Cat Painters Biljana Dragoslav Obradović, Dubravka Djurić. 2016 Poetry. Translated from the Serbian by various translators with an introduction by Charles Bernstein. CAT PAINTERS is the first comprehensive anthology of contemporary Serbian poetry to appear in English. Collecting the work of 71 Serbian poets born since 1940, this book includes Serbs living in Serbia; diasporic Serbs living in the US, France and Italy; Roma and Jewish Serbs; a Japanese who lives in Serbia; and LGBT writers. Half of those included are women. The poetry varies from very traditional forms to experimental, L=A=N=G=U=A=G=E inspired, writing. They speak of all things human: love, war, peace, struggle and loss. Many of the poets were inspired by Americans like T.S. Eliot, Ezra Pound, Allen Ginsberg, Gwendolyn Brooks, past US Poet Laureate Charles Simic (who was born in Serbia and has edited an anthology of Serbian poetry in the US), and Charles Bernstein, who has written the Preface, among others. Editors Biljana D. Obradović, who lives in New Orleans, and Dubravka Djurić, who lives in Belgrade, both poets and critics, have assembled a broad range of work translated by 31 distinguished translators from around the world, revealing a side of Serbia which people in the US and the West may not be familiar with—its deep traditions and its very modern engagement with literature, politics and aesthetics. This remarkable anthology sets a high standard for future collections of Serbian, European, or indeed any literatures. Behavioral Mathematics for Game AI Dave Mark. 2009 Human behavior is never an exact science, making the design and programming of artificial intelligence that seeks to replicate human behavior difficult. Usually, the answers cannot be found in sterile algorithms that are often the focus of artificial intelligence programming. However, by analyzing why people behave the way we do, we can break down the process into increasingly smaller components. We can model many of those individual components in the language of logic and mathematics and then reassemble them into larger, more involved decision-making processes. Drawing from classical game theory, Behavioral Mathematics for Game AI covers both the psychological foundations of human decisions and the mathematical modeling techniques that AI designers and programmers can use to replicate them. With examples from both real life and game situations, you'll explore topics such as utility, the fallacy of rational behavior, and the inconsistencies and contradictions that human behavior often exhibits. You'll examine various ways of using statistics, formulas, and algorithms to create believable simulations and to model these dynamic, realistic, and interesting behaviors in video games. Finally, you'll be introduced to a number of tools you can use in conjunction with standard AI algorithms to make it easier to utilize the mathematical models.

Physics Alan Giambattista, Betty McCarthy Richardson, Robert C. Richardson. 2010 Physics 2nd edition is an alternate version of the College Physics 3rd edition text by Giambattista/Richardson/Richardson. The key difference is that Physics covers kinematics and forces in the more traditional organization of beginning with Kinematics and proceeding to forces. (College Physics takes an integrated approach to forces and kinematics, introducing forces and interweaving kinematics.).

IQ in Question Michael J A Howe. 1997-09-29 `In this remarkably economical, clear and informed book, Mike Howe... sets about unravelling the formidable semantic, logical and empirical knots into which IQ testers and their supporters have tied themselves.... Howe suggests that we have, for decades, been asking the wrong kinds of questions. He points to the number of alternative, theoretically richer, views of human intelligence that don't reduce all to a single dimension... this is rendered with an easy, readable style which assumes no previous technical knowledge' - British Journal of Educational Psychology In this provocative and accessible book, Michael Howe exposes serious flaws in our most widely accepted beliefs about intelligence. He shows that cr

Lady Catherine and the Real Downton Abbey The Countess Of Carnarvon. 2013-09-12 Sometimes the facts are even more extraordinary than the fiction... This book tells the story of Lady Catherine, a beautiful American girl who became the chatelaine of Highclere Castle, the setting for Julian Fellowes' award-winning drama Downton Abbey. Charming and charismatic, Catherine caught the eye of Lord Porchester (or 'Porchey', as he was known) when she was just 20 years old, and wearing a pale yellow dress at a ball. She had already turned down 14 proposals before she eventually married Porchey in 1922. But less than a year later Porchey's father died suddenly, and he became the 6th Earl of Carnarvon, inheriting a title and a Castle that changed both their lives forever. Catherine found herself suddenly in charge of a small army of household staff, and hosting lavish banquets and weekend house parties. Although the couple were very much in love, considerable challenges lay ahead for Catherine. They were immediately faced with the task of saving Highclere when debts threatened to destroy the estate. As the 1920s moved to a close, Catherine's adored brother died and she began to lose her husband to the distractions London had to offer. When the Second World War broke out, life at the Castle would never be the same again. Drawing on rich material from the private archives at Highclere, including beautiful period photographs, the current Countess of Carnarvon transports us back to the thrilling and alluring world of the 'real Downton Abbey' and its inhabitants.

Robotic Sailing 2015 Anna Friebe, Florian Haug. 2015-08-20 This book presents the cutting edge developments within a broad field related to robotic sailing. The contributions were presented during the 8th International Robotic Sailing Conference, which has taken place as a part of the 2015 World Robotic Sailing Championships in Mariehamn, Åland (Finland), August 31st - September 4th 2015. Since more than a decade, a series of competitions such as the World Robotic Sailing Championship have stimulated a variety of groups to work on research and development around autonomous sailing robots, which involves boat designers, naval architects, electrical engineers and computer scientists. While many of the challenges in building a truly autonomous sailboat are still unsolved, the books presents the state of the art of research and development within platform optimization, route and stability planning, collision avoidance, power management and boat control.

