Poultry Quality Evaluation Massimiliano Petracci, Cecile Berri.2017-08-01 Poultry Quality Evaluation: Quality Attributes and Consumer Values provides a new reference source that covers these aspects with the same scientific authority as texts on traditional poultry meat quality values. The book's first section explores new developments in our understanding of how muscle structure affects the eating qualities of cooked meat. The second section highlights new techniques for measuring, predicting, and producing poultry meat quality and how these new techniques help us minimize variability in eating quality and/or maximize value. The final section identifies the current qualities of consumer and public perceptions, including what is sustainable, ethical, desirable, and healthy in poultry production and consumption. Brings together top researchers in the field to provide a comprehensive overview of the new elements of poultry quality evaluation Provides a comprehensive reference source on poultry with the same scientific authority as texts on more broad traditional meat quality values Contains contributions from editors who are very well known and highly respected in the field

The Implications of Freedom Wiebe Nauta.2004 The term 'NGO' is so widely used nowadays that it has effectively lost its meaning. Therefore, in order to put back flesh on what has become a very bare skeleton, this book attempts to portray a 'real' organization that originated during the anti-apartheid struggle in South Africa. By meticulously studying this land sector NGO over a prolonged period of time, much is revealed about its internal dynamics and the changing relationships with actors in the state, civil society and the market. This embedded tale (re-)introduces a historical, political and socio-economic dimension in the analysis of NGOs and shows that they are not as value-driven, autonomous, accountable and non-profit as is often claimed.

Poultry Inspection National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Food and Nutrition Board, Committee on Public Health Risk Assessment of Poultry Inspection Programs.1987-01-01 According to surveys, the public believes the chickens it is buying are wholesome. *Poultry Inspection: The Basis for a Risk-Assessment Approach* looks at current inspection procedures to determine how effective the Food Safety Inspection Service is in finding dangerous levels of contaminants and disease-producing microorganisms. The book first describes the history behind the current system, noting that the amount of poultry inspected has increased dramatically while techniques and regulations have remained constant since 1968. The steps involved in an inspection are then described, followed by a discussion of alternative and innovative inspection procedures. It then provides a risk-assessment model for poultry, including submodels for each stage of processing. Risk assessment is used to protect health, establish priorities, identify problems, and set acceptable levels of risk. The model is applied both to microbiological hazards and to chemical contaminants.
