The Rings of Saturn W. G. Sebald.2016-11-08 The book is like a dream you want to last forever (Roberta Silman, The New York Times Book Review), now with a gorgeous new cover by the famed designer Peter Mendelsund A masterwork of W. G. Sebald, now with a gorgeous new cover by the famed designer Peter Mendelsund The Rings of Saturn—with its curious archive of photographs—records a walking tour of the eastern coast of England. A few of the things which cross the path and mind of its narrator (who both is and is not Sebald) are lonely eccentrics, Sir Thomas Browne's skull, a matchstick model of the Temple of Jerusalem, recession-hit seaside towns, wooded hills, Joseph Conrad, Rembrandt's Anatomy Lesson, the natural history of the herring, the massive bombings of WWII, the dowager Empress Tzu Hsi, and the silk industry in Norwich. W.G. Sebald's *The Emigrants* (New Directions, 1996) was hailed by Susan Sontag as an astonishing masterpiece perfect while being unlike any book one has ever read. It was one of the great books of the last few years, noted Michael Ondaatje, who now acclaims *The Rings of Saturn* an even more inventive work than its predecessor, *The Emigrants*.

The Cambridge Handbook of Sociolinguistics Rajend Mesthrie.2011-10-06 The most comprehensive overview available, this Handbook is an essential guide to sociolinguistics today. Reflecting the breadth of research in the field, it surveys a range of topics and approaches in the study of language variation and use in society. As well as linguistic perspectives, the handbook includes insights from anthropology, social psychology, the study of discourse and power, conversation analysis, theories of style and styling, language contact and applied sociolinguistics. Language practices seem to have reached new levels since the communications revolution of the late twentieth century. At the same time face-to-face communication is still the main force of language identity, even if social and peer networks of the traditional face-to-face nature are facing stiff competition of the Facebook-to-Facebook sort. The most authoritative guide to the state of the field, this handbook shows that sociolinguistics provides us with the best tools for understanding our unfolding evolution as social beings.

Austerlitz W.G. Sebald.2011-12-06 *Austerlitz*, the internationally acclaimed masterpiece by “one of the most gripping writers imaginable” (The New York Review of Books), is the story of a man's search for the answer to his life's central riddle. A small child when he comes to England on a Kindertransport in the summer of 1939, one Jacques Austerlitz is told nothing of his real family by the Welsh Methodist minister and his wife who raise him. When he is a much older man, fleeting memories return to him, and obeying an instinct he only dimly understands, he follows their trail back to the world he left behind a half century before. There, faced with the void at the heart of twentieth-century Europe, he struggles to rescue his heritage from oblivion.

The Physics of Neutrinos Vernon Barger, Danny Marfatia, Kerry Whisnant. 2012-09-30 The physics of neutrinos--uncharged elementary particles that are key to helping us better understand the nature of our universe--is one of the most exciting frontiers of modern science. This book provides a comprehensive overview of neutrino physics today and explores promising new avenues of inquiry that could lead to future breakthroughs. The Physics of Neutrinos begins with a concise history of the field and a tutorial on the fundamental properties of neutrinos, and goes on to discuss how the three neutrino types interchange identities as they propagate from their sources to detectors. The book shows how studies of neutrinos produced by such phenomena as cosmic rays in the atmosphere and nuclear reactions in the solar interior provide striking evidence that neutrinos have mass, and it traces our astounding progress in deciphering the baffling experimental findings involving neutrinos. The discovery of neutrino mass offers the first indication of a new kind of physics that goes beyond the Standard Model of elementary particles, and this book considers the unanticipated patterns in the masses and mixings of neutrinos in the framework of proposed new theoretical models. The Physics of Neutrinos maps out the ambitious future facilities and experiments that will advance our knowledge of neutrinos, and explains why the way forward in solving the outstanding questions in neutrino science will require the collective efforts of particle physics, nuclear physics, astrophysics, and cosmology.

Making Sense of "Bad English" Elizabeth Peterson. 2019-10-17 Why is it that some ways of using English are considered good and others are considered bad? Why are certain forms of language termed elegant, eloquent or refined, whereas others are deemed uneducated, coarse, or inappropriate? Making Sense of Bad English is an accessible introduction to attitudes and ideologies towards the use of English in different settings around the world. Outlining how perceptions about what constitutes good and bad English have been shaped, this book shows how these principles are based on social factors rather than linguistic issues and highlights some of the real-life consequences of these perceptions. Features include: an overview of attitudes towards English and how they came about, as well as real-life consequences and benefits of using bad English; explicit links between different English language systems, including child's English, English as a lingua franca, African American English, Singlish, and New Delhi English; examples taken from classic names in the field of sociolinguistics, including Labov, Trudgill, Baugh, and Lambert, as well as rising stars and more recent cutting-edge research; links to relevant social parallels, including cultural outputs such as holiday myths, to help readers engage in a new way with the notion of Standard English; supporting online material for students which features worksheets, links to audio and news files, further examples and discussion questions, and background on key issues from the book. Making Sense of Bad English provides an engaging and thought-provoking overview of this topic and is essential reading for any student studying sociolinguistics within a global setting.

