Seriality and Texts for Young People M. Reimer,N. Ali,D. England,M. Dennis Unrau,Melanie Dennis Unrau.2014-12-23 Seriality and Texts for Young People is a collection of thirteen scholarly essays about series and serial texts directed to children and youth, each of which begins from the premise that a basic principle of seriality is repetition.

Modelling and Applications in Mathematics Education Peter L. Galbraith,Hans-Wolfgang Henn,Mogens Niss.2007-12-05 The book aims at showing the state-of-the-art in the field of modeling and applications in mathematics education. This is the first volume to do this. The book deals with the question of how key competencies of applications and modeling at the heart of mathematical literacy may be developed; with the roles that applications and modeling may play in mathematics teaching, making mathematics more relevant for students.

German Technical Dictionary ROUTLEDGE.2004 Since its publication in 1995, the German Technical Dictionary has established itself as the definitive resource for anyone who needs to translate technical documents between German and English. This new edition has been substantially revised to reflect the technological environment of the twenty-first century. The revised edition contains over 75,000 entries, of which over 5,000 are new, with many new entries in the areas of: * the internet and telecommunications * bio-technology and the new genetics * new developments in health technology. Throughout, this dictionary continues to benefit from the features that made the first edition so valuable, including accurate translations in British and American English and an attractive, durable and easy to use layout.

Englisch - Die Zeitformen und ihre Signalwörter Doreen Fant.2015-06-13 Immer wieder fällt Lehrern, Eltern und Nachhilfelehrern auf, dass Schüler besonders bei Lückentexten willkürlich Verbformen in unpassenden Zeiten einsetzen. Dabei folgt der Gebrauch der Zeitformen im Englischen, anders als im Deutschen, ganz strikten Regeln, die meist mit Signalwörtern deutlich werden. Da diese aber nicht immer deutlich genug mit der jeweiligen Zeitform verknüpft werden, sind sie für die Schüler eben keine Signalwörter, die eine ganz bestimmte Zeit erfordern, sondern einfach nur Wörter im Text. Mit diesen Arbeitsblättern werden die englischen Zeitformen nun mit deutlichen Signalwörtern gelernt und abgespeichert. Zusätzlich gibt es am Ende Tabellen, in denen alle Zeitformen mit ihren jeweiligen Signalwörtern aufgelistet sind. Diese sollten ausgedruckt und gut sichtbar aufgehängt werden, so dass sie während des Lernprozesses stets zur Verfügung stehen.

Social Networks Samuel Leinhardt.2013-09-17 Social Networks: A Developing Paradigm contains studies of the nature and impact of social structure on behavior. It draws together readings from a variety of social science areas that share the basic premise that structure in social relationships can be fruitfully operationalized in terms of networks. It attempts to bring together classic works that opened new research areas and works that contain important statements of perspective, method, or empirical findings. The book is organized into four parts. Part I focuses on the cognitive organization of social relations and the effects of local social structure on individuals. In Part II the authors consider networks of ties in large social agglomerations, and treat a variety of different types of social relationships. The emphasis here is on empirical studies. Specific extant social networks are investigated to test a variety of structural hypotheses. Part III contains studies that address issues more common among social anthropologists than sociologists or social psychologists. The chapters in Part IV, while occasionally containing applications, are primarily methodological. These discuss mathematical and statistical ideas for modeling and analyzing social networks.

UNESCO Guidebook on Textbook Research and Textbook Revision Falk Pingel.2010-01-01

International Perspectives on Education Chau Meng Huat,Trevor Kerry.2008-01-01 International Perspectives on Education is intended for those with an interest in education as an academic area, including students of Education Studies and MA Education. It is also suitable for those who have an interest in applied theory, including those involved in or training for the teaching profession; and to those who are concerned with the management and governance of education: those who formulate policy, those charged with inspecting or advising the profession, and those (such as head teachers or school governors) whose task is to guide others.

Family Diversity Olaf Kapella,Christiane Rille-Pfeiffer,Marina Rupp,Norbert F. Schneider.2010-03-17

Family in all its aspects Familienbande International experts provide an overview of the current state-of-the-art of European family research and outline the multiple formations, structures and configurations of family in Europe. Four aspects are discussed in depth: family images, sex/gender roles, globalisation and family development processes. Influenced by globalisation, European countries experience processes which still have greatly varying consequences. Cultural differences, reflected in a range of family schemes and national family policies, are one reason for the continued existence of differences in the scope and speed of change processes. Quite generally, images and concepts of family have become more heterogeneous and flexible. The flip side of this coin is that family members are increasingly faced with the challenges of achieving a satisfactory work-life balance - a task aggravated by globalisation. We therefore need to ask how family policy can help families enjoy adequate freedom of action and latitude for their decision-making. To summarise: a read well worth the effort for all experts working in family research and family policy.

