*HIV/AIDS in Rural Communities* Fayth M. Parks, Gregory S. Felzien, Sally Jue. 2017-07-13 This wide-ranging volume reviews the experience and treatment of HIV/AIDS in rural America at the clinical, care system, community, and individual levels. Rural HIV-related phenomena are explored within healthcare contexts (physician shortages, treatment disparities) and the social environment (stigma, the opioid epidemic), and contrasted with urban frames of reference. Contributors present latest findings on HIV medications, best practices, and innovative opportunities for improving care and care settings, plus invaluable first-person perspective on the intersectionality of patient subpopulations. These chapters offer both seasoned and training practitioners a thorough grounding in the unique challenges of providing appropriate and effective services in the region. Featured topics include: Case study: Georgia's rural vs. non-rural populations HIV medications: how they work and why they fail Pediatric/adolescent HIV: legal and ethical issues Our experience: HIV-positive African-American women in the Deep South Learning to age successfully with HIV Bringing important detail to an often-marginalized population, *HIV/AIDS in Rural Communities* will interest and inspire healthcare practitioners including physicians, nurse practitioners, physician assistants, pharmacists, case managers, psychologists, social workers, counselors, and family therapists, as well as educators, students, persons living with HIV, advocates, community leaders, and policymakers.

*Leading an Academic Medical Practice* Lee Bach Lu, Ernie-Paul Barrette, Craig Noronha, Halle G. Sobel, Daniel G. Tobin. 2018-02-26 This book informs and supports medical educators and clinic leaders regarding the key clinical and administrative components necessary to run an academic medical practice. From a group of expert faculty from the Society of General Internal Medicine (SGIM) with years of experience in managing academic medical practices, this manual offers comprehensive guidance to the clinic director regarding critical factors involved with running an academic medical practice including, but not limited to: compliance with Accreditation Council for Graduate Medical Education (ACGME) requirements, clinic orientation and curricula implementation, clinic workflow challenges, billing, coding, and the Primary Care Exception Rule, productivity metrics and quality indicators, evaluation and feedback for trainees, faculty, and clinic staff, implementation of a Patient Centered Medical Home (PCMH), development of controlled substance prescribing policies, medical student involvement in resident clinics, and Veteran Affairs practices and non-traditional care settings. The scope of this book is sufficiently broad to be comprehensive and practical while still anticipating the further evolution of the academic medical practice in the years to come. Each chapter focuses on a particular aspect of clinic leadership and will offer real-world examples and management "pearls" for the clinic director. Chapters highlight common challenges and solutions and should be useful across disparate practice settings. This is an ideal resource for clinic directors, core faculty, and clinic leadership in academic outpatient medical practices, particularly those within the field of Internal Medicine, Primary Care, and related specialties.

**Shooting Up** Lukasz Kamienski. 2016-02-10 *Shooting Up: A Short History of Drugs and War* examines how intoxicants have been put to the service of states, empires and their armies throughout history. Since the beginning of organized combat, armed forces have prescribed drugs to their members for two general purposes: to enhance performance during combat and to counter the trauma of killing and witnessing violence after it is over. Stimulants (e.g. alcohol, cocaine, and amphetamines) have been used to temporarily create better soldiers by that improving stamina, overcoming sleeplessness, eliminating fatigue, and increasing fighting spirit. Downers (e.g. alcohol, opiates, morphine, heroin, marijuana, barbiturates) have also been useful in dealing with the soldier's greatest enemy - shattered nerves. Kamienski's focuses on drugs prescribed by military authorities, but also documents the widespread unauthorised consumption by soldiers themselves. Combatants have always treated with various drugs and alcohol, mainly for recreational use and as a reward to

themselves for enduring the constant tension of preparing for. Although not officially approved, such self-medication is often been quietly tolerated by commanders in so far as it did not affect combat effectiveness. This volume spans the history of combat from the use of opium, coca, and mushrooms in pre-modern warfare to the efforts of modern militaries, during the Cold War in particular, to design psychochemical offensive weapons that can be used to incapacitate rather than to kill the enemy. Along the way, Kamienski provides fascinating coverage of on the European adoption of hashish during Napoleon's invasion of Egypt, opium use during the American Civil War, amphetamines in the Third Reich, and the use of narcotics to control child soldiers in the rebel militias of contemporary Africa.

Godly Attitude, Worldly Latitude Robert A. Day Sr.. 2015-10-02 THE WISDOM OF GOD'S ATTITUDE CONFOUNDS THE WISDOM OF HUMANKINDS ATTITUDE! How can we describe an abstract term like the word attitude and prescribe it in such a concrete way? The Word of God is the avenue to achieve this objective! The author explains how attitude is more than just positive or negative, but rather situational instead. Various attitude principles are discussed with stories of the bible in reference to each type of attitude being addressed. In *Godly Attitude Worldly Latitude*, R. A. Day, Sr., expounds upon earthly definitions of attitude with heavenly inspirations that show how Christians should be imitators of their Lord and Savior. This book is a far different read than the standard social psychological or business model interpretations of what an attitude should be in life. It cries out the mantra of not looking upon our own things, but upon the things of others; and letting this mind (or attitude) be in us which is in Christ Jesus. A broadened horizon of the attitudes of longitude, latitude, altitude, and many more attitudes will be achieved victoriously through the living out of these newfound principles. This is made possible through all the interpersonal relationship challenges and storms that life tends to throw our way.

