Media Concentration and Democracy C. Edwin Baker.2006-12-11 Firmly rooting its argument in democratic and economic theory, the book argues that a more democratic distribution of communicative power within the public sphere and a structure that provides safeguards against abuse of media power provide two of three primary arguments for ownership dispersal. It also shows that dispersal is likely to result in more owners who will reasonably pursue socially valuable journalistic or creative objectives rather than a socially dysfunctional focus on the 'bottom line'. The middle chapters answer those agents, including the Federal Communication Commission, who favor 'deregulation' and who argue that existing or foreseeable ownership concentration is not a problem. The final chapter evaluates the constitutionality and desirability of various policy responses to concentration, including strict limits on media mergers.

Netflixed Gina Keating.2012-10-11 Netflix has come a long way since 1997, when two Silicon Valley entrepreneurs, Marc Randolph and Reed Hastings, decided to start an online DVD store before most people owned a DVD player. They were surprised and elated when launch-day traffic in April 1998 crashed their server and resulted in 150 sales. Today, Netflix has more than 25 million subscribers and annual revenues above \$3 billion. Yet long-term success-or even survival-is still far from guaranteed. Journalist Gina Keating recounts the absorbing, fast-paced drama of the company's turbulent rise to the top and its attempt to invent two new kinds of business. First it engaged in a grueling war against video-store behemoth Blockbuster, transforming movie rental forever. Then it jumped into an even bigger battle for online video streaming against Google, Hulu, Amazon, and the big cable companies. Netflix ushered in such innovations as DVD rental by mail, a patented online queue of upcoming rentals, and a recommendation algorithm called Cinematch that proved crucial in its struggle against bigger rivals. Yet for all its success, Netflix is still a polarizing company. Hastings is often heralded as a visionary-he was named Business Person of the Year in 2010 by Fortune-even as he has been called the nation's worst CEO. Netflix also faces disgruntled customers after price increases and other stumbles that could tarnish the brand forever. The quest to become the world's portal for premium video on demand will determine nothing less than the future of entertainment and the Internet. Drawing on extensive new interviews and her years covering Netflix as a financial and entertainment reporter, Keating makes this tale as absorbing as it is important.

The State and Illegality in Indonesia E. Aspinall,G. van Klinken.2011-01-01 The popular 1998 reformasi movement that brought down President Suharto's regime demanded an end to illegal practices by state officials, from human rights abuse to nepotistic investments. Yet today, such practices have proven more resistant to reform than people had hoped. Many have said corruption in Indonesia is entrenched. We argue it is precisely this entrenched character that requires attention. What is state illegality entrenched in and how does it become entrenched? This involves studying actual cases. Our observations led us to rethink fundamental ideas about the nature of the state in Indonesia, especially regarding its socially embedded character. We conclude that illegal practices by state officials are not just aberrations to the state, they are the state. Almost invariably, illegality occurs as part of collective, patterned, organized and collaborative acts, linked to the competition for political power and access to state resources. While obviously excluding many without connections, corrupt behaviour also plays integrative and stabilizing functions. Especially at the lower end of the social ladder, it gets a lot of things done and is often considered legitimate. This book may be read as a defence of area studies approaches. Without the insights that grew from applying our area studies skills, we would still be constrained by highly stylised notions of the state, which bear little resemblance to the state's actual workings. The struggle against corruption is a long-term political process. Instead of trying to depoliticize it, we believe the key to progress is greater popular participation. With contributions from Simon Butt, Robert Cribb, Howard Dick, Michele Ford, Jun Honna, Tim Lindsey, Lenore Lyons, John McCarthy, Ross McLeod, Marcus Mietzner, Jeremy Mulholland, Gerben Nooteboom, J Danang Widoyoko and Ian Wilson. This book is the result of a series of workshops supported, among others, by the Australian-Netherlands Research Collaboration (ANRC).

Media/Society David Croteau,William Hoynes.2018-08-02 Providing a framework for understanding the relationship between media and society, this updated Sixth Edition of *Media/Society* helps you develop the skills you need to critically evaluate both conventional wisdom and your own assumptions about the social role of the media. Authors David Croteau and William Hoynes retain the book's basic sociological framework but now include additional discussions of new studies and up-to-date material on today's rapidly changing media landscape. Now featuring streamlined content and a more engaging narrative, this edition offers expanded discussions of the "new media" world, including digitization, the internet, the spread of mobile media devices, the role of user-generated content, the potential social impact of new media on society, and new media's effect on traditional media outlets

The Fourth Industrial Revolution Klaus Schwab.2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance

progress.