Universities in Change Andreas Altmann,Bernd Ebersberger.2012-09-13 Universities find themselves in dynamic change. They are confronted with growing expectations from their stakeholders, increasing international competition, and new technological challenges. Featuring insights and in-depth case studies from leading researchers and university decision makers from around the world, this book argues that institutions of higher education, in order to be successful, have to actively reflect on circumstances, visions, and strategies to master the future. Drawing from

their experiences across a diverse array of institutions in Europe, Asia, and the Americas, the authors explore the pressures on today's universities and the opportunities for excelling in the contest for resources. They discuss operational issues, such as strategic management, IT governance, leadership development, and entrepreneurial culture, and broader concerns, such as the roles and responsibilities of universities in promoting technology transfer and economic and social development. The result is a resource that not only reveals and analyzes universities from an organizational perspective, but presents best practice models and concrete inspiration for management and policymaking.

Health Promotion Practice: Building Empowered Communities Laverack, Glenn.2007-04-01

The book provides an excellent combination of broad theoretical background with a generous helping of vocational guidance on the practice of health promotion. A very welcome addition to the practical side of health promotion! Laverack's™ brief and simply-worded text weaves together just the right balance of theory, evidence, tips and case studies to satisfy the new learner looking to gain a grasp of health promotion's™ empowering whole, while still offering new insights to the more seasoned practitioner. Ronald LabontÃ©, Institute of Population Health, University of Ottawa How can health promotion practitioners help communities to become more empowered? How do you encourage different communities to work together towards a shared goal? How can you focus your resources to be most effective in building empowered communities? How do you evaluate your success (and failures) in building empowered communities? Power and empowerment are two complex concepts that are central to health promotion practice. People experience empowerment in many different ways and this book explains an approach that has been used by health promoters to intentionally build and evaluate empowerment. The book provides a special focus on communities and is illustrated throughout with useful field experiences in the United Kingdom, Asia, North America, the Pacific region and Africa. The book aims to provide the reader with: An understanding of the key concepts of power and empowerment and the link to improved health outcomes in the context of health promotion programmes An understanding of practical approaches that can be used in health promotion programming to build and evaluate empowered communities Case study examples of how communities can be empowered in practice This unique book offers sound theoretical principles to underpin the practical approaches used to build empowered communities and brings together new and innovative approaches in health promotion practice. Health Promotion Practice is essential reading for health promotion students and practitioners who want to learn more about innovative approaches to build empowered communities in their everyday work. It will inspire them to work in more empowering ways in health promotion practice and to carefully contemplate how they can influence the way others gain power.

The State of Food Security and Nutrition in the World 2019 Food and Agriculture Organization of the United Nations, International Fund for Agricultural Development, World Food Programme, World Health Organization, United Nations Children's Fund.2019-07-15 This year's report presents evidence that the absolute number of people who suffer from hunger continues to slowly increase. The report also highlights that food insecurity is more than just hunger. For the first time, the report provides evidence that many people in the world, even if not hungry, experience moderate food insecurity as they face uncertainties about their ability to obtain food and are forced to compromise on the quality and/or quantity of the food they consume. This phenomenon is observed globally, not only in low- and middle-income countries but also in high income countries. The report also shows that the world is not on track to meet global nutrition targets, including those on low birthweight and on reducing stunting among children under five years. Moreover, overweight and obesity continue to increase in all regions, particularly among school-age children and adults. The report stresses that no region is exempt from the epidemic of overweight and obesity, underscoring the necessity of multifaceted, multisectoral approaches to halt and reverse these worrying trends. In light of the fragile state of the world economy, the report presents new evidence confirming that hunger has been on the rise for many countries where the economy has slowed down or contracted. Unpacking the links between economic slowdowns and downturns and food insecurity and

malnutrition, the report contends that the effects of the former on the latter can only be offset by addressing the root causes of hunger and malnutrition: poverty, inequality and marginalization.

Teaching Sustainable Development Goals in Science Education Kerstin Kremer, Deidre Bauer.2021-10-18 At the core of the Agenda 2030 are 17 Sustainable Development Goals (SDGs). The aim of the SDGs is to secure a sustainable, peaceful, prosperous and equitable life on Earth for everyone now and in the future. To achieve the SDGs, education for sustainable development (ESD) aims to develop competencies that empower individuals to reflect on their own actions, taking into account their current and future social, cultural, economic and environmental impacts, from a local and a global perspective. Therefore, ESD must define new knowledge, skills, values and attitudes and evaluate effective ways towards a new pedagogy. This Special Issue focuses on empirical educational research and theoretical considerations that address transformational competences in science education in the context of the SDGs. It presents new pedagogical approaches that aim to empower learners and teachers to contribute to a sustainable future and to evaluate their effectiveness in science education. Papers can focus on, e.g., new curricula or textbooks, teacher education, classroom and informal learning, whole-institution approaches, action-oriented and transformative learning approaches in science education.

