*World Development Report 1978* .1978 This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

### Phytonutritional Improvement of Crops Nouredine

Benkeblia.2017-10-02 An in-depth treatment of cutting-edge work being done internationally to develop new techniques in crop nutritional quality improvement. Phytonutritional Improvement of Crops explores recent advances in biotechnological methods for the nutritional enrichment of food crops. Featuring contributions from an international group of experts in the field, it provides cutting-edge information on techniques of immense importance to academic, professional and commercial operations. World population is now estimated to be 7.5 billion people, with an annual growth rate of nearly 1.5%. Clearly, the need to enhance not only the quantity of food produced but its quality has never been greater, especially among less developed nations. Genetic manipulation offers the best prospect for achieving that goal. As many fruit crops provide proven health benefits, research efforts need to be focused on improving the nutritional qualities of fruits and vegetables through increased synthesis of lycopene and beta carotene, anthocyanins and some phenolics known to be strong antioxidants. Despite tremendous growth in the area occurring over the past several decades, the work has only just begun. This book represents an effort to address the urgent need to promote those efforts and to mobilise the tools of biotechnical and genetic engineering of the major food crops. Topics covered include: New applications of RNA-interference and virus induced gene silencing (VIGS) for nutritional genomics in crop plants. Biotechnological techniques for enhancing carotenoid in crops and their implications for both human health and sustainable development. Progress being made in the enrichment and metabolic profiling of diverse carotenoids in a range of fruit crops, including tomatoes,

sweet potatoes and tropical fruits Biotechnologies for boosting the phytonutritional values of key crops, including grapes and sweet potatoes Recent progress in the development of transgenic rice engineered to massively accumulate flavonoids in-seed Phytonutritional Improvement of Crops is an important text/reference that belongs in all universities and research establishments where agriculture, horticulture, biological sciences, and food science and technology are studied, taught and applied.

*World Development Report 2020* World Bank.2019-11-19 Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. *World Development Report 2020: Trading for Development in the Age of Global Value Chains* examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

Nutrient Requirements of Beef Cattle National Academies of Sciences, Engineering, and Medicine,Division on Earth and Life Studies,Board on Agriculture and Natural Resources,Committee on Nutrient Requirements of Beef Cattle.2016-06-16 Since 1944, the National Research Council (NRC) has published seven editions of the Nutrient Requirements of Beef Cattle. This reference has guided nutritionists and other professionals in academia and the cattle and feed industries in developing and implementing nutritional and feeding programs for beef cattle. The cattle industry has undergone considerable changes since the seventh revised edition was published in 2000 and some of the requirements and recommendations set forth at that time are no longer relevant or appropriate. The eighth revised edition of the Nutrient Requirements of Beef Cattle builds on the previous editions. A great deal of new research has been published during

the past 14 years and there is a large amount of new information for many nutrients. In addition to a thorough and current evaluation of the literature on the energy and nutrient requirements of beef in all stages of life, this volume includes new information about phosphorus and sulfur contents; a review of nutritional and feeding strategies to minimize nutrient losses in manure and reduce greenhouse gas production; a discussion of the effect of feeding on the nutritional quality and food safety of beef; new information about nutrient metabolism and utilization; new information on feed additives that alter rumen metabolism and postabsorptive metabolism; and future areas of needed research. The tables of feed ingredient composition are significantly updated. **Nutrient Requirements of Beef Cattle** represents a comprehensive review of the most recent information available on beef cattle nutrition and ingredient composition that will allow efficient, profitable, and environmentally conscious beef production.

Vernon.2018-09-25 It's Little Red Riding Hood as you've never seen her before in this funny, feminist spin on the fairy tale, from award-winning author Ursula Vernon Most monsters know better than to mess with Princess Harriet Hamsterbone. She's a fearsome warrior, an accomplished jousting, and is so convincing that she once converted a beastly OGRECAT to vegetarianism. So why would a pack of weasel-wolf monsters come to her for help? Well, there's something downright spooky going on in the forest where they live, and it all centers around a mysterious girl in a red cape. No one knows better than Harriet that little girls aren't always sweet. Luckily there's no problem too big or bad for this princess to solve. In this sixth installment of her whip-smart Hamster Princess series, Ursula Vernon once again upends fairy tale tropes and subverts gender stereotypes to brilliant effect. This is a Once Upon a Time like you've never seen before.

