English Industries of the Middle Ages: Being an Introduction to the Industrial History of Medieval England Louis Francis Salzman.2020-09-28 The title of this book indicates at once its aim and its limitations. It makes no pretence to be a complete history of the early industrial life of England, but at the same time it does claim to be an introduction to the study of that subject. It is my hope, and indeed my belief, that from it the general reader, equipped with interest in the history of his country rather than with technical knowledge, will obtain something more than a bare outline of industrial conditions in pre-Elizabethan days. The student who is anxious to go more deeply into the subjects here treated may use this book as a road map and the footnotes as finger-posts to guide him to the heights of completer knowledge. From the nature of my subject it was inevitable that the book should be full of technicalities, figures, and statistics, but it has been my endeavour to render the technicalities intelligible, and to prevent the significance of the statistics being obscured by an excess of detail. The scheme which I have adopted is to treat the leading medieval industries one by one, showing as far as possible their chief centres, their chronological development, the conditions and the methods of working. With the disposal of the finished products through intermediaries, merchants, or shopkeepers, I have not concerned myself, deeming such matters rather to belong to the realms of trade and commerce than of industry; and for this same reason, and also because it has been dealt with by other writers, I have not dealt with the great source of England's wealth—wool. Agriculture, also, and fishing I have excluded from my definition of industry. A more culpable omission, which I think calls for a word of explanation, is shown in the case of building. This, however, is not omitted by an oversight, nor yet through any desire to save myself trouble. I had collected a great mass of material for an intended section on the Building Industry, but after careful consideration I came to the conclusion that the material available was so exceedingly technical, and the obscurity of the details so greatly in excess of their value when elucidated, as to render such a section rather a weariness and a stumbling-block to the student than a help. The subjects treated in the several sections are thoroughly representative, if not completely exhaustive, of English industrial life, and a general survey of the subject is contained in my last chapter, where I have outlined as broadly as possible the general principles that governed the Control of Industry—the typical regulations made by, or for, the craftsmen in the interest of the employer, the workman, or the consumer. This last section might, of course, easily have been extended to cover more pages than this whole volume, but it is questionable whether multiplicity of detail tends to ease of assimilation. A single typical instance of a prevalent custom or regulation is as significant as a list of a dozen local variations, and far easier to remember. A rule is more easily remembered by one example than by a score, and with such a wealth of material as exists the risk of obscurity is greater from amplification than from concentration.

English Medieval Industries John Blair, W. John Blair, Nigel Ramsay. 1991-01-01 English Medieval Industries is an authoritative modern survey of medieval crafts and their products. It is heavily illustrated by pictures of surviving objects and contemporary representations of medieval work. Each industry is approached by material (amongst others stone, tin, lead, copper, iron, brick, glass, leather, bone and wood), discussing its acquisition, working and sale as a finished product. The contributors are the leading experts in their fields. They describe the specialist work that went to make the housing, clothing, tools, vessels and ornaments of medieval people. A general bibliography provides a valuable reference tool.

Credit and Debt in Medieval England c.1180-c.1350 Phillipp Schofield, Nicholas Mayhew. 2002-08-07 The essays in this volume look at the mechanics of debt, the legal process, and its economics in early medieval England. Beneath the elevated plane of high politics, affairs of the Crown and international finance of the Middle Ages, lurked huge numbers of credit and debt transactions. The transactions and those who conducted them moved between social and economic worlds; merchants and traders, clerics and Jews, extending and receiving credit to and from their social superiors, equals and inferiors. These papers build upon an established tradition of approaches to the study of credit and debt in the Middle Ages, looking at the wealth of historical material, from registries of debt and legal records, to parliamentary roles and statutes, merchant accounts, rents and leases, wills and probates. Four of the six papers in this volume were given at a conference on 'Credit and debt in medieval and early modern England' held in Oxford in 2000. The other two papers draw upon new important postgraduate theses. Contents: Introduction (Phillipp Schofield) ; Aspects of the law of debt, 1189-1307 (Paul Brand) ; Christian and Jewish lending patterns and financial dealings during the twelfth and thirteenth centuries (Robin R. Mundill) ; Some aspects of the business of statutory debt registries, 1283-1307 (Christopher McNall) ; The English parochial clergy as investors and creditors in the first half of the fourteenth century (Pamela Nightingale) ; Access to credit in the medieval English countryside (Phillipp Schofield) ; Creditors and debtors at Oakington, Cottenham and Dry Drayton (Cambridgeshire), 1291-1350 (Chris Briggs) .

The English Woollen Industry, c.1200-c.1560 John Oldland. 2019-01-15 This is the first book to describe the early English woollens' industry and its dominance of the trade in quality cloth across Europe by the mid-sixteenth century, as English trade was transformed from dependence on wool to value-added woollen cloth. It compares English and continental draperies, weighs the advantages of urban and rural production, and examines both quality and coarse cloths. Rural clothiers who made broadcloth to a consistent high quality at relatively low cost, Merchant Adventurers who enjoyed a trade monopoly with the Low Countries, and Antwerp's artisans who finished cloth to customers' needs all eventually combined to make English woollens unbeatable on the continent.

Economic History of Europe Melvin M. Knight, Harry Elmer Barnes, Felix Flügel. 2022-12-15

Originally published in 1930, this book is a detailed but lucid piece of historical writing which answers many questions about ancient and medieval history that are most important for understanding contemporary economic problems. The economic history of Europe in modern times is both the history of agriculture, industry and commerce of a continent over 5 centuries and the history of a series of changes in economic organization which have been dominant in making the modern world what it is. This book gives due weight to both of these aspects. As well as being an account of sequences of events, it is also an account of changing forms of economic activity, alterations of the economic structure of society and emerging economic problems in the 20th Century.

Late Medieval Ipswich Nicholas R. Amor. 2011 A detailed study of Ipswich at a time of great growth and prosperity, highlighting the activities of its industries, merchants and craftsmen. Ipswich

in the late Middle Ages was a flourishing town. A wide range of commodities passed through its port, to and from far-flung markets, bought and sold by merchants from diverse backgrounds, and carried in ships whose design evolved during the fourteenth and fifteenth centuries. Its trading partners, both domestic and overseas, changed in response to developments in the international, national and local economy, as did the occupations of its craftsmen, with textile, leather and metal industries were of particular importance. However, despite its importance, and the richness of its medieval archives, the story of Ipswich at the time has been sadly neglected. This is a gap which the author here aims to remedy. His careful study allows a detailed picture of urban life to emerge, shedding new light not only on the borough itself, but on towns more generally at a crucial point in their development, at a period of growing affluence when ordinary people enjoyed an unprecedented rise in standards of living, and the benefits of what might be termed our first consumer revolution. Nicholas Amor gained his doctorate from the University of East Anglia.
