Chill Tidings Tanya Kirk.2021-08 'The tiles of the hall floor were as pretty as ever, as cold as ever, and bore, as always on Christmas Eve, the trickling pattern of dark blood.' The gifts are unwrapped, the feast has been consumed and the fire is well fed - but the ghosts are still hungry. Welcome to the second new collection of dark Christmas stories in the Tales of the Weird series, ushering in a fresh host of nightmarish phantoms and otherworldly intruders bent on joining or ruining the most wonderful time of the year. Featuring classic tales from Algernon Blackwood, Rosemary Timperley, Sheridan Le Fanu and Elinor Glyn alongside rare pieces from the sleeping periodicals and literary magazines of the Library collection, it's time to open the door and let the real festivities begin.

*Code-switching Between Structural and Sociolinguistic Perspectives* Gerald Stell,Kofi Yakpo.2015-02-17 The study of code-switching has been carried out from linguistic, psycholinguistic, and sociolinguistic perspectives, largely in isolation from each other. This volume attempts to unite these three research strands by placing at the centre of the enquiry the role played by social factors in the occurrence, forms, and outcomes of code-switching. The contributions in this volume are divided into three parts: "code-switching between cognition and socio-pragmatics", "multilingual interaction and identity", and "code-switching and social structure". The case studies represent contact settings on five continents and feature languages with diverse linguistic affiliations. They are predictive and descriptive in their research goals and rely on experimental or naturalistic data. But they share the common goal of seeking to explain how social structures, ideologies, and identity impact on the grammatical and conversational features of code-switching and language mixing, and on the emergence of mixed languages. Given its scope, this volume is a significant addition to the empirical and theoretical foundations of the study of code-switching. It is also of relevance to the general debate on the inter-relationships between language and society.

**Das House-Kapital** Volker Grossman,Thomas Steger.2017-03-30 There are, by now, several long term, time series data sets on important housing & macro variables, such as land prices, house prices, and the housing wealth-to-income ratio. However, an appropriate theory that can be employed to think about such data and associated research questions has been lacking. We present a new housing & macro model that is designed specifically to analyze the long term. As an illustrative application, we demonstrate that the calibrated model replicates, with remarkable accuracy, the historical evolution of housing wealth (relative to income) after World War II and suggests a further considerable increase in the future. The model also accounts for the close connection of house prices to land prices in the data. We also compare our framework to the canonical housing & macro model, typically employed to analyze business cycles, and highlight the main differences.

**XploRe® - Application Guide** W. Härdle,Z. Hlavka,S. Klinke.2000-11-16 This book offers a detailed application guide to XploRe - an interactive statistical computing environment. As a guide it contains case studies of real data analysis situations. It helps the beginner in statistical data analysis to learn how XploRe works in real life applications. Many examples from practice are discussed and analysed in full length. Great emphasis is put on a graphic based understanding of the data interrelations. The case studies include: Survival modelling with Cox's proportional hazard regression, Vitamin C data analysis with Quantile Regression, and many others.

Contact Linguistics Carol Myers-Scotton.2002 'Contact linguistics' provides an account of contact outcome theories, including the author's own. It has coursebook potential for advanced undergraduates and graduates.

At A Cost: The Real Effects of Thin Capitalization Rules Ruud A. de Mooij,Ms.Li Liu.2021-02-05 Thin capitalization rules (TCRs) aim to mitigate profit shifting by multinational corporations (MNCs) but, by raising the cost of capital for affected affiliates, can also negatively affect real investment. Exploiting unique panel data on multinational companies in 34 countries during 2006-2014, we estimate that the size of this adverse investment effect can be large, and dependent on the statutory corporate tax rate and the tightness of the safe-haven ratio. Negative investment effects are more pronounced for highly-levered firms for which TCRs are more likely to be binding.

**Dynamic Econometrics** David F. Hendry.1995 The main problem in econometric modelling of time series is discovering sustainable and interpretable relationships between observed economic variables. The primary aim of this book is to develop an operational econometric approach which allows constructive modelling. Professor Hendry deals with methodological issues (model discovery, data mining, and progressive research strategies); with major tools for modelling (recursive methods, encompassing, super exogeneity, invariance tests); and with practical problems (collinearity, heteroscedasticity, and measurement errors). He also includes an extensive study of US money demand. The book is self-contained, with the technical background covered in appendices. It is thus suitable for first year graduate students, and includes solved examples and exercises to facilitate its use in teaching. About the Series Advanced Texts in Econometrics is a distinguished and rapidly expanding series in which leading econometricians assess recent developments in such areas as stochastic probability, panel and time series data analysis, modeling, and cointegration. In both hardback and affordable paperback, each volume explains the nature and applicability of a topic in greater depth than possible in introductory textbooks or single journal articles. Each definitive work is formatted to be as accessible and convenient for those who are not familiar with the detailed primary literature.

*Bilingual Speech* Pieter Muysken,Professor of Linguistics Pieter Muysken.2000-12-14 This book provides an in depth analysis of the different ways in which bilingual speakers switch from one language to another in the course of conversation. This phenomenon, known as code-mixing or code-switching, takes many forms. Pieter Muysken adopts a comparative approach to distinguish between the different types of code-mixing, drawing on a wealth of data from bilingual settings throughout the world. His study identifies three fundamental and distinct patterns of mixing - 'insertion', 'alternation' and 'congruent lexicalization' - and sets out to discover whether the choice of a particular mixing strategy depends on the contrasting grammatical properties of the languages involved, the degree of bilingual competence of the speaker or various social factors. The book synthesizes a vast array of recent research in a rapidly growing field of study which has much to reveal about the structure and function of language.

