U.S. Public Diplomacy Towards China Di Wu.2022-06-29 This book aims to understand public diplomacy by examining its practice. In particular, it focuses on the implementation of educational and exchange programs by the US Departments of State and Defense toward China. Implementation is the focal point of this study and is utilized both as a practical process and a methodology. It refers to the process of translating a public diplomacy policy goal—the specific order given to a governmental institution in order to achieve a general foreign policy objective—into public diplomacy practices and impact. In addition, it refers to a research method that centers implementation and accepts the prerequisite of discretion from studies of policy implementation. This book maps out where and by whom implementation discretion is exercised in public diplomacy. It argues that public diplomacy is in the eye of the beholder, and that its meanings can vary significantly according to different actors.

Taxaceae and Cephalotaxaceae Da-Cheng Hao.2021-01-05

Taxaceae and Cephalotaxaceae: Biodiversity, Chemodiversity, and Pharmacotherapy accounts for the biodiversity and chemodiversity of these medicinal plants, examining and synthesizing existing research into their biology, chemistry and pharmacotherapy. The title examines how pharmacophylogeny allows sustainable conservation and exploitation, presents how these plants work from the chemical level upward, and examines associated microbe compounds. Chapters present a summary of biological and biochemical research of Taxaceae plants, progress in mining their chemodiversity, mining pharmacotherapy utility from their chemodiversity and biodiversity, drug metabolism and pharmacokinetic diversity of their medicinal compounds, mining pharmacotherapy utility from associated microbes, and more. Sections cover the biodiversity, chemodiversity and pharmacotherapy of Cephalotaxus medicinal plants, Amentotaxus, Pseudotaxus and Torreya medicinal plants. The book envisages that multiple omics platforms and advanced systems biology will allow further exploration of Taxaceae and Cephalotaxaceae, thus streamlining the future drug supply chain. Covers the biodiversity and chemodiversity of Taxaceae/Cephalotaxus medicinal plants Considers how a pharmacophylogeny framework can benefit conservation and sustainable exploitation of these plants Presents how Taxaceae/Cephalotaxus work from the chemical level upward“/li> Details the polypharmacology of these plants and associated microbe compounds in relation to pharmaceutical design and development Brings the reader up-to-date on the biology, chemistry and pharmacotherapy of Taxaceae/Cephalotaxus medicinal plants

Publication *Spacepower: Doctrine for Space Forces*, is capstone doctrine for the United States Space Force and represents our Service's first articulation of an independent theory of spacepower. This publication answers why spacepower is vital for our Nation, how military spacepower is employed, who military space forces are, and what military space forces value. In short, this capstone document is the foundation of our professional body of knowledge as we forge an independent military Service committed to space operations. Like all doctrine, the SCP remains subject to the policies and strategies that govern its employment. Military spacepower has deterrent and coercive capacities - it provides independent options for National and Joint leadership but achieves its greatest potential when integrated with other forms of military power. As we grow spacepower theory and doctrine, we must do so in a way that fosters greater integration with the Air Force, Army, Navy, Marine Corps, and Coast Guard. It is only by achieving true integration and interdependence that we can hope to unlock spacepower's full potential.

The Educational Practices and Pathways of South African Students across Power-Marginalised Spaces Aslam

Fataar.2018-08-03 The lived experiences of students? educational practices are analysed and explained in terms of the book?s plea for the recognition of the ?multi-dimensionality? of students as educational beings with unexplored cultural wealth and hidden capitals. The book presents an argument that student lives are entangled in complex social-spatial relations and processes that extend across family, neighbourhood and peer associations, which are largely misrecognised in educational policy and practice. The book is relevant to understanding the role of policy, curriculum and pedagogy in addressing the educational performance of working-class youth.

Relationships with Families in Early Childhood Education and Care Joanne Lehrer,Fay Hadley,Katrien Van Laere,Elizabeth Rouse.2022-07-13 Relationships with Families in Early Childhood Education and Care radically challenges the role assigned to parents in neoliberal discussions of early childhood education and care, and presents new ways of thinking about relationships with families. With contributions from international early childhood scholars and practitioners, this book includes outlooks of practitioners, families and children, particularly about the meanings they assign to relationships. Bringing together key understandings about how parent-partnerships can be understood, this book provides innovative examples of how to enact democratic partnerships with parents in diverse contexts. Relationships with Families in Early Childhood Education and Care is an ideal text for ECEC practitioners and policy makers, trainers, graduate students and researchers.

