**The Use of Historical Data in Natural Hazard Assessments** Thomas Glade,Paola Albini,Félix Francés.2013-03-09 Natural hazards such as earthquakes, landslides, floods, volcanic eruptions, tsunamis, and hurricanes cause environmental, economic as well as sociological problems worldwide. In recent years, greater availability of information and sensational media reports of natural hazard occurrence -and in particular in terms of property damage or loss of life caused by these hazards -resulted in an increase of hazard awareness at a societal level. This increase in public awareness has often been misconstrued as an indication that natural hazards have been occurring more frequently with higher magnitudes in recent years/decades, thus causing more damage than in the past. It is still under debate, however, to which extent recent increases in damage can be related to changing frequencies of natural processes, or whether catastrophic events occur at similar rates as they always had. If the latter is the case, the reason for a greater damage can be related to dramatic population growth over the last century, with a substantial augmentation of population density in some regions. Indeed, the implications are more severe in underdeveloped and developing countries, where urbanisation has increasingly occurred in hazard prone areas such as coastal zones, alluvial river plains and steep slopes, thus causing an increase in the exposure to natural hazards. Some groups of society in wealthy countries accept higher risks in order to live directly on top of a cliff or on a steep slope to enjoy panoramic views of the landscape.

**Morphological Naturalness** Willi Mayerthaler.1988 Profoundly concerned with the properties of access, perceptual complexity, and pragmatic presuppositions, here formalized as a calculus of markedness, this study attempts to provide a highly principled explanation of morphological complexity and change. Here, markedness is construed as a qualitative statement, as a natural parametric device, and not as an empirically empty algorithmic tool. This work is fundamentally concerned with iconicity as a property of grammatical encoding. A major contribution to a dynamic theory of language as a communicative endeavor, this study is strongly oriented towards universals with prognostic capacity. Moreover, the terms morphology and naturalness are here given biological reference, keyed as they are to the basis for a biology of language, and it is thus altogether fitting that this first English-language version of a work that has long enjoyed critical airing in Europe be prefaced with an essay by none less than Rupert Riedl -- Back cover.

**On the Grammar of Optative Constructions** Patrick Georg Grosz.2012-08-15 This monograph is one of the first theoretical studies of optatives. Optative constructions express desire without an overt lexical item that means 'desire'. The author specifically investigates optatives with the syntax of embedded clauses that contain prototypical particles such as 'only'. He rejects the view that optativity arises compositionally from the standard semantics of embedded clauses and prototypical particles. The following system is proposed: Desirability is due to a generalized scalar exclamation operator EX. Furthermore, clausal properties such as factivity/counterfactuality are encoded in a Mood head, which co-determines morphological mood and complementizer choice. Finally, the prototypical particles that optatives contain are truth-conditionally vacuous

presupposition triggers. As a result, these meaning components do not interact directly, but their meanings converge, with the consequence that they prototypically co-occur. This monograph is of interest for formal semanticists, syntacticians, pragmaticists and morphologists, and especially relevant for research on mood and particle semantics.

**Machiavellian Rhetoric** Victoria Kahn.1994-07-05 Historians of political thought have argued that the real Machiavelli is the republican thinker and theorist of civic virtù. Machiavellian Rhetoric argues in contrast that Renaissance readers were right to see Machiavelli as a Machiavel, a figure of force and fraud, rhetorical cunning and deception. Taking the rhetorical Machiavel as a point of departure, Victoria Kahn argues that this figure is not simply the result of a naïve misreading of Machiavelli but is attuned to the rhetorical dimension of his political theory in a way that later thematic readings of Machiavelli are not. Her aim is to provide a revised history of Renaissance Machiavellism, particularly in England: one that sees the Machiavel and the republican as equally valid--and related--readings of Machiavelli's work. In this revised history, Machiavelli offers a rhetoric for dealing with the realm of de facto political power, rather than a political theory with a coherent thematic content; and Renaissance Machiavellism includes a variety of rhetorically sophisticated appreciations and appropriations of Machiavelli's own rhetorical approach to politics. Part I offers readings of *The Prince*, *The Discourses*, and Counter-Reformation responses to Machiavelli. Part II discusses the reception of Machiavelli in sixteenth- and seventeenth-century England. Part III focuses on Milton, especially *Areopagitica*, *Comus*, and *Paradise Lost*.

