**HCI and Usability for Education and Work** Andreas Holzinger.2008-11-19 The Workgroup Human-Computer Interaction & Usability Engineering (HCI&UE) of the Austrian Computer Society (OCG) serves as a platform for interdisciplinary - change, research and development. While human-computer interaction (HCI) traditionally brings together psychologists and computer scientists, usability engineering (UE) is a software engineering discipline and ensures the appropriate implementation of applications. Our 2008 topic was Human-Computer Interaction for Education and Work (HCI4EDU), culminating in the 4th annual Usability Symposium USAB 2008 held during November 20-21, 2008 in Graz, Austria (<http://usab-symposium.tugraz.at>). As with the field of Human-Computer Interaction in Medicine and Health Care (HCI4MED), which was our annual topic in 2007, technological performance also increases exponentially in the area of education and work. Learners, teachers and knowledge workers are ubiquitously confronted with new technologies, which are available at constantly lower costs. However, it is obvious that within our e-Society the knowledge acquired at schools and universities - while being an absolutely necessary basis for learning - may prove insufficient to last a whole life time. Working and learning can be viewed as parallel processes, with the result that lifelong learning (LLL) must be considered as more than just a catch phrase within our society, it is an undisputed necessity. Today, we are facing a tremendous increase in educational technologies of all kinds and, although the influence of these new technologies is enormous, we must never forget that learning is both a basic cognitive and a social process - and cannot be replaced by technology.

The linguistic work of editors and revisers is related to the professional situations in which they work. Mossop offers in-depth coverage of a wide range of topics, including copyediting, style editing, structural editing, checking for consistency, revising procedures and principles, and translation quality assessment. This third edition provides extended coverage of computer aids for revisers, and of the different degrees of revision suited to different texts. The inclusion of suggested activities and exercises, numerous real-world examples, a proposed grading scheme for editing assignments, and a reference glossary make this an indispensable coursebook for professional translation programmes.

*Landscapes of Literacy* Maria Luisa Canieso- Doronila.1996 Thirteen marginal Philippine communities were examined in an ethnographic study of the meaning of functional literacy and whether literacy invariably promotes development. The 13 sites were purposely selected to provide a broad sampling from three standpoints: (1) major livelihood and form of economic activity (farming, fishing, urban poor, disaster areas); (2) ethnolinguistic grouping (Luzon, Visayas, Mindanao); and (3) lifestyle or rhythm of life in the community (traditional, transitional, Moslem Filipino minority, lowland Christian majority, urban poor, developmental). The sample functional literacy rate in the study's communities ranged from 34.4% to 79.8%. Special attention was paid to the following topics: community life as a context of literacy practice; community knowledge and the passage to a literate tradition; different practices, meanings, and definitions of functional literacy in different contents; constraints in the relationship between literacy and development; and possibilities for literacy in conceptualizing a school of the people. The study demonstrated that the concepts of literacy and

numeracy cannot be separated from their social and cultural settings and that standard measures of literacy used in industrialized countries are often inappropriate in other nations. (Eleven tables/figures are included. The report contains 41 references. Appended is information about the quantitative method and data analysis.) (MN)

*Vocabulary* Norbert Schmitt,Michael McCarthy.1998-01-15 This volume examines the area of second language vocabulary studies from three broad perspectives: description, acquisition and pedagogical context. The book's fifteen chapters are grouped together to achieve a balance between descriptions of what vocabulary is and how it behaves, how the mind learns new vocabulary and then uses it when it is learned, and pedagogical issues of teaching and testing L2 vocabulary. Some of the specific topics addressed in these three general areas include: - word frequency and vocabulary size, multi-word units, variation between spoken and written language; - models of lexical acquisition, first language influences on second language vocabulary acquisition, vocabulary learning strategies; - vocabulary and the syllabus, trends in teaching and testing vocabulary, lexical reference sources.

**The Metaphorical Society** Daniel Rigney.2001-03-21 This book introduces the novice reader to modern social theory through the creative exploration of eight major metaphors that have shaped Western understandings of human society. Rigney vividly yet concisely examines each major

theoretical perspective in sociology, including functionalism, conflict theory, rational choice, and symbolic interactionism. He shows how each of these theories is rooted in a particular metaphorical tradition. Over decades and centuries, Rigney argues, social theorists have variously likened societies to organisms and living systems, to machines, battlefields, legal systems, marketplaces, games, theatrical productions, and discourses. Most interestingly, Rigney deftly shows how nearly all Western social theories fit with one or more of the metaphors. He emphasizes a humanistic understanding of society with an emphasis on the creative agency of social actors and communities. The book offers students a rich understanding of social theory, yet it is simultaneously concise and broad ranging, allowing instructors to further pursue detailed exploration of any perspectives they choose.

**Leaving Terrorism Behind** Tore Bjorgo, John G. Horgan. 2008-11-28 This new edited volume expands our understanding of the processes by which individuals and groups disengage from terrorism. While there has been a growing awareness of the need to understand and prevent processes of radicalization into terrorism, disengagement and deradicalization from terrorism have long been neglected areas in research on terrorism. This book uses empirical data to explore how and why individuals and groups disengage from terrorism, and what can be done to facilitate it. The work also presents a series of case studies of disengagement programmes, from Colombia, northern Europe, Italy, Yemen, Saudi Arabia, Indonesia, Singapore and Malaysia, comparing and assessing their various strengths and weaknesses. In light of the lessons learned from these cases, this book describes and explains the potential for new developments in counter-terrorism. This book will be of great interest to all students of terrorism studies, war and conflict studies, international security and politics in general, as well as professionals in the field of counter-terrorism.