The Promise of Politics Hannah Arendt.2009-01-16 After the publication of *The Origins of Totalitarianism* in 1951, Hannah Arendt undertook an investigation of Marxism, a subject that she had deliberately left out of her earlier work. Her inquiry into Marx's philosophy led her to a critical examination of the entire tradition of Western political thought, from its origins in Plato and Aristotle to its culmination and conclusion in Marx. *The Promise of Politics* tells how Arendt came to understand the failure of that tradition to account for human action. From the time that Socrates was condemned to death by his fellow citizens, Arendt finds that philosophers have followed Plato in constructing political theories at the expense of political experiences, including the pre-philosophic Greek experience of beginning, the Roman experience of founding, and the Christian experience of forgiving. It is a fascinating, subtle, and original story, which bridges Arendt's work from *The Origins of Totalitarianism* to *The Human Condition*, published in 1958. These writings, which deal with the conflict between philosophy and politics, have never before been gathered and published. The final and longer section of *The Promise of Politics*, titled "Introduction into Politics," was written in German and is published here for the first time in English. This remarkable meditation on the modern prejudice against politics asks whether politics has any meaning at all anymore. Although written in the latter half of the 1950s, what Arendt says about the relation of politics to human freedom could hardly have greater relevance for our own time. When politics is considered as a means to an end that lies outside of itself, when force is used to "create" freedom, political principles vanish from the face of the earth. For Arendt, politics has no "end"; instead, it has at times been—and perhaps can be again—the never-ending endeavor of the great plurality of human beings to live together and share the earth in mutually guaranteed freedom. That is the promise of politics.

Epigenetics Reinhard Heil, Stefanie B. Seitz, Harald König, Jürgen Robiński.2017-01-31 Modern epigenetics unites scientists from life sciences, organic chemistry as well as computer and engineering sciences to find an answer to the question of how environmental influences can have a lasting effect on gene expression, maybe even into the next generations. This volume examines from an interdisciplinary perspective the ethical, legal and social aspects of epigenetics.

Global Health Diplomacy Ilona Kickbusch, Graham Lister, Michaela Told, Nick Drager.2012-12-09 The world's problems are indeed world problems: social and environmental crises, global trade and

politics, and major epidemics are making public health a pressing global concern. From this constantly changing scenario, global health diplomacy has evolved, at the intersection of public health, international relations, law, economics, and management—a new discipline with transformative potential. Global Health Diplomacy situates this concept firmly within the human rights dialogue and provides a solid framework for understanding global health issues and their negotiation. This up-to-the-minute guide sets out defining principles and the current agenda of the field, and examines key relationships such as between trade and health diplomacy, and between global health and environmental issues. The processes of global governance are detailed as the UN, WHO, and other multinational actors work to address health inequalities among the world's peoples. And to ensure maximum usefulness, the text includes plentiful examples, discussion questions, reading lists, and a glossary. Featured topics include: The legal basis of global health agreements and negotiations. Global public goods as a foundation for global health diplomacy. Global health: a human security perspective. Health issues and foreign policy at the UN. National strategies for global health. South-south cooperation and other new models of development. A volume of immediate utility with a potent vision for the future, Global Health Diplomacy is an essential text for public health experts and diplomats as well as schools of public health and international affairs. Making Science Stephen Cole.1992 The sociology of science is dominated today by relativists who boldly argue that the content of science is not influenced by evidence from the empirical world but is instead socially constructed in the laboratory. Making Science is the first serious critique by a sociologist of the social constructivist position. Stephen Cole begins by making a distinction between two kinds of knowledge: the core, which consists of those contributions that have passed the test of evaluation and are universally accepted as true and important, and the research frontier, which is composed of all work in progress that is still under evaluation. Of the thousands of scientific contributions made each year, only a handful end up in the core. What distinguishes those that are successful? Agreeing with the constructivists, Cole argues that there exists no set of rules that enables scientists to certify the validity of frontier knowledge. This knowledge is underdetermined by the evidence, and therefore social factors--such as professional characteristics and intellectual authority--can and do play a crucial role in its evaluation. But Cole parts company with the constructivists when he asserts that it is impossible to understand which frontier knowledge wins a place in the core without first considering the cognitive characteristics of the contributions. He concludes that although the focus of scientific research, the rate of advance, and indeed the everyday making of science are influenced by social variables and processes, the content of the core of science is constrained by nature. In Making Science, Cole shows how social variables and cognitive variables interact in the evaluation of frontier knowledge.

Queer Social Movements and Outreach Work in Schools Dennis A. Francis,Jón Ingvar Kjarn,Jukka Lehtonen.2020-04-06 This book brings together leading scholars researching the field of gender, sexuality, schooling, queer activism, and social movements within different cultural contexts. With contributions from more than fifteen countries, the chapters bring fresh insights for students and scholars of gender and sexuality studies, education, and social movements in the Global North and South. The book draws together both theoretical and empirical contributions offering rich and multidisciplinary essays from scholars and activists in the field focusing on outreach work of QSM (Queer Social Movements) in schools, queer activism in educational settings, and the role of QSMs in supporting and informing queer youth.
