Higher Education's Road to Relevance Susan A. Ambrose, Laura A. Wankel. 2020-01-02 Explores the current context, role, and challenges of post-secondary education and presents options for promising pathways forward. The post-secondary educational system has undergone dramatic changes and experienced immense stress in the past two decades. Once regarded as the logical next step toward career opportunities and financial security, higher education is a subject of growing uncertainty for millions of people across the United States. It is more common than ever to question the return on investment, skyrocketing cost, and student debt burden of going to college. Prospective students, and many employers, increasingly view attending institutions of higher learning as inadequate preparation for entering the 21st century workforce. High-profile scandals—financial impropriety, sexual abuse, restrictions of free speech, among others—have further eroded public trust. In response to these and other challenges, leading voices are demanding strengthened accountability and measurable change. Higher Education's Road to Relevance illustrates why change is needed in post-secondary education and offers practical solutions to pressing concerns. The authors, internationally recognized experts in college-level teaching and learning innovation, draw heavily from contemporary research to provide an integrative approach for post-secondary faculty, staff, and administrators of all levels. This timely book helps readers identify the need for leadership in developing new networks and ecosystems of learning and workforce development. This valuable book will help readers: Understand the forces driving change in higher education Develop multiple pathways to create and credential self-directed learners Promote access to flexible, cost-effective, and relevant learning Adapt structures and pedagogies to address issues and overcome challenges Use an inclusive approach that extends to employers, K-12 educators, post-secondary educators, and policy-makers, among others Higher Education's Road to Relevance is a much-needed resource for college and university administrators, academic researchers, instructors and other faculty, and staff who support and interact with students.

Campus Crime Bonnie Fisher, John J. Sloan. 2007 Criminologists, political scientists, sociologists, planners, lawyers, security experts, and policy advocates address the most pressing crime and security issues that continue to face post-secondary administrators and their students, faculty, and staff. Each chapter addresses a specific issue, presents original research bearing on the issue, and discusses policy implications for higher education of the research. While some chapters continue to address long-standing topics such as sexual victimization and the role of campus police departments, many chapters address new and emerging topics such as stalking, computer hacking, and identity theft. The final part of the book suggests future directions for research, programs, and policies. Here, the authors review some of the major questions about campus crime and security that are still in need of answers and relate these to programs and policy decisions by campus administrators.

Africans in Global Migration John A. Arthur, Joseph Takougang, Thomas Owusu. 2012-08-31 Four overarching themes underscore the essays in this book. These are the creation of African diaspora community and institutional structures; the structured and shared relationships among African immigrants, host, and homeland societies; the construction and negotiation of diaspora spaces, and domains (racial, ethnic, class consciousness, including identity politics; and finally African migrant economic integration, occupational, and labor force roles and statuses and impact on host societies. Each of the thematic themes has been chosen with one specific goal in mind: to depict and represent the critical components in the reconstitution of the African diaspora in international migration. We contextualized the themes in the African diaspora as a dynamic process involving what Paul Zeleza called the “diasporization” of African immigrant settlement communities in global transnational spaces. These themes also reflect the diversities inherent in the diaspora communities and call attention to the fluid and dynamic boundaries within which Africans create, diffuse, and engage host and home societies. In this context, the themes outlined in this book embody the diaspora tapestries woven by the immigrants to center African social and cultural forms in their host societies and communities. Collectively, the themes represent pathways for the elucidation of understanding African immigrant territorialization. Our purpose is to map out and identify the sources and sites for the contestations of the myriad of cultural manifestations of the new African diaspora and its depictions within the totality of the shared meanings and appropriations of the essences of African-ness or African blackness. The vulnerabilities, struggles, threats (internal or external to the immigrant community), and opportunities emanating from the diasporic relationships that these immigrants create are accentuated within the nexus of African global migrations. We view the African diaspora in terms of spatial and geographic constructions and propagations of African cultural identities and institutional forms in global domains whose boundaries are not static but rather dynamic, complex, and multidimensional. Simply stated, we approach the African diaspora from a perspective that incorporates the historical, as well as contemporary postmodern constructions of the Africa’s dispersed communities and their associated transnational identity forms.

The Church Cracked Open Stephanie Spellers. 2021-03-17 This book will make a profound difference for the church in this moment in history. — The Most Reverend Michael B. Curry Sometimes it takes disruption and loss to break us open and call us home to God. It’s not surprising that a global pandemic and once-in-a-generation reckoning with white supremacy—on top of decades of systemic decline—have spurred Christians everywhere to ask who we are, why God placed us here and what difference that makes to the world. In this critical yet loving book, the author explores the American story and the Episcopal story in order to find out how communities steeped in racism, establishment, and privilege can at last fall in love with Jesus, walk humbly with the most vulnerable and embody beloved community in our own broken but beautiful way. The Church Cracked Open invites us to surrender privilege and redefine church, not just for the sake of others, but for our own salvation and liberation.