Shooting Up Lukasz Kamienski.2016-02-10 Shooting Up: A Short History of Drugs and War examines how intoxicants have been put to the service of states, empires and their armies throughout history. Since the beginning of organized combat, armed forces have prescribed drugs to their members for two general purposes: to enhance performance during combat and to counter the trauma of killing and witnessing violence after it is over. Stimulants (e.g. alcohol, cocaine, and amphetamines) have been used to temporarily create better soldiers by that improving stamina, overcoming sleeplessness, eliminating fatigue, and increasing fighting spirit. Downers (e.g. alcohol, opiates, morphine, heroin, marijuana, barbiturates) have also been useful in dealing with the soldier's greatest enemy - shattered nerves. Kamienski's focuses on drugs prescribed by military authorities, but also documents the widespread unauthorised consumption by soldiers themselves. Combatants have always treated with various drugs and alcohol, mainly for recreational use and as a reward to themselves for enduring the constant tension of preparing for. Although not officially approved, such self-medication is often been quietly tolerated by commanders in so far as it did not affect combat effectiveness. This volume spans the history of combat from the use of opium, coca, and mushrooms in pre-modern warfare to the efforts of modern militaries, during the Cold War in particular, to design psychochemical offensive weapons that can be used to incapacitate rather than to kill the enemy. Along the way, Kamienski provides fascinating coverage of on the European adoption of hashish during Napoleon's invasion of Egypt, opium use during the American Civil War, amphetamines in the Third Reich, and the use of narcotics to control child soldiers in the rebel militias of contemporary Africa.

Leading the Way to Victory Mark C. Vlahos.2023-01-10 *Leading the Way to Victory* is the official history of the 60th Troop Carrier Group, featuring unpublished first-person accounts by participating veterans and expertly written by retired USAF Colonel Mark C. Vlahos, combat veteran and former Vice Wing Commander of 314th Airlift Wing at the Little Rock Air Force Base. The December 7, 1941, surprise attack on Pearl Harbor thrust the United States into World War II. Just six months later in May 1942, flying new C-47 transport aircraft, the 60th Troop Carrier Group led the way as the first U.S. TCG to deploy to England and the European Theater of Operations in World War II. *Leading the way to victory*, the 60th TCG's first mission—dropping U. S. paratroopers outside of Oran, North Africa—was not only the first combat airborne mission in U.S. Army history, but also the longest airborne mission of the entire war. This drop spearheaded Operation TORCH, also known as the Invasion of North Africa, by taking key Axis airfields just inland from the amphibious landing zones. The 60th TCG went on to fly some of the first combat aeromedical evacuation missions and the first combat mission towing CG-4A “Waco” gliders during

Operation HUSKY—the Invasion of Sicily. As the new airborne, air land, aeromedical evacuation, and glider missions matured in World War II, the 60th TCG continued to play a major role, paying in blood for valuable lessons learned in the school of hard knocks. The group later flew dramatic missions into Yugoslavia, supporting Partisans as part of the secret war in the Balkans, an episode of World War II history still all but unknown today and dropped British paratroops in the airborne invasion of Greece. The Group was inactivated at the end of the war. Drawing on official United States Army Air Forces microfilm records, operational records in the National Archives, photographs from both collections, published historical materials, and many personal accounts, author Mark C. Vlahos' expertly written and highly readable volume is certain to become the standard history and go-to reference for the 60th TCG. This work offers scholars and lay readers alike an authoritative, informative, and engaging saga of the Group's battles, adversity, hardships, and triumphs from inception through the Allied victory in Europe.

"Men Will Come": A History of the 314th Troop Carrier Group

1942-1945 Colonel Mark C. Vlahos. 2019-10 Revised Second

Edition. The roots of Tactical Airlift and Air Mobility Command Missions were founded in the Troop Carrier Groups of World War II. Meticulously researched and documented, Col Mark Vlahos' Men Will Come A History of the 314th Troop Carrier Group 1942 - 1945, will not only be the definitive history of this unit, but fills a major void in USAAF History. Activated March 9, 1942, the 314th participated in every major Airborne Operation in the Mediterranean and European Theaters of Operations. Through the school of hard knocks, tough lessons were learned as the new Airborne, Air-land, and Glider missions matured in WWII. The 314th played a major role in this evolving process. As we celebrate the 75th Anniversary of D-Day, this book is a must read for anyone interested in WWII Airborne, Troop Carrier Operations and the contribution of our Greatest Generation. -Gen Carlton

