These new 'digital natives' have developed cognitive thinking patterns that are different from those of earlier generations of students. It's important that educators recognize these differences in students, and that they also account for students with differing learning styles. Students today rely on technology as an important tool in their educational and personal lives. M: Information Systems accounts for these differences in students today and appeals more effectively to digital natives. An emphasis is placed on the visual and technology component of the product offering (Connect Interactives), while the text remains a (important) supporting tool for their learning in the course. Students today are used to active learning experiences which is what M: Information Systems provides. The book in combination with the Interactives in Connect MIS provide students with a rich, interactive experience that enhances the text content, and keeps them actively engaged in the course content. Students today are also used to feedback and 'payoff' - Connect MIS provides these interactive rewards for learning the course content. For instructors opting not to adopt Connect MIS, M: Information Systems will still appeal to this generation of students looking for a quick read and insight that is also entertaining.