*Leading the Way to Victory* Mark C. Vlahos. 2023-01-10 Leading the Way to Victory is the official history of the 60th Troop Carrier Group, featuring unpublished first-person accounts by participating veterans and expertly written by retired USAF Colonel Mark C. Vlahos, combat veteran and former Vice Wing Commander of 314th Airlift Wing at the Little Rock Air Force Base. The December 7, 1941, surprise attack on Pearl Harbor thrust the United States into World War II. Just six months later in May 1942, flying new C-47 transport aircraft, the 60th Troop Carrier Group led the way as the first U.S. TCG to deploy to England and the European Theater of Operations in World War II. Leading the way to victory, the 60th TCG's first mission—dropping U. S. paratroopers outside of Oran, North Africa—was not only the first combat airborne mission in U.S. Army history, but also the longest airborne mission of the entire war. This drop spearheaded Operation TORCH, also known as the Invasion of North Africa, by taking key Axis airfields just inland from the amphibious landing zones. The 60th TCG went on to fly some of the first combat aeromedical evacuation missions and the first combat mission towing CG-4A "Waco" gliders during Operation HUSKY—the Invasion of Sicily. As the new airborne, air land, aeromedical evacuation, and glider missions matured in World War II, the 60th TCG continued to play a major role, paying in blood for valuable lessons learned in the school of hard

knocks. The group later flew dramatic missions into Yugoslavia, supporting Partisans as part of the secret war in the Balkans, an episode of World War II history still all but unknown today and dropped British paratroops in the airborne invasion of Greece. The Group was inactivated at the end of the war. Drawing on official United States Army Air Forces microfilm records, operational records in the National Archives, photographs from both collections, published historical materials, and many personal accounts, author Mark C. Vlahos' expertly written and highly readable volume is certain to become the standard history and go-to reference for the 60th TCG. This work offers scholars and lay readers alike an authoritative, informative, and engaging saga of the Group's battles, adversity, hardships, and triumphs from inception through the Allied victory in Europe.

**Space Capstone Publication Spacepower** Us Government United States Space Force.2020-08-11 This book, Space Capstone Publication Spacepower: Doctrine for Space Forces, is capstone doctrine for the United States Space Force and represents our Service's first articulation of an independent theory of spacepower. This publication answers why spacepower is vital for our Nation, how military spacepower is employed, who military space forces are, and what military space forces value. In short, this capstone document is the foundation of our professional body of knowledge as we forge an independent military Service committed to space operations. Like all doctrine, the SCP remains subject to the policies and strategies that govern its employment. Military spacepower has deterrent and coercive capacities - it provides independent options for National and Joint leadership but achieves its greatest potential when integrated with other forms of military power. As we grow spacepower theory and doctrine, we must do so in a way that fosters greater integration with the Air Force, Army, Navy, Marine Corps, and Coast Guard. It is only by achieving true integration and interdependence that we can hope to unlock spacepower's full potential.

**Flight Risk** Forrest L. Marion.2018-10-15 From the 1920s Afghanistan maintained a small air arm that depended heavily upon outside assistance. Starting in 2005, the United States led an air advisory campaign to rebuild the Afghan Air Force (AAF). In 2007 a formal joint/combined entity, led by a U.S. Air Force brigadier general, began air advisor work with Afghan airmen. Between 2007 and 2011, these efforts made modest progress in terms of infrastructures, personnel and aircraft accessions, and various training courses. But by 2010, advisors increasingly viewed AAF command and control (C2) as a problem area that required significant improvement if a professional air force was to be built. In the spring of 2011, major institutional changes to AAF C2 procedures were being introduced when nine U.S. air advisors were killed. The attack was the worst single-incident loss of U.S. Air Force personnel in a deployed location since 1996 and the worst insider-attack since 2001. From the day of that tragic event, the cultural chasm between Afghanistan and the West became more apparent. This dilemma continues with no end in sight to an air advisory mission of uncertain long-term value.

**U.S. Public Diplomacy Towards China** Di Wu.2022-06-29 This book aims to understand public diplomacy by examining its practice. In particular, it focuses on the implementation of educational and exchange programs by the US Departments of State and Defense toward China. Implementation is the focal point of this study and is utilized both as a practical process and a methodology. It refers to the process of translating a public diplomacy policy goal—the specific order given to a governmental institution in order to achieve a general foreign policy objective—into public diplomacy practices and impact. In addition, it refers to a research method that centers implementation and accepts the prerequisite of discretion from studies of policy implementation. This book maps out where and by whom implementation discretion is exercised in public diplomacy. It argues that public diplomacy is in the eye of the beholder, and that its meanings can vary significantly according to different actors.

