**Embedded Computing Systems: Applications, Optimization, and Advanced Design** Khalgui, Mohamed.2013-04-30 Embedded computing systems play an important and complex role in the functionality of electronic devices. With our daily routines becoming more reliant on electronics for personal and professional use, the understanding of these computing systems is crucial. Embedded Computing Systems: Applications, Optimization, and Advanced Design brings together theoretical and technical concepts of intelligent embedded control systems and their use in hardware and software architectures. By highlighting formal modeling, execution models, and optimal implementations, this reference source is essential for experts, researchers, and technical supporters in the industry and academia.

**A History of Economic Doctrines from the time of the physiocrats to the present day** Charles Gide,Charles Rist.2019-11-27 This book provides a historical account of economic theories and doctrines from the physiocrats to modern-day scholars. The book challenges the prevailing verdict of history on the achievements of Smith, and the authors also designate Ricardo and Malthus as pessimists. In this book, the authors offer a perspective on modern theories by connecting them with their historical antecedents. It also provides insight into the development of economic theory across different countries.

**Weavers of Revolution** Peter Winn.1986 Weavers of Revolution is a major reinterpretation of the Salvador Allende era in Chile as well as a compelling drama of human triumph and tragedy that exemplifies the new narrative history at its authentic best. Unfolding a vivid story as seen through the eyes of the participants themselves, the book focuses on the workers at the Yarur factory, Chile's largest cotton mill. After Allende took office in 1970, the workers seized control of the mill and proceeded to socialize its operations. They were to learn, however, that Allende's plans for transforming the country were less radical and more gradualist than theirs, and suddenly they found themselves on a collision course with the government. Winn, who interviewed the workers and Allende while many of the events were taking place, brilliantly captures the turning point of Chile's democratic road to socialism of 1970-73 in both the Yarur mill and the presidential palace, showing how a revolution was forged from below. As he demonstrates, the confrontation between Allende and the workers and its ultimate outcome reveal an array of complexities in the revolutionary process that too often elude American understanding and frustrate U.S. foreign policy. Skillfully integrating oral history with penetrating analysis, this book uncovers the dynamic relationship between leaders and the people they propose to lead, and offers a striking new explanation of how revolutions are radicalized. About the Author: Peter Winn has taught at Yale and Princeton and is now Associate Professor of History at Tufts University, a Senior Fellow at Columbia University's Research Institute on International Change, and Barnette-Miller Professor of International Relations at Wellesley College. He has written for The New York Times and The Los Angeles Times and was principal advisor for and award-winning documentary on Cuba. The compelling story of how a Third World revolution was forged from below ·Based on countless interviews with participants while the events were actually happening ·Sheds new light on Chile's Allende era and on the nature of revolutionary movements

**Principles of Stellar Dynamics** S. Chandrasekhar.2005-05-13 In this classic text, a Nobel Prize-winning astrophysicist presents the theory of stellar dynamics as a branch of classical dynamics--a discipline in the same general category as celestial mechanics. His method offers the advantages of clarifying the theory's fundamental issues and defining its underlying motivations. S. Chandrasekhar investigates two areas. The first concerns problems in which the time of relaxation of a stellar system is central. His method consists of analyzing the effects of stellar encounters in terms of the two-body problem of classical dynamics and applying this theory to the dynamics of star clusters. The second area investigates problems centering around Liouville's theorem and the solutions of the equation of continuity; here, the author discusses the dynamic implications of the existence of a field of differential motions, which appears to be the most striking kinematic feature of the galaxy and the extragalactic systems. This edition includes two papers by the author that were published after Principles of Stellar Dynamics and that have been studied and quoted extensively: New Methods in Stellar Dynamics (originally published in the Annals of the New York Academy of Sciences) and Dynamical Friction (originally published in The Astrophysical Journal).

продукции ФАО | Anuario FAO de productos forestales 2018 Food and Agriculture Organization of the United Nations .2020-08-01 The FAO Yearbook of Forest Products is a compilation of statistical data on basic forest products for all countries and territories of the world. It contains a series of annual data on the volume of production and the volume and value of trade in forest products. It includes tables showing the direction of trade and average unit values of trade for certain products. Statistical information in the yearbook is based primarily on data provided to the FAO Forestry Department by the countries through questionnaires or official publications. In the absence of official data, FAO makes an estimate based on the best information available.