Bryan Adams: Homeless Bryan Adams. 2019-02 Six years ago Bryan Adams was approached by Trudie Styler to photograph a portrait story of homeless street vendors for *The Big Issue* magazine. That story inspired a more in-depth photographic look at these people who live on the streets of London and sell the magazine. *The Big Issue* is a weekly publication created by professional journalists and photographers, and sold on the streets to provide the homeless with legitimate income and facilitate their reintegration into mainstream society. Today *The Big Issue* is published in several international editions throughout Asia and Africa. Adams' portraits are direct, compassionate and full of dignity. They depict character beyond social and economic circumstance, and can be seen as a continuation of Adams' 2013 *Wounded: The Legacy of War*, his portraits of young British soldiers who suffered life-changing injuries during combat in Iraq and Afghanistan.

In Fifty Years We'll All Be Chicks Adam Carolla. 2011-05-17 A couple years back, I was at the Phoenix airport bar. It was empty except for one heavy-set, gray bearded, grizzled guy who looked like he just rode his donkey into town after a long day of panning for silver in them thar hills. He ordered a Jack Daniels straight up, and that's when I overheard the young guy with the earring behind the bar asking him if he had ID. At first the old sea captain just laughed. But the guy with the twinkle in his ear asked again. At this point it became apparent that he was serious. Dan Haggerty's dad fired back, You've got to be kidding me, son. The bartender replied, New policy. Everyone has to show their ID. Then I watched Burl Ives reluctantly reach into his dungarees and pull out his military identification card from World War II. It's a sad and eerie harbinger of our times that the Oprah-watching, crystal-rubbing, Whole Foods-shopping moms and their whipped attorney husbands have taken the ability to reason away from the poor schlub who makes the Bloody Marys. What we used to settle with common sense or a fist, we now settle with hand sanitizer and lawyers. Adam Carolla has had enough of this insanity and he's here to help us get our collective balls back. In *Fifty Years We'll All*

Be Chicks is Adam's comedic gospel of modern America. He rips into the absurdity of the culture that demonized the peanut butter and jelly sandwich, turned the nation's bathrooms into a lawless free-for-all of urine and fecal matter, and put its citizens at the mercy of a bunch of minimum wagers with axes to grind. Peppered between complaints Carolla shares candid anecdotes from his day to day life as well as his past—Sunday football at Jimmy Kimmel's house, his attempts to raise his kids in a society that he mostly disagrees with, his big showbiz break, and much, much more. Brilliantly showcasing Adam's spot-on sense of humor, this book cements his status as a cultural commentator/comedian/complainer extraordinaire.

Carotenoids and Retinal Disease John T. Landrum,John Nolan.2013-10-18 The macular carotenoids play key roles in eye health and retinal disease. Age-related macular degeneration (AMD), the most common cause of acquired blindness in much of the world, is associated with low levels of macular pigment. Macular pigment is also essential for enhancing visual performance by reducing glare disability and improving photostress recovery. Carotenoids and Retinal Disease presents an up-to-date, thorough volume devoted to the chemistry, pathobiology, visual science, and medical and public health significance of the macular carotenoids. With contributions from an international group of leading experts, this book covers a range of topics, from macular anatomy to clinical trials. It begins with a chapter tracing the discovery of macular pigment through the more recent functional recognition of carotenoids. The text covers AMD risk factors, epidemiology, pathogenesis, and classifications. It reviews evidence from epidemiological studies of relationships between AMD and the carotenoids lutein, zeaxanthin, and meso-zeaxanthin, as well as evidence from clinical trials on the effects of macular carotenoid supplementation in subjects with AMD and normal subjects. The book explores the use of molecular genetics in studying macular pigment and AMD pathogenesis; bioavailability of macular pigment; functions of lutein, zeaxanthin, and meso-zeaxanthin; and the identification of macular carotenoid binding proteins involved in pigment uptake and transport. It also covers xanthophyll-membrane interactions, and the macular carotenoids in human serum and their capacity to protect against AMD. Further, the implications of light distribution on the retina for AMD are discussed. Advancing our understanding of how the macular carotenoids enhance vision and prevent vision loss, this book provides a valuable reference for researchers and clinicians involved in the treatment and prevention of retinal disease.

Empire Roller Disco Sara Rosen.2023 ...Pagnano's photographs remind us of the importance of documenting moments as they occur so that we can savour the pleasures of the past and look at the present with fresh eyes. - Huck Brooklyn's Empire Rollerdrome opened its doors in 1941 and soon became the borough's premier destination for recreational and competitive roller skating. But it wasn't until the late 1970s that the celebrated rink reached iconic status by replacing its organist with a live DJ, installing a state of the art sound and light system, and renaming itself after the nationwide dance craze it had helped to originate: the Empire Roller Disco was born. In 1980, Forbes magazine sent the acclaimed street photographer Patrick D. Pagnano to document the Empire and its legendary cast of partygoers. The resulting photographs, gathered in TK for the first time, capture the vibrant spirits, extraordinary styles, and sheer joys of Brooklyn roller disco at its dizzying peak.

Fear of Barbarians Petar Adonovski.2021-08-25 Gavdos: a remote island south of Crete, the southernmost point of Europe, surrounded by an endless expanse of sea. To Oksana, who has come from Ukraine with her friends to recover from illness in the aftermath of Chernobyl, it seems like a dream to live in a blue-and-white house with a lemon tree. To Penelope, a Greek woman who was married off to an unsuitable man by nuns from the convent where she spent her teenage years, it is a kind of prison. Their two narratives, interwoven with other stories - of the other women of the sparse community, of their own past lives and loves - are skilfully combined with themes of otherness and the notions of 'foreign' and 'barbaric' in this poetic and timely short novel by acclaimed Macedonian writer Petar Adonovski, winner of the European Union Prize for Literature.
