the risk of runs due to liquidity mismatches.

**Roma Identity and Ritual in the Classroom** Jana Obrovská. 2018-09-21 This book addresses the dynamics of interethnic relationships in ethnically mixed classrooms in the Czech Republic. The classroom is a space in which the boundaries and meanings of facets of identity such as ethnicity, class and gender are negotiated on a daily basis: using rich ethnographic data, the author grounds the analysis in a novel theoretical framework which uses the traditional concept of ritual to examine peer cultures. Highlighting the perspectives of the students themselves, their own peer cultures and the agency of the minority youth present in the classroom, the book reinforces the idea that the dynamics of peer culture can be the scene for successful peer inclusion strategies as well as a stage for the reproduction of inequalities. The author offers a rich array of data from post-socialist classrooms, which are almost invisible in the dominant debates surrounding ethnicity. This revelatory book will be of interest and value to students and scholars of social anthropology, the sociology of education and race and ethnicity in education, as well as practitioners working with minority youth.

**Immigrant Youth, Hip Hop, and Online Games** Barbara Franz. 2015-08-13 Anti-Muslim racism with its attendant xenophobia and (the fear of) Salafist hostility are two of the most essential problems facing Europe today. Both result from the enormous failure of the continent's integration policies, which have either insisted on immigrants' rigid assimilation or left immigrants to fend for themselves. This book radically breaks with contemporary approaches to immigrant assimilation and integration. Instead it examines non-institutional approaches that facilitate immigrant

inclusion through the examples of three alternative small-scale projects that have impacted the lives of urban working-class youth, specifically with second-generation immigrant roots, in Vienna, Austria. These projects involve online gaming, hip hop as an art form, and social work as emancipatory pedagogic practice (commonly referred to as street work). After exploring historic and structural conditions of marginalization in Austria, the book investigates working-class teenagers' social networks and describes an online game designed to provide a platform for interaction between non-immigrant and immigrant youth who usually either do not interact or display prejudice when they engage each other. Hip hop can provide both a necessary outlet for alienated youth to articulate their frustrations and a highly effective tool for transforming inclusion conflicts. This is achieved through offering individual teens the necessary means to gain the resilience and social grounding necessary to help overcome exclusion and marginalization. In addition to the individual young person's agency, the inclusion process, of course, also requires corresponding efforts by the majority society. Social work with marginalized youth is crucial for successful inclusion. Specifically individual support in small-scale settings provides a unique opportunity to open up spaces for discouraged and disaffected teenagers to gain self-worth and dignity. While the book focuses on identity formation and the teenagers' agency, it argues that only projects that include both "newcomer" and "native" can aid in overcoming exclusionary attitudes and policies, eventually allowing some form of social bonding to take place.