**"Men Will Come": A History of the 314th Troop Carrier Group 1942-1945** Colonel Mark C. Vlahos.2019-10 Revised Second Edition. The roots of Tactical Airlift and Air Mobility Command Missions were founded in the Troop Carrier Groups of World War II. Meticulously researched and documented, Col Mark Vlahos' Men Will Come A History of the 314th Troop Carrier Group 1942 - 1945, will not only be the definitive history of this

unit, but fills a major void in USAAF History. Activated March 9, 1942, the 314th participated in every major Airborne Operation in the Mediterranean and European Theaters of Operations. Through the school of hard knocks, tough lessons were learned as the new Airborne, Air-land, and Glider missions matured in WWII. The 314th played a major role in this evolving process. As we celebrate the 75th Anniversary of D-Day, this book is a must read for anyone interested in WWII Airborne, Troop Carrier Operations and the contribution of our Greatest Generation. -Gen Carlton Everhart II, USAF-Ret, former Commander Air Mobility Command. 327 photos, maps, documents; index. NOTE: This revised second edition includes a small number of typographical corrections but most importantly a number of additions in Appendix 9, specifically a number of aircraft were inadvertently missing from Operation NEPTUNE #1 Mission Flight Crew Listing, June 5 - 6, 1944 and Operation NEPTUNE #2 Mission Flight Crew Listing, June 7, 1944. *The Educational Practices and Pathways of South African Students across Power-Marginalised Spaces* Aslam Fataar.2018-08-03 The lived experiences of students' educational practices are analysed and explained in terms of the book's plea for the recognition of the 'multi-dimensionality' of students as educational beings with unexplored cultural wealth and hidden capitals. The book presents an argument that student lives are entangled in complex social-spatial relations and processes that extend across family, neighbourhood and peer associations, which are largely misrecognised in educational policy and practice. The book is relevant to understanding the role of policy, curriculum and pedagogy in addressing the educational performance of working-class youth.

**Wisconsin's 37** Erin Miller,John B. Sharpless.2018-05-31 The signing of the Paris Peace Accords in 1973 signified the end of the Vietnam War. American personnel returned home and the 591 American prisoners held captive in North Vietnam were released. Still, 2,646 individuals did not come home. Thirty-seven of those missing in action were from Wisconsin. Their names appear on the largest object--a motorcycle (now part of the Vietnam Veterans Memorial Collection)--ever left at the Vietnam Veterans Memorial. Using the recollections of the soldiers' families, friends and fellow servicemen, the author tells the story of each man's life.

*Gauge Theories in Particle Physics, 40th Anniversary Edition: A Practical Introduction, Volume 2* Ian J R Aitchison,Anthony J.G. Hey.2024-06-19 The fifth edition of this well-established, highly regarded two-volume set continues to provide a fundamental introduction to advanced particle physics while incorporating substantial new experimental results, especially in the areas of Higgs and top sector physics, as well as CP violation and neutrino oscillations. It offers an accessible and practical introduction to the three gauge theories comprising the Standard Model of particle physics: quantum electrodynamics (QED), quantum chromodynamics (QCD), and the Glashow-Salam-Weinberg (GSW) electroweak theory. Volume 2 of this updated edition covers the two non-Abelian gauge theories of QCD and the GSW theory. A distinctive feature is the extended treatment of two crucial theoretical tools: spontaneous symmetry breaking and the renormalization group. The underlying physics of these is elucidated by parallel discussions of examples from condensed matter systems: superfluidity and superconductivity, and critical phenomena. This new edition includes updates to jet algorithms, lattice field theory, CP violation and the CKM matrix, and neutrino physics. New to the fifth edition: Tests of the Standard Model in the Higgs and top quark sectors The naturalness problem and responses to it going beyond the Standard Model The Standard Model as an effective field theory Each volume should serve as a valuable handbook for students and researchers in advanced particle physics looking for an accessible introduction to the Standard Model of particle physics.

*Medicinal Plants* Hao Da,Xiao Jie Gu,Pei Gen Xiao.2015-06-29 Medicinal Plants: Chemistry, Biology and Omics reviews the phytochemistry, chemotaxonomy, molecular biology, and phylogeny of selected medicinal plant tribes and genera, and their relevance to drug efficacy. Medicinal plants provide a myriad of pharmaceutically active components, which have been commonly used in traditional Chinese medicine and worldwide for thousands of years. Increasing interest in plant-based medicinal resources has led to additional discoveries of many novel compounds, in various angiosperm and gymnosperm species, and investigations on their chemotaxonomy, molecular phylogeny and pharmacology. Chapters in this book explore the interrelationship within traditional Chinese medicinal plant groups and between Chinese species and species outside of China. Chapters also discuss the incongruence between chemotaxonomy and molecular phylogeny, concluding with chapters on systems biology and "-omics technologies (genomics, transcriptomics, proteomics, and metabolomics), and how they will play an increasingly important role in future pharmaceutical research. Reviews best practice and essential developments in medicinal plant chemistry and biology Discusses the principles and applications of various techniques used to discover medicinal compounds Explores the analysis and classification of novel plant-based medicinal compounds Includes case studies on pharmaphylogeny Compares and integrates traditional knowledge and current perception of worldwide medicinal plants
