incorporate adhesive dentistry into their daily practice. Leaders in the field present the rationale for adhesive techniques in esthetic restorative dentistry. Minimally invasive dentistry and specific issues faced by clinicians using adhesive techniques with ceramic and resin composite restorations are also discussed. Color in Dentistry Stephen J. Chu, Rade D. Paravina, Irena Sailer, Adam J. Mieszko.2017 Predictable shade matching in dentistry remains a significant challenge for clinicians in daily practice. Color is an important aspect in the esthetics of teeth and dental restoration fabrication, and color discrepancy can mar restorative results, even when other aspects (marginal fit, occlusion, and morphology) are adequate. This book provides step-by-step protocols to help dental professionals accurately match, communicate, and reproduce the color of teeth and gingiva. These authors demonstrate how to implement color science in simple problem-solving instructions for predictable esthetics in both clinical protocols and laboratory techniques. An extensive presentation of clinical cases is included to illustrate the use of recommended protocols in general practice. An outstanding contribution to the practice and theory of color management in contemporary dentistry. (EDITOR).

Protocols for Predictable Aesthetic Dental Restorations

Irfan Ahmad. 2008-04-15 Aesthetic dentistry has become increasingly important to dentists and their patients. This book is designed as a springboard to assist clinicians in developing the aesthetic potential of restorative procedures. The book marries evidence-based principles with handy hints and tips the author has distilled from years of clinical experience. This combination of scientific principles with 'real world' practice will boost the confidence of budding aesthetic practitioners and clinical dental students. The book focuses on the principles of aesthetic work across the dentist's repertoire, rather than concentrating on one particular technique. For this reason, it will add value to the

range of daily restorative work in the dental surgery.