A Sea without Fish David L. Meyer,Richard Arnold Davis.2009-03-04 A "superbly written, richly illustrated" guide to the animals who lived 450 million years ago—in the fossil-rich area where Cincinnati, Ohio now stands (Rocks & Minerals). The region around Cincinnati, Ohio, is known throughout the world for the abundant and beautiful fossils found in limestones and shales that were deposited as sediments on the sea floor during the Ordovician Period, about 450 million years ago—some 250 million years before the dinosaurs lived. In Ordovician time, the shallow sea that covered much of what is now the North American continent teemed with marine life. The Cincinnati area has yielded some of the world's most abundant and best-preserved fossils of invertebrate animals such as trilobites, bryozoans, brachiopods, molluscs, echinoderms, and graptolites. So famous are the Ordovician fossils and rocks of the Cincinnati region that geologists use the term "Cincinnatian" for strata of the same age all over North America. This book synthesizes more than 150 years of research on this fossil treasure-trove, describing and illustrating the fossils, the life habits of the animals represented, their communities, and living relatives, as well as the nature of the rock strata in which they are found and the environmental conditions of the ancient sea. "A fascinating glimpse of a long-extinct ecosystem." —Choice

How did church politics and other critical events shape the social and environmental transformation of a once rural community? This history provides a complete survey of the Bond Hill area, from the post-Colonial period through the Village of Bond Hill's annexation by the City of Cincinnati in 1903, up until the present day.

Family Properties Beryl Satter.2010-03-02 Part family story and part urban history, a landmark investigation of segregation and urban decay in Chicago -- and cities across the nation The promised land for thousands of Southern blacks, postwar Chicago quickly became the most segregated city in the North, the site of the nation's worst ghettos and the target of Martin Luther King Jr.'s first campaign beyond the South. In this powerful book, Beryl Satter identifies the true causes of the city's black slums and the ruin of urban neighborhoods throughout the country: not, as some have argued, black pathology, the culture of poverty, or white flight, but a widespread and institutionalized system of legal and financial exploitation. In Satter's riveting account of a city in crisis, unscrupulous lawyers, slumlords, and speculators are pitched against religious reformers, community organizers, and an impassioned attorney who launched a crusade against the profiteers—the author's father, Mark J. Satter. At the heart of the struggle stand the black migrants who, having left the South with its legacy of sharecropping, suddenly find themselves caught in a new kind of debt peonage. Satter shows the interlocking forces at work in their oppression: the discriminatory practices of the banking industry; the federal policies that created the country's shameful dual housing market; the economic anxieties that fueled white violence; and the tempting profits to be made by preying on the city's most vulnerable population. Family Properties: Race, Real Estate, and the Exploitation of Black Urban America is a monumental work of history, this tale of racism and real estate, politics and finance, will forever change our understanding of the forces that transformed urban America. Gripping . . . This painstaking portrayal of the human costs of financial racism is the most important book yet written on the black freedom struggle in the urban North.—David Garrow, The Washington Post

Diffuse Cystic Lung Diseases Nishant Gupta,Kathryn A. Wikenheiser-Brokamp,Francis X. McCormack.2021-01-28 This book is a comprehensive reference on diffuse cystic lung diseases (DCLDs). DCLDs are a group of pathophysiologically heterogeneous processes that are characterized by the presence of multiple spherical or irregularly shaped, thin-walled, air-filled spaces within the pulmonary parenchyma. In recent years, tremendous advancements have been made in these diseases leading to improved understanding of the underlying pathophysiology, and improved outcomes with targeted therapies. The authors, who are leading experts in the field, delineate DCLDs as a separate category distinct from other interstitial lung diseases, and have created this textbook specifically dedicated to this disease group. This book begins with a chapter introducing the definition and classification of DCLDs. Subsequent chapters address the pathogenic mechanisms underlying pulmonary cyst formation and provide a detailed overview of the radiological and pathological features of DCLDs. The common as well as uncommon causes of DCLDs are comprehensively reviewed in individual chapters, as are the varied clinical presentations and extrapulmonary manifestations, and approaches to management and treatment. The book culminates in a final chapter that presents a practical algorithmic approach to diagnosis that progresses from least invasive to most invasive approaches. This textbook provides a one-stop, comprehensive and integrated, clinical, radiologic, and pathologic overview of DCLDs that will be as useful to the practicing clinician as it is to the clinical investigator.