Nocturnes Frédéric Chopin. 2016-03-29 The Chopin nocturnes constitute 21 pieces for solo piano written by Frédéric Chopin between 1827 and 1846. They are generally considered among the finest short solo works for the instrument and hold an important place in contemporary concert repertoire. Although Chopin did not invent the nocturne, he popularized and expanded on it, building on the form developed by Irish composer John Field. Chopin's nocturnes numbered 1 to 18 were published during his lifetime, in twos or threes, in the order of composition. However, numbers 19 and 20 were actually written first, prior to Chopin's departure from Poland, but published posthumously. Number 20 was not originally entitled nocturne at all, but since its publication in 1870 as such, it is generally included with publications and recordings of the set.

The Cambridge History of the Romance Languages: Volume 2, Contexts Martin Maiden, John Charles Smith, Adam Ledgeway. 2013-10-24 What is the origin of the Romance languages and how did they evolve? When and how did they become different from Latin, and from each other? Volume 2 of The Cambridge History of the Romance Languages offers fresh and original reflections on the principal questions and issues in the comparative external histories of the Romance languages. It is organised around the two key themes of influences and institutions, exploring the fundamental influence, of contact with and borrowing from, other languages (including Latin), and the cultural and institutional forces at work in the establishment of standard languages and norms of correctness. A perfect complement to the first volume, it offers an external history of the Romance languages combining data and theory to produce new and revealing perspectives on the shaping of the Romance languages.

Rewilding European Landscapes Henrique M. Pereira, Laetitia M. Navarro. 2015-05-04 Some European lands have been progressively alleviated of human pressures, particularly traditional agriculture in remote areas. This book proposes that this land abandonment can be seen as an opportunity to restore natural ecosystems via rewilding. We define rewilding as the passive management of ecological successions having in mind the long-term goal of restoring natural ecosystem processes. The book aims at introducing the concept of rewilding to scientists, students and practitioners. The first part presents the theory of rewilding in the European context. The second part of the book directly addresses the link between rewilding, biodiversity, and habitats. The third and last part is dedicated to practical aspects of the implementation of rewilding as a land management option. We believe that this book will both set the basis for future research on rewilding and help practitioners think about how rewilding can take place in areas under their management.

Rather Elegant Than Showy Robert D. Mussey, Clark Pearce. 2018 Isaac Vose was well known in his day among style-conscious Bostonians, his name synonymous with furniture of the highest quality and advanced design. His shop, the first on Boston Neck, was in a prominent location and served as a familiar landmark in his South End neighborhood. Throughout the 1820s, 1830s, and as late as 1843, some nineteen years after Vose's death, auction advertisements explicitly cited his name as the maker of select furniture, with the association connoting quality and calculated to increase its sale price. This book gathers in one volume the known works of Vose as well as those attributed to him, and it is gorgeously illustrated throughout. The authors hope that Isaac Vose's work will gain recognition for its outstanding contributions to an American vision of classicism, albeit in Boston's more conservative, less dashy style.

Evans. 2007-08-24 For the first time, a synthesis on the research work done in Europe on all Bark And Wood Boring Insects In Living Trees (BAWBILT) is presented. As final product of a four-year research project gathering together 100 scientists from 24 countries, the book is the fruit of a real collective synthesis in which all European specialists have participated. It reviews and comments on all the European literature, while considering the biological (trees, insects, associated organisms, and their relationships) and forest management aspects. Recent Advances in NGF and Related Molecules Laura Calzà, Luigi Aloe, Luciana Giardino. 2021-08-27 More than fifty years after its initial discovery by Rita Levi Montalcini and Stanley Cohen and the proposal of the neurotrophic theory, nerve growth factor (NGF) has become the prototype of a family of biologically active molecules called neurotrophic factors (NTFs). This book addresses important advances in NTF research, from basic science to clinical medicine. It focuses mainly on NGF, but also includes individual chapters dealing with the brain-derived neurotrophic factor (BDNF) and ligands of the glial cell line-derived neurotrophic factor (GDNF) family, which have attracted increasing interest in the neuroscience community because of their diverse effects in the normal and diseased brain. In the first part of the book, the authors provide the necessary background for the following chapters and discuss the basic mechanisms and pathways of NGF signal transduction. In the following sections, they then examine the regenerative activity and neuroprotective capacity of NGF during development and in normal and diseased tissues in adulthood and discuss the role of NGF in Alzheimer's disease and nociception. In addition, the role of NGF in processing sensory information and its influence on

behavior is further discussed. The book concludes with an overview of the diagnostic and therapeutic potential of NTF in psychiatric disorders and obesity management, as well as a highlight of NGF research in veterinary medicine. Many of the authors of this volume participated in the Second International Rita Levi-Montalcini Meeting, held in Bologna, Italy, in 2019. The book covers a wide range of important topics in past and current NTF research and will appeal to basic researchers and clinicians alike.