World Development Report 2020 World Bank.2019-11-19 Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. World Development Report 2020: Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

Public Broadcasting and Political Interference Chris Hanretty.2011-05-03 Public broadcasters, like the BBC and the Italian broadcaster RAI, are some of the most important media organisations in the world. Politicians are often tempted to interfere in the workings of these broadcasters and when this happens, the results are highly controversial, as both the Blair and Berlusconi governments have discovered. Public Broadcasting and Political Interference explains why some broadcasters are good at resisting politicians' attempts at interference, and have won a reputation for independence - and why other broadcasters have failed to do the same. It takes a comparative approach of broadcasters in different countries, including the United Kingdom, Italy, Spain and Sweden arguing political independence for public service broadcasters is important because of its contribution to democracy allowing voters alternative sources of information which allow them to choose between electoral alternatives. The book will be of interest to be of interest to policy-makers, scholars and students of political communication, broadcasting and the media.

The Persian Gulf TV War Douglas Kellner.2019-06-26 Douglas Kellner's Persian Gulf TV War attacks the myths, disinformation, and propaganda disseminated during the Gulf war. At once a work of social theory, media criticism, and political history, this book demonstrates how television served as a conduit for George Bush's war policies while silencing anti-war voices and foregoing spirited discussion of the complex issues involved. In so doing, the medium failed to assume its democratic responsibilities of adequately informing the American public and debating issues of common concern. Kellner analyzes the dominant frames through which television presented the war and focuses on the propaganda that sold the war to the public—one of the great media spectacles and public relations campaigns of the post-World War II era. In the spirit of Orwell and Marcuse, Kellner studies the language surrounding the Gulf war and the cynical politics of distortion and disinformation that shaped the mainstream media version of the war, how the Bush administration and Pentagon manipulated the media, and why a majority of the American public accepted the war as just and moral.

Numerous illustrations and real-life examples bring this topic alive and present you with a realistic view of today's programming issues.

Media, Culture, and Politics in Indonesia Krishna Sen,David T. Hill.2007 Media, Culture, and Politics in Indonesia is about the institutions and policies that determine what Indonesians write, read, watch, and hear. It covers the print media, broadcast radio and television, computers and the internet, videos, films and music. This book argues that the texts of the media can be understood in two broad ways: 1. as records of a national culture and political hegemony constructed by Suharto's New Order and 2. as contradictory, dissident, political and cultural aspirations that reflect the anxieties and preoccupations of Indonesian citizens. Media, Culture, and Politics, now brought back to life as a member of Equinox Publishing's Classic Indonesia series, explains what has escaped state control, not only by self-conscious resistance, but also because of the ownership patterns, technologies, and modes of consumption of media texts and institutions. The role of the media in the downfall of Suharto is examined and the legacy of his New Order is analyzed. This dynamic and innovative text is suitable for all students of Indonesian languages and culture, Asian studies, Southeast Asian studies, cultural studies, media studies, and contemporary politics. Krishna Sen is Professor of Asian Media and Dean of the Humanities Research Centre at Curtin University of Technology, Perth, Western Australia David T. Hill is Professor of Southeast Asian Studies and Fellow of the Asia Research Centre, Murdoch University, Perth, Western Australia

Marketing Aesthetics Bernd Schmitt, Alex Simonson. 1997-08-30 There is no way to mistake the ubiquitous trademarked Coca-Cola bottle, or the stylish ads for Absolut Vodka with any of their competitors. How have these companies created this irresistible appeal for their brands? How have they sustained a competitive edge through aesthetics? Bernd Schmitt and Alex Simonson, two leading experts in the emerging field of identity management, offer clear guidelines for harnessing a company's total aesthetic output -- its look and feel -- to provide a vital competitive advantage. Going beyond standard traditional approaches on branding, this fascinating book is the first to combine branding, identity, and image and to show how aesthetics can be managed through logos, brochures, packages, and advertisements, as well as sounds, scents, and lighting, to sell the memorable experience. The authors explore what makes a corporate or brand identity irresistible, what styles and themes are crucial for different contexts, and what meanings certain visual symbols convey. Any person in any organization in any industry can benefit from employing the tools of marketing aesthetics. Schmitt and Simonson describe how a firm can use these tools strategically to create a variety of sensory experiences that will (1) ensure customer satisfaction and loyalty; (2) sustain lasting customer impressions about a brand's or organization's special personality; (3) permit premium pricing; (4) provide legal trade dress protection from competitive attacks; (5) lower costs and raise productivity; and (6) most importantly, create irresistible appeal. The authors show how to manage identity globally and how to develop aesthetically pleasing retail spaces and environments. They also address the newly emergent topic of how to manage corporate and brand identity on the Internet. Supporting their thesis with numerous real-world success stories such as Absolut Vodka, Nike, the Gap, Cathay Pacific Airlines, Starbucks, the New Beetle Website, and Lego, the authors explain how actual companies have developed, refined, and maintained distinct corporate identities that set them apart from competitors.