**Treaty Series 2498** United Nations Office of Legal Affairs.2011-09-13 In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately. A Standing Order service is available for the Series and out-of-print volumes are available on microfiche.

**The Design of Animal Experiments** Michael Festing,Philip Overend,Mario Cortina Borja,Manuel Berdoy.2016-12-14 Where there is no alternative to the use of animals in biomedical research, it is important that experiments are well designed and correctly analysed in order to minimise pain and maximize the chance of getting scientifically valid results. Experiments that use too few animals may fail to pick up biologically important effects, while those who use them incorrectly or wastefully may get invalid results while subjecting the animals to unnecessary pain, distress or lasting harm. The Design of Animal Experiments is intended for all research scientists who use laboratory animals, with the aim of helping them to design their own experiments more effectively and/or to improve their ability to communicate with professional statisticians when necessary. It covers all randomised controlled experimental designs likely to be needed in laboratory animal research, with worked examples showing how they can be statistically analysed. It suggests the more widespread use of randomised block designs and shows how both males and females can be included in an experiment without the need to increase the total number of animals by using factorial designs. It also includes guidance on the choice of experimental animals. The book covers the learning outcomes of Module 10 and part (ii) of Module 11 of education and training under Directive 2010/63/EU.

**Food Composition Data** H. Greenfield.2012-11-02 About twenty years ago, there was a recognition in Europe that real benefits would flow from coordinating the manner in which food composition tables were produced in the various countries of Europe. Subsequent development of computerised nutritional data bases has further highlighted the potential advantages of working together. Such cooperation could lead to improved quality and compatibility of the various European nutrient data bases and the values within them. This realisation was one of the driving forces behind the development of the Eurofoods initiative in the 1980's when those people in Europe interested in data on food composition began working together. This initiative received further impetus with the establishment of the Eurofoods-Enfant Concerted Action Project within the framework of the FLAIR (Food-Linked Agro-Industrial Research) Programme of the Commission of the European Communities. It was quickly recognised that the draft guidelines for the production, management and use of food composition data which had been prepared under the aegis of INFOODS (International Network of Food Data Systems, a project of the United Nations University), would be especially applicable to the objectives of the Concerted Action. The guidelines have been written by two recognised experts. Many people associated with FLAIR Eurofoods-Enfant have added constructive criticism and advice to that offered previously by those associated with INFOODS. Thus the guidelines are backed by a consensus in the community of those responsible for the production and use of food composition tables and nutrient data bases.

**Building Natural Language Generation Systems** Ehud Reiter,Robert Dale.2000-01-28 This book explains how to build Natural Language Generation (NLG) systems - computer software systems which use techniques from artificial intelligence and computational linguistics to automatically generate understandable texts in English or other human languages, either in isolation or as part of multimedia documents, Web pages, and speech output systems. Typically starting from some non-linguistic representation of information as input, NLG systems use knowledge about language and the application domain to automatically produce documents, reports, explanations, help messages, and other kinds of texts. The book covers the algorithms and representations needed to perform the core tasks of document planning, microplanning, and surface realization, using a case study to show how these components fit together. It also discusses engineering issues such as system architecture, requirements analysis, and the integration of text generation into multimedia and speech output systems.

**Writing Architectural History** Aggregate Architectural History Collective.2021-12-14 Over the past two decades, scholarship in architectural history has transformed, moving away from design studio pedagogy and postmodern historicism to draw instead from trends in critical theory focusing on gender, race, the environment, and more recently global history, connecting to revisionist trends in other fields. With examples across space and time—from medieval European coin trials and eighteenth-century Haitian revolutionary buildings to Weimar German construction firms and present-day African refugee camps—Writing Architectural History considers the impact of these shifting institutional landscapes and disciplinary positionings for architectural history. Contributors reveal how new methodological approaches have developed interdisciplinary research beyond the traditional boundaries of art history departments and architecture schools, and explore the challenges and opportunities presented by conventional and unorthodox forms of evidence and narrative, the tools used to write history.

Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 edition. Excerpt: ... (6) Columns for Discount on Purchases and Discount on Notes on the same side of the Cash Book; (c) Columns for Discount on Sales and Cash Sales on the debit side of the Cash Book; (d) Departmental columns in the Sales Book and in the Purchase Book. Controlling Accounts.--The addition of special columns in books of original entry makes possible the keeping of Controlling Accounts. The most common examples of such accounts are Accounts Receivable account and Accounts Payable account. These summary accounts, respectively, displace individual customers' and creditors' accounts in the Ledger. The customers' accounts are then segregated in another book called the Sales Ledger or Customers' Ledger, while the creditors' accounts are kept in the Purchase or Creditors' Ledger. The original Ledger, now much reduced in size, is called the General Ledger. The Trial Balance now refers to the accounts in the General Ledger. It is evident that the task of taking a Trial Balance is greatly simplified because so many fewer accounts are involved. A Schedule of Accounts Receivable is then prepared, consisting of the balances found in the Sales Ledger, and its total must agree with the balance of the Accounts Receivable account shown in the Trial Balance. A similar Schedule of Accounts Payable, made up of all the balances in the Purchase Ledger, is prepared, and it must agree with the balance of the Accounts Payable account of the General Ledger. The Balance Sheet.--In the more elementary part of the text, the student learned how to prepare a Statement of Assets and Liabilities for the purpose of disclosing the net capital of an enterprise. In the present chapter he was shown how to prepare a similar statement, the Balance Sheet. For all practical...

André Michaux in North America André Michaux.2020-03-31 Journals and letters, translated from the original French, bring Michaux's work to modern readers and scientists Known to today's biologists primarily as the "Michx," at the end of more than 700 plant names, André Michaux was an intrepid French naturalist. Under the directive of King Louis XVI, he was commissioned to search out and grow new, rare, and never-before-described plant species and ship them back to his homeland in order to improve French forestry, agriculture, and horticulture. He made major botanical discoveries and published them in his two landmark books, *Histoire des chênes de l'Amérique* (1801), a compendium of all oak species recognized from eastern North America, and *Flora Boreali-Americana* (1803), the first account of all plants known in eastern North America. Straddling the fields of documentary editing, history of the early republic, history of science, botany, and American studies, *André Michaux in North America: Journals and Letters, 1785-1797* is the first complete English edition of Michaux's American journals. This copiously annotated translation includes important excerpts from his little-known correspondence as well as a substantial introduction situating Michaux and his work in the larger scientific context of the day. To carry out his mission, Michaux traveled from the Bahamas to Hudson Bay and west to the Mississippi River on nine separate journeys, all indicated on a finely rendered, color-coded map in this volume. His writings detail the many hardships—debilitating disease, robberies, dangerous wild animals, even shipwreck—that Michaux endured on the North American frontier and on his return home. But they also convey the soaring joys of exploration in a new world where nature still reigned supreme, a paradise of plants never before known to Western science. The thrill of discovery drove Michaux ever onward, even ultimately to his untimely death in 1802 on the remote island of Madagascar.

**Networking for Digital Preservation** Ingeborg Verheul.2006-01-01 Libraries all over the world have to deal with fast growing numbers of digital materials that need to be safeguarded. Publications in digital form, online or on CD, digitised images, and born-digital objects need to be preserved and kept accessible. Safeguarding digital heritage is a major issue, especially for national libraries, because of their legal task of preserving the national heritage of a country. This volume describes the state of the art of digital repositories, preservation strategies and current projects in the national libraries of Australia, Austria, Canada, China, Denmark, France, Germany, Japan, Netherlands, New Zealand, Portugal, Sweden, Switzerland, the UK and the USA.

*In Defiance of Painting* Christine Poggi.1992-01-01 The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been viewed as a new expression of modernism, one allied with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive study of collage and its relation to modernism - challenges this view. Christine Poggi argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a new relationship of exchange.

*The Independent Woman* Simone De Beauvoir.2018-11-06 "Like man, woman is a human being." When *The Second Sex* was first published in Paris in 1949—groundbreaking, risqué, brilliantly written and strikingly modern—it provoked both outrage and inspiration. *The Independent Woman* contains three key chapters of Beauvoir's masterwork, which illuminate the feminine condition and identify practical social reforms for gender equality. It captures the essence of the spirited manifesto that switched on light bulbs in the heads of a generation of women and continues to exert profound influence on feminists today.
