Towards a New Paradigm for English Language Teaching Hajime

Terauchi,Judy Noguchi,Akira Tajino.2019-10-30 This book proposes a new paradigm for English language teaching based on concepts from English for Specific Purposes (ESP) research and applications as well as from growing evidence relating pattern recognition to language learning ability. The contributors to the volume argue that learners should not try to become proficient all-around users of 'idealistic native-like' English, but instead should be realistic about what they need to acquire and how to go about achieving their specific goals. The book discusses the present situation by describing the status quo of English language

education in Japan, taking into consideration recent trends of CLIL (content and language integrated learning), EMI (English medium instruction), and TBLT (task-based language teaching) as well as the work done on the Common European Framework of Reference for Languages (CEFR). It introduces new movements in ESP in Japan and in other Asian regions, covering topics ranging from genre analysis to corpus linguistics, and presents application examples of ESP practice in a range of educational situations in Japan from the graduate school level to elementary and middle school contexts. It also offers readers application examples of ESP practice in a range of business settings and expands the discussion to the global sphere where EAP and ESP are gaining importance as the number of ELF (English as a Lingua Franca) speakers continue to increase. The book will be of great interest to academics, researchers, and post-graduate students working in the fields of EFL and ESL.

Handbook of Research in Second Language Teaching and Learning Eli Hinkel.2016-11-18 Volume III of the Handbook of Research in Second Language Teaching and Learning, like Volumes I and II, is a comprehensive, state-of-the-art overview of current research into social contexts of second language (L2)/foreign language (FL) teaching and learning; language policy; curriculum; types of instruction; incremental language skills such as listening, speaking, reading, writing, vocabulary, and grammar; international communication; pragmatics; assessment and testing. It differs from earlier volumes in its main purpose—to provide a more in-depth discussion and detailed focus on the development of the essential language skills required for any type of communication: speaking, listening, reading, vocabulary, grammar, and writing. Volume III preserves continuity with previous volumes in its coverage of all the classical areas of research in L2/FL teaching and learning and applied linguistics, but rather than offering a historical review of

disciplinary traditions, it explores innovations and new directions of research, acknowledges the enormous complexity of teaching and learning the essential language abilities, and offers a diversity of perspectives. Chapter authors are all leading authorities in their disciplinary areas. What's new in Volume III? Updates the prominent areas of research, including the sub-disciplines addressed in Volumes I and II, and represents the disciplinary mainstays. Considers and discusses perspectives held by different schools of thought on the what, the how, and the why of teaching foundational language skills, including theories, pedagogical principles, and their implementation in practice. Captures new and ongoing developments and trends in the key areas of L2/FL teaching and learning, and innovative research topics that have gained substantial recognition in current publications, including the role of corpora, technology, and digital literacy in L2/FL teaching and learning. Examines new trends in language pedagogy and research, such as an increased societal emphasis on teaching academic language for schooling, somewhat contradictory definitions of literacy, and the growing needs for instruction in intercultural communication.

[The Sociocultural Activity of High Stakes Standardised Language Testing](#) Dawn Karen Booth.2018-02-26 This book explores the influence of high stakes standardised testing within the context of South Korea. South Korea is regarded as a shining example of success in educational achievement and, as this book reveals, pressurised standardised testing has been a major contributing factor to its success. This unique country provides an excellent setting from which to explore the powerful relationship that exists between testing and learning and can advance our understanding of which factors and test conditions will positively and negatively influence learning. This book follows the test activity of a group of Korean university students preparing for the TOEIC (Test of English for International Communication) and posits a revised model of the influence of testing on learning. It calls for a more socially situated view of tests and test-takers considered in relation to the sociocultural, historical, political and economic contexts in which they are embedded.

Challenges in Language Testing Around the World Betty

Lanteigne,Christine Coombe,James Dean Brown.2021-02-17 This book combines insights from language assessment literacy and critical language testing through critical analyses and research about challenges in language assessment around the world. It investigates problematic practices in language testing which are relevant to language test users such as language program directors, testing centers, and language teachers, as well as teachers-in-training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation/use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program-level language tests and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real-world language use.

The Handbook of Technology and Second Language

Teaching and Learning Carol A. Chapelle, Shannon

Sauro.2019-12-05 The Handbook of Technology and Second Language Teaching and Learning presents a comprehensive exploration of the impact of technology on the field of second language learning. The rapidly evolving language-technology interface has propelled dramatic changes in, and increased opportunities for, second language teaching and learning. Its influence has been felt no less keenly in the approaches and methods of assessing learners' language and researching language teaching and learning. Contributions from a team of international scholars make up the Handbook consisting of four parts: language teaching and learning through technology; the technology-pedagogy interface; technology for L2 assessment; and research and development of technology for language learning. It considers how technology assists in all areas of language development, the emergence of pedagogy at the intersection of language and technology, technology in language assessment, and major research issues in research and development of technologies for language learning. It covers all aspects of language including grammar, vocabulary, reading, writing, listening, speaking, pragmatics, and intercultural learning, as well as new pedagogical and assessment approaches, and new ways of conceiving and conducting research and

toward the advancement of human assessment by scientists from one of the world's leading research institutions, Educational Testing Service. Many of the developments presented have become de-facto standards in educational and psychological measurement, including in item response theory (IRT), linking and equating, differential item functioning (DIF), and educational surveys like the National Assessment of Educational Progress (NAEP), the Programme of international Student Assessment (PISA), the Progress of International Reading Literacy Study (PIRLS) and the Trends in Mathematics and Science Study (TIMSS). In addition to its comprehensive coverage of contributions to the theory and methodology of educational and psychological measurement and statistics, the book gives significant attention to ETS work in cognitive, personality, developmental, and social psychology, and to education policy analysis and program evaluation. The chapter authors are long-standing experts who provide broad coverage and thoughtful insights that build upon decades of experience in research and best practices for measurement, evaluation, scientific psychology, and education policy analysis.
