Assessment Tests & Practice Papers for self -evaluation in CBSE				
class 10th exam. At the secondary stage of English language				
learning the textual materials and other resources should				

represent a wide range of learning experience. Literature has always played a significant role in learning language. However it is felt that pupils should be apprised with contemporary issues, read authentic literature and experiences of people to reflect and build their personality traits. While there is a trend for inclusion of a wider range of contemporary and authentic texts, accessible and culturally appropriate pieces of literature should play a pivotal role at the secondary stage of education. The English class is meant for reading literature from different perspectives and to engage in activities for developing communicative competence, creativity and enrichment of language skills. It should not be seen as a place merely to read poems and stories in, but an area of activities to develop the learner's imagination as a major aim of language study, and to equip the learner with communicative skills to perform various language functions through speech and writing. This book is primarily designed for students preparing for various competitive examinations. It will also be helpful for those preparing for midterm exams in schools or universities. The aim of this book is twofold: first, to help the students preparing for competitive examinations, seeking admission to universities or schools, or prepare for job interviews. Second, it will also be helpful for those studying ENGLISH LANGUAGE & LITERATURE. This book contains more than 2903 questions from the core areas of ENGLISH LANGUAGE & LITERATURE. The questions are grouped chapter-wise. There are total 3 chapters, 28 sections and 2903+ MCQ with answers. This reference book provides a single source for multiple choice questions and answers in ENGLISH LANGUAGE & LITERATURE. It is intended for students as well as for developers and researchers in the field. This book is highly useful for faculties and students. One can use this book as a study guide, knowledge test questions bank, practice test kit, quiz book, trivia questions . . . etc. The strategy used in this book is the same as that which mothers and grandmothers have been using for ages to induce kids in the family to sip more soup (or some other

nutritious drink). The children are told that some cherries (their favourite noodles or cherries) are hidden somewhere in the bowl, and that serves as an incentive for drinking the soup. In joint families, by the time the children are old enough to know the trick played by their grandma, there is usually another group of kids ready to fall for it! They excite the kids, but the real nutrition lies not in the noodles but in the soup. The problems given in this book are like those noodles/cherries while solving all these problems are nutritious soup. Now it is your choice to drink the nutritious soups or not!!!.