**Rites of Power** Sean Wilentz.1999-03-23 Rites of Power provides a sweeping overview of the symbolism of power from tenth-century France to modern Britain. Approaching their topic from an eclectic range of intellectual traditions, the authors turn the study of politics, social relations, and cultural creation into a single endeavor. The essays begin with three assumptions: that all societies are ordered and governed by master fictions (divine right, equality for all) which make political hierarchy appear natural; that political rhetoric includes nonverbal communication (royal portraits, statistics on crop yields); and that common rhetoric can mean different things to various segments of a culture (states' rights during the American Civil War). Societies studied include France and Spain in the Middle Ages, post-Revolutionary France, the modern British monarchy, tsarist Russia, colonial Virginia, and industrial Germany. The essays were selected to provide methodological as well as historical coverage; the result is a comprehensive treatment along the cutting edge of several disciplines. This book will appeal to scholars and students in the fields of history, political science, sociology, anthropology, and art history.

*Nicola & Giovanni Pisano* Anita Fiderer Moskowitz.2005 In the year 1260, Nicola Pisano, the sculptor who initiated the revival of classicizing ideals that would later form a major component of Italian Renaissance art, created a remarkable and unusual monument for the Baptistery of Pisa, a hexagonal pulpit supported by seven colorful columns and displaying on its parapet five visually compelling narrative reliefs; several years later he designed a second pulpit, this time for the cathedral of Siena. Toward the end of the century, his son Giovanni received a pulpit commission for the parish church of Sant'Andrea, Pistoia, to be followed a few years later (c. 1302) by another one for the cathedral of Pisa. These four extraordinary monuments, each building upon both older traditions and its own immediate predecessors, yet each a highly innovative and original solution, are the primary subject of this book. The pulpits by Nicola and Giovanni Pisano were produced during a period of enormous economic, intellectual, cultural and spiritual flux. The expanded body of knowledge

that resulted from the rise of Scholasticism—a theological-intellectual current that, beginning in the French cathedral schools of the twelfth century, attempted to reconcile Christian faith with the newly valued ideals of observation and reason, in short, to synthesize Christian and classical learning—found expression in new themes and naturalistic motifs abounding in painting, book illumination and sculpture, and in religious and civic iconography. In contrast to the emphasis on transcendental experience of the earlier Middle Ages, the new urban-centered religious orders of the thirteenth-century, such as the Dominicans and the Franciscans, fostered a more direct, empathetic relationship between ordinary mortals and God and his saints. The Pisano pulpits were profoundly informed by these new conditions and concerns, and in turn they contributed to changing perceptions about the natural world and the nature of religious experience. Indeed, these pulpits are among the earliest visual manifestations in Italy of the scholastic inclination to embrace a wide range of knowledge, for the narratives relating biblical history are augmented by representations of Virtues and Vices, Liberal Arts, and pagan prophetesses of antiquity. The sermons expounded from these and other urban pulpits were very much enhanced by the charisma of their preachers and the interplay between the verbal and the visual, both of which were expressed in the vernacular, that is, in the case of sermons no longer only in the remote Latin tongue, and in the case of visual imagery no longer employing the abstract forms and symbols of earlier periods. But preaching was by no means the sole function of these raised platforms; they were used for a variety of ceremonial occasions and, like the para-liturgical mystery and miracle plays that were becoming increasingly popular, they satisfied the needs for edification, diversion, and even entertainment, needs as compelling in the thirteenth and fourteenth centuries as they are today. In this book, we explore in word and image these and other issues related to the pulpits of Nicola and Giovanni Pisano, both as individual masterpieces and as monuments within the larger context of pulpit traditions. Nicola and Giovanni, different as were their sculptural styles, were both consummate story-tellers and it is nothing less than astonishing to observe the formal devices employed to make those stories as compelling as possible: We shall thus witness varying interpretations of the narratives, differing iconographic emphases and formal devices, changing conceptions of the human figure, and the development of spatial awareness in the work of both father and son. By offering close readings of the narrative and figural iconography, and the sculptural form conceived to give them expression, this book invites the modern viewer-reader to follow the itinerary of their original audience, the worshiper standing before and walking around each pulpit. In addition, however, numerous close-up views of passages difficult to see in situ offer privileged access to details readily visible primarily to the sculptor at work rather than the standing or circumambulating spectator.