**Quantile Regression** Roger Koenker.2005-05-05 Quantile regression is gradually emerging as a unified statistical methodology for estimating models of conditional quantile functions. By complementing the exclusive focus of classical least squares regression on the conditional mean, quantile regression offers a systematic strategy for examining how covariates influence the location, scale and shape of the entire response distribution. This monograph is the first comprehensive treatment of the subject, encompassing models that are linear and nonlinear, parametric and nonparametric. The author has devoted more than 25 years of research to this topic. The methods in the analysis are illustrated with a variety of applications from economics, biology, ecology and finance. The treatment will find its core audiences in econometrics, statistics, and applied mathematics in addition to the disciplines cited above.

**Atlas of Minimally Invasive Surgery for Lung and Esophageal Cancer** Jun Wang,Mark K. Ferguson.2017-05-15 This Atlas presents a state-of-the-art review of VATS and robotic approaches to managing lung and esophageal cancers. It discusses cancer staging, physiological evaluation of patients, and patient selection for minimally invasive surgery. The atlas offers detailed descriptions of individual operations accompanied by anatomic drawings, intraoperative images, and 3-dimensional anatomic reconstructions. Written by recognized experts in the field, it provides readers with an unparalleled resource for advancing their skills in managing these cancers. It is a valuable reference work for thoracic surgeons in training as well as in practice who want to pursue minimally invasive surgery. It is unique in offering fully illustrated, step-by-step descriptions of the operative procedures.

*The Role of Productivity, Transportation Costs, and Barriers to Intersectoral Mobility in Structural Transformation* Cem Karayalcin,Mihaela Pinte.2015-04-30 The process of economic development is characterized by

substantial reallocations of resources across sectors. In this paper, we construct a multi-sector model in which there are barriers to the movement of labor from low-productivity traditional agriculture to modern sectors. With the barrier in place, we show that improvements in productivity in modern sectors (including agriculture) or reductions in transportation costs may lead to a rise in agricultural employment and through terms-of-trade effects may harm subsistence farmers if the traditional subsistence sector is larger than a critical level. This suggests that policy advice based on the earlier literature needs to be revised. Reducing barriers to mobility (through reductions in the cost of skill acquisition and institutional changes) and improving the productivity of subsistence farmers needs to precede policies designed to increase the productivity of modern sectors or decrease transportation costs.

**Dry Eye Disease** Penny A. Asbell, Michael A. Lemp. 2011-01-01 Techniques from the experts for managing the most common problem in eye patients Here is the ultimate guide to managing the most frequently encountered problem in the eye patient--dry eye disease. *Dry Eye Disease: The Clinician's Guide to Management* provides the latest diagnostic techniques, new approaches for classifying patients, and state-of-the-art, evidence-based medical and surgical treatments. The book opens with a review of the epidemiology and the multifactorial etiologies of dry eye disease. The authors guide the reader through taking a thorough patient history, conducting the diagnostic examination, and using clinical tests to make a confident evaluation of the severity of the disease. In their discussion of both medical and surgical techniques for management, the authors describe common treatments, such as punctal plugs, lid treatment, artificial tears, as well as innovative treatments including autologous serum drops, stem cell transplantation, and more. Highlights: Contributions from such internationally known experts as Shigeru Kinoshita, M. Reza Dana, Maurizio Rolando, Kazuo Tsubota, Kelly Nichols, Janine Smith, J. Daniel Nelson, Jay S. Pepose, Mark J. Mannis, Friedrich E. Kruse, Teruo Nishida, and others Thorough discussion of new and emerging diagnostic tests, including tear osmolarity, impression cytology, corneal permeability, and visual function, enables readers to expand and sharpen their techniques A bullet-point list of key points at the beginning of each chapter is ideal for rapidly reviewing important concepts Numerous tables organize the results of clinical surveys of common symptoms and factors associated with dry eye disease An extensive list of references, as well as a chapter covering online resources, helps the reader keep abreast of the newest research This is a timely reference for all ophthalmologists, optometrists, and trainees in these specialties. It is essential reading for practitioners treating contact lens wearers and refractive surgery patients, as well as patients with glaucoma and age-related macular degeneration.

*Jade [Eminence Shifters 6]* Ashley Malkin. 2016-04-15 [Menage Amour: Erotic Paranormal Menage Romance, M/F/M/M/M, shape-shifters, HEA] Jade Liang discovers monsters are real when a crazed wolf shifter decides she belongs to him and his pack. She is held captive and tortured before a reluctant good samaritan frees her. Jade escapes, but soon succumbs to her injuries. Cougar shifters Asher, Barrett, Wes and Troy Pollock have returned home to Eminence to train as soldiers for their pride. Their renewed bond as brothers is further strengthened when they discover they share a mate, the beautiful, but unconscious, Jade Liang. Rage at their mate's abuse turns to white-hot fury when it's revealed she suffered at the hands of a shifter. They must then find away to earn Jade's trust as they reveal they are shifters, too. Whilst earning her trust they lose their hearts to the lovely Jade. She now holds their fate in her small hands, for if they fail to keep her from the wolf determined to reclaim her, all their lives will be forfeit. \*\* A Siren Erotic Romance