Tobin.2018-02-26 This book informs and supports medical educators and clinic leaders regarding the key clinical and administrative components necessary to run an academic medical practice. From a group of expert faculty from the Society of General Internal Medicine (SGIM) with years of experience in managing academic medical practices, this manual offers comprehensive guidance to the clinic director regarding critical factors involved with running an academic medical practice including, but not limited to: compliance with Accreditation Council for Graduate Medical Education (ACGME) requirements, clinic orientation and curricula implementation, clinic workflow challenges, billing, coding, and the Primary Care Exception Rule, productivity metrics and quality indicators, evaluation and feedback for trainees, faculty, and clinic staff, implementation of a Patient Centered Medical Home (PCMH), development of controlled substance prescribing policies, medical student involvement in resident clinics, and Veteran Affairs practices and non-traditional care settings. The scope of this book is sufficiently broad to be comprehensive and practical while still anticipating the further evolution of the academic medical practice in the years to come. Each chapter focuses on a particular aspect of clinic leadership and will offer real-world examples and management “pearls” for the clinic director. Chapters highlight

Flight Risk Forrest L. Marion.2018-10-15 From the 1920s Afghanistan maintained a small air arm that depended heavily upon outside assistance. Starting in 2005, the United States led an air advisory campaign to rebuild the Afghan Air Force (AAF). In 2007 a formal joint/combined entity, led by a U.S. Air Force brigadier general, began air advisor work with Afghan airmen. Between 2007 and 2011, these efforts made modest progress in terms of infrastructures, personnel and aircraft accessions, and various training courses. But by 2010, advisors increasingly viewed AAF command and control (C2) as a problem area that required significant improvement if a professional air force was to be built. In the spring of 2011, major institutional changes to AAF C2 procedures were being introduced when nine U.S. air advisors were killed. The attack was the worst single-incident loss of U.S. Air Force personnel in a deployed location since 1996 and the worst insider-attack since 2001. From the day of that tragic event, the cultural chasm between Afghanistan and the West became more apparent. This dilemma continues with no end in sight to an air advisory mission of uncertain long-term value. *National Defense Authorization Act for Fiscal Year 2014* United States. Congress. House. Godly Attitude, Worldly Latitude Robert A. Day Sr..2015-10-02
THE WISDOM OF GOD'S ATTITUDE CONFOUNDS THE
WISDOM OF HUMANKINDS ATTITUDE! How can we describe an
abstract term like the word attitude and prescribe it in such a
concrete way? The Word of God is the avenue to achieve this
objective! The author explains how attitude is more than just
positive or negative, but rather situational instead. Various
attitude principles are discussed with stories of the bible in
reference to each type of attitude being addressed. In *Godly
Attitude Worldly Latitude*, R. A. Day, Sr., expounds upon earthly
definitions of attitude with heavenly inspirations that show how
Christians should be imitators of their Lord and Savior. This book
is a far different read than the standard social psychological or
business model interpretations of what an attitude should be in
life. It cries out the mantra of not looking upon our own things,
but upon the things of others; and letting this mind (or attitude)
be in us which is in Christ Jesus. A broadened horizon of the
attitudes of longitude, latitude, altitude, and many more attitudes
will be achieved victoriously through the living out of these
newfound principles. This is made possible through all the
interpersonal relationship challenges and storms that life tends to
throw our way.

introduction to advanced particle physics while incorporating substantial new experimental results, especially in the areas of Higgs and top sector physics, as well as CP violation and neutrino oscillations. It offers an accessible and practical introduction to the three gauge theories comprising the Standard Model of particle physics: quantum electrodynamics (QED), quantum chromodynamics (QCD), and the Glashow-Salam-Weinberg (GSW) electroweak theory. Volume 2 of this updated edition covers the two non-Abelian gauge theories of QCD and the GSW theory. A distinctive feature is the extended treatment of two crucial theoretical tools: spontaneous symmetry breaking and the renormalization group. The underlying physics of these is elucidated by parallel discussions of examples from condensed matter systems: superfluidity and superconductivity, and critical phenomena. This new edition includes updates to jet algorithms, lattice field theory, CP violation and the CKM matrix, and neutrino physics. New to the fifth edition: Tests of the Standard Model in the Higgs and top quark sectors The naturalness problem and responses to it going beyond the Standard Model The Standard Model as an effective field theory Each volume should serve as a valuable handbook for students and researchers in advanced particle physics looking for an accessible introduction to the Standard Model of particle physics.