**Life After Logging** E. Meijaard,Douglas Sheil,Robert Nasi,David Augeri,Barry Rosenbaum,Djoko Iskandar,Titiek Setyawati,Martjan

Lammertink,Ike Rachmatika,Anna Wong,Tonny Soehartono,Scott Stanley,Timothy O'Brien.2005-01-01 This book presents a technical review of ecological and life history information on a range of Bornean wildlife species, aimed at identifying what makes these species sensitive to timber harvesting practices and associated impacts. It addresses three audiences: 1) those involved in assessing and regulating timber harvesting activities in Southeast Asia, 2) those involved in trying to achieve conservation goals in the region, and 3) those undertaking research to improve multipurpose forest management. This book shows that forest management can be improved in many simple ways to allow timber extraction and wildlife conservation to be more compatible than under current practices. The recommendations can also be valuable to the many governmental and non-governmental organisations promoting sustainable forest management and eco-labelling. Finally, it identifies a number of shortcomings and gaps in knowledge, which the hope can interest the scientific community and promote further research. This review is, an important scientific step toward understanding and improving sustainable forestry practices for long-term biodiversity conservation. Even in the short term, however, significant improvements can be made to improve both conservation and the efficiency of forest management, and there is no need to delay action due to a perceived lack of information. In the longer term it is expected that the recommendations from this review will be implemented, and that further research will continue to help foster an acceptable balance among the choices needed to maintain healthy wildlife populations and biodiversity in a productive forest estate.

*Analisis Pengembangan Jerami Padi Sebagai Pakan Ternak* Dr. Ir.

Jamila Mustabi, S.Pt., M.Si.2023-08-29

Buku ini bertujuan untuk mengetahui pemanfaatan jamur pelapuk putih untuk meningkatkan kualitas jerami padi sebagai pakan ruminansia. Buku dibagi atas tiga tahap yaitu tahap I berupa eksplorasi, isolasi, pemurnian, seleksi berdasarkan kadar lignin, selulosa dan hemiselulosa serta mengidentifikasi jamur. Tahap II menguji kualitas dan pencernaan jerami padi hasil fermentasi jamur pelapuk putih pada tiga level (5, 7,5, 10%) dengan masa inkubasi 15 dan 30 hari diolah berdasarkan rancangan acak lengkap dan uji kontras. Tahap III melakukan pengujian secara in vivo pada 4 ransum perlakuan yaitu R1=100% rumput gajah, R2=70% rumput gajah+30% jerami padi fermentasi, R3=30% rumput gajah+70% jerami padi fermentasi dan R4=100% jerami padi fermentasi. Tahap ini menggunakan 12 ekor kambing untuk melihat pengaruhnya terhadap konsumsi, pencernaan dan efisiensi penggunaan ransum perlakuan. Hasil pengujian tahap I diperoleh tiga isolat yang aktif dalam mendegradasi lignin dan kurang kemampuannya dalam mendegradasi selulosa dan hemiselulosa yaitu *Coprinus comatus*, *Coriolopsis polyzona* dan *Lentinus torulosus*. Pada tahap II diperoleh hasil bahwa perlakuan yang menggunakan isolat *C.comatus* level 10% dengan masa inkubasi

30 hari adalah yang terbaik dalam meningkatkan kualitas dan pencernaan secara in vitro pada jerami padi. Pada tahap III nilai efisiensi penggunaan ransum terbaik dalam mensubstitusi rumput gajah pada level 30%.

a complicated process, especially with modern, high yielding

cows. Written in a practical and user-friendly style, this book aims

to help the reader understand cattle reproduction by explaining

the underlying physiology of the reproductive process and the

role and importance of pharmacology and technology, and

showing how management techniques can improve reproductive

efficiency. This edition includes: Recent research findings on the

physiology of the oestrous cycle and its control; New techniques

for monitoring and manipulating reproduction, including

pregnancy diagnosis and embryo transfer; Advice on identifying

common infertility problems and how to prevent and treat them.

*Reproduction Cattle 3e* is essential reading for veterinary and

agricultural students, as well as veterinarians and farmers
