Using the European Portfolio for Student Teachers of Languages David Newby, Anne-Brit Fenner, Barry Jones, European Centre for Modern Languages, Council of Europe. 2011-01-01 The European Portfolio for Student Teachers of Languages is a tool for reflection and self-assessment of the didactic knowledge and skills necessary to teach languages. It builds on insights from the Common European Framework of Reference and the European Language Portfolio as well as the European Profile for Language Teacher Education. Four years after its initial publication it has been translated into twelve European and Asian languages. To meet widespread demand this ECML publication provides materials which support its implementation in teacher education. The book entitled *Using the European Portfolio for Student Teachers of Languages* presents examples, discussions and research findings of how the EPOSTL is used in initial teacher education courses, in bi-lateral teacher education programs and in teaching practice. The accompanying folder and flyer feature, amongst other things, guidelines for strategic measures for introducing the EPOSTL in a particular institution.

Medical Surge Capacity Institute of Medicine, Board on Health Sciences Policy, Forum on Medical and Public Health Preparedness for Catastrophic Events. 2010-03-18 During natural disasters, disease pandemics, terrorist attacks, and other public health emergencies, the health system must be prepared to accommodate a surge in the number of individuals seeking medical help. For the health community, a primary concern is how to provide care to individuals during such high demand, when the health system's resources are exhausted and there are more patients than the system can accommodate. The IOM's Forum on Medical and Public Health Preparedness for Catastrophic Events held a workshop June 10-11, 2009, to assess the capability of and tools available to federal, state, and local governments to respond to a medical surge. In addition, participants discussed strategies for the public and private sectors to improve preparedness for such a surge. The workshop brought together leaders in the medical and public health preparedness fields, including policy makers from federal agencies and state and local public health departments; providers from the health care community; and health care and hospital administrators. This document summarizes the workshop.

BLS, Basic Life Support Patient Care Standards Ontario. Emergency Health Services Branch. 2007-01-01 The BLS patient care standards state the Ministry of Health and Long-Term Care expectations with respect to how paramedics will interact with their patients. The standard sets out a logical ordering of the inter-related activities and practices of paramedics, activities which start with the patient's entry point to, and end with, their exit point from the ambulance system. The standard is divided into eight sections: general standard of care, medical patient categories, trauma patient categories, environment-related disorders, obstetrical conditions, pediatrics, geriatrics, and psychiatric disorders.--Includes text from document.

Crisis Standards of Care Institute of Medicine, Board on Health Sciences Policy, Committee on Crisis Standards of Care: A Toolkit for Indicators and Triggers. 2013-10-27 Disasters and public health emergencies can stress health care systems to the breaking point and disrupt delivery of vital medical services. During such crises, hospitals and long-term care facilities may be without power; trained staff, ambulances, medical supplies and beds could be in short supply; and alternate care facilities may need to be used. Planning for these situations is necessary to provide the best possible health care during a crisis and, if needed, equitably allocate scarce resources. *Crisis Standards of Care: A Toolkit for Indicators and Triggers*

examines indicators and triggers that guide the implementation of crisis standards of care and provides a discussion toolkit to help stakeholders establish indicators and triggers for their own communities. Together, indicators and triggers help guide operational decision making about providing care during public health and medical emergencies and disasters. Indicators and triggers represent the information and actions taken at specific thresholds that guide incident recognition, response, and recovery. This report discusses indicators and triggers for both a slow onset scenario, such as pandemic influenza, and a no-notice scenario, such as an earthquake. Crisis Standards of Care features discussion toolkits customized to help various stakeholders develop indicators and triggers for their own organizations, agencies, and jurisdictions. The toolkit contains scenarios, key questions, and examples of indicators, triggers, and tactics to help promote discussion. In addition to common elements designed to facilitate integrated planning, the toolkit contains chapters specifically customized for emergency management, public health, emergency medical services, hospital and acute care, and out-of-hospital care.