Ethnobotany of Mexico Rafael Lira,Alejandro Casas,José Blancas.2016-04-23 This book reviews the history, current state of knowledge, and different research approaches and techniques of studies on interactions between humans and plants in an important area of agriculture and ongoing plant domestication: Mesoamerica. Leading scholars and key research groups in Mexico discuss essential topics as well as contributions from international research groups that have conducted studies on ethnobotany and domestication of plants in the region. Such a convocation will produce an interesting discussion about future investigation and conservation of regional human cultures, genetic resources, and cultural and ecological processes that are critical for global sustainability.

Forests and Food Bhaskar Vira,Christoph Wildburger,Stephanie Mansourian.2015-11-15 As population estimates for 2050 reach over 9 billion, issues of food security and nutrition have been dominating academic and policy debates. A total of 805 million people are undernourished worldwide and malnutrition affects nearly every country on the planet. Despite impressive productivity increases, there is growing evidence that conventional agricultural strategies fall short of eliminating global hunger, as well as having long-term ecological consequences. Forests can play an important role in complementing agricultural production to address the Sustainable Development Goals on zero hunger. Forests and trees can be managed to provide better and more nutritionally-balanced diets, greater control over food inputs—particularly during lean seasons and periods of vulnerability (especially for marginalised groups)—and deliver ecosystem services for crop production. However forests are undergoing a rapid process of degradation, a complex process that governments are struggling to reverse. This volume provides important evidence and insights about the potential of forests to reducing global hunger and malnutrition, exploring the different roles of landscapes, and the governance approaches that are required for the equitable delivery of these benefits. *Forests and Food* is essential reading for researchers, students, NGOs and government departments responsible for agriculture, forestry, food security and poverty alleviation around the globe.

The Oxford Handbook of Language Evolution Maggie Tallerman,Kathleen R. Advances in Salivary Diagnostics Charles F. Streckfus.2015-02-03 This book reviews the progress made in salivary diagnostics during the past two decades and identifies the likely direction of future endeavors. After an introductory section describing the histological and anatomical features of the salivary glands and salivary function, salivary collection devices and diagnostic platforms are reviewed. The field of “salivaomics” is then considered in detail, covering, for example, proteomics, the peptidome, DNA and RNA analysis, biomarkers, and methods for biomarker discovery. Salivary diagnostics for oral and systemic diseases are thoroughly discussed, and the role of salivary gland tissue engineering for future diagnostics is explored. The book closes by considering legal issues and barriers to salivary diagnostic development. *Advances in Salivary Diagnostics* will be an informative and stimulating reference for both practitioners and students.

Urban Services to Ecosystems Chiara Catalano, Maria Beatrice Andreucci, Riccardo Guarino, Francesca Bretzel, Manfredi Leone, Salvatore Pasta. 2021-09-15 The aim of this book is to bring together multidisciplinary research in the field of green infrastructure design, construction and ecology. The main core of the volume is constituted by contributions dealing with green infrastructure, vegetation science, nature-based solutions and sustainable urban development. The green infrastructure and its ecosystem services, indeed, are gaining space in both political agendas and academic research. However, the attention is focused on the services that nature is giving for free to and for human health and survival. What if we start to see things from another perspective? Our actions shall converge for instance to turn man-made environment like cities from heterotrophic to autotrophic ecosystems. From landscape ecology to urban and building design, like bricks of a wall, from the small scale to the bigger landscape scale via ecological networks and corridors, we should start answering these questions: what are the services that are we offering to Nature? What are we improving? How to implement our actions? This book contains three Open Access chapters, which are licensed under the terms of the Creative Commons Attribution 4.0 International License (CC BY 4.0).

Degrees of Restructuring in Creole Languages Ingrid Neumann-Holzschuh, Edgar W. Schneider. 2001-02-12 Basic notions in the field of creole studies, including the category of “creole languages” itself, have been questioned in recent years: Can creoles be defined on structural or on purely sociohistorical grounds? Can creolization be understood as a graded process, possibly resulting in different degrees of “radicalness” and intermediate language types (“semi-creoles”)? If so, by which linguistic structures are these characterized, and by which extralinguistic conditions have they been brought about? Which are the linguistic mechanisms underlying processes of restructuring, and how did grammaticalization and reanalysis shape the reorganization of linguistic, specifically morphosyntactic structures commonly called “creolization”? What is the role of language contact, language mixing, substrates and superstrates, or demographic factors in these processes? This volume provides select and revised papers from a 1998 colloquium at the University of Regensburg in which these questions were addressed. 19 contributions by renowned scholars discuss structural, sociohistorical and theoretical aspects, building upon case studies of both Romance-based and English-oriented creoles. This book marks a major step forward in our understanding of the nature of creolization.
