History of Architectural Conservation Jukka Jokilehto.2007-06-07 A History of Architectural Conservation expands knowledge about the conservation of ancient monuments, works of art and historic buildings. It includes the origins of the interest in conservation within the European context, and the development of the concepts from Antiquity and the Renaissance to the present day. Jokilehto illustrates how this development has influenced international collaboration in the protection and conservation of cultural heritage, and how it has formed the principal concepts and approach to conservation and restoration in today's multi-cultural society. This book is based on archival research of original documents and the study of key restoration examples in countries that have influenced the international conservation movement. Accessible and of great interest to students and the general public it includes conservation trends in Europe, the USA, India, Iran and Japan.

Threads and Traces Carlo Ginzburg.2012-09-02 This book is a translation of historian Carlo

Ginzburg's latest collection of essays. Through the detective work of uncovering a wide variety of stories or microhistories from fragments, Ginzburg takes on the bigger questions: How do we draw the line between truth and fiction? What is the relationship between history and memory? Stories range from medieval Europe, the inquisitional trial of a witch, seventeenth-century antiquarianism, and twentieth-century historians--Provided by publisher.

Précis of the Lectures on Architecture Jean-Nicolas-Louis Durand.2000-01-01 Jean-Nicolas-Louis Durand (1760–1834) regarded the *Précis of the Lectures on Architecture* (1802–5) and its companion volume, the *Graphic Portion* (1821), as both a basic course for future civil engineers and a treatise. Focusing the practice of architecture on utilitarian and economic values, he assailed the rationale behind classical architectural training: beauty, proportionality, and symbolism. His formal systematization of plans, elevations, and sections transformed architectural design into a selective modular typology in which symmetry and simple geometrical forms prevailed. His emphasis on pragmatic values, to the exclusion of metaphysical concerns, represented architecture as a closed system that subjected its own formal language to logical processes. Now published in English for the first time, the *Précis* and the *Graphic Portion* are classics of architectural education.

Absorption and Theatricality Michael Fried.1988-09-15 With this widely acclaimed work, Michael Fried revised the way in which eighteenth-century French painting and criticism are viewed and understood. Analyzing paintings produced between 1753 and 1781 and the comments of a number of

critics who wrote about them, especially Dennis Diderot, Fried discovers a new emphasis in the art of the time, based not on subject matter or style but on values and effects.

A Companion to the Archaeology of the Ancient Near East D. T. Potts. 2012-08-15 A COMPANION TO THE ARCHAEOLOGY OF THE ANCIENT NEAR EAST A Companion to the Archaeology of the Ancient Near East is a comprehensive and authoritative overview of ancient material culture from the late Pleistocene to Late Antiquity. This expansive two-volume work includes 58 new essays from an international community of ancient Near East scholars. With coverage extending from Asia Minor, the eastern Mediterranean, and Egypt to the Caucasus, Central Asia, and the Indo-Iranian borderlands, the book highlights the enormous variation in cultural developments across roughly 11,000 years of human endeavor. In addition to chapters devoted to specific regions and particular periods, many contributors concentrate on individual industries and major themes in ancient Near Eastern archaeology, ranging from metallurgy and agriculture to irrigation and fishing. Controversial issues, including the nature and significance of the antiquities market, ethical considerations in archaeological praxis, the history of the foundation of departments of antiquities, and ancient attitudes towards the past, make this a unique collection of studies that will be of

interest to scholars, students, and interested readers alike.

Terra 2008 Leslie Rainer,Angelyn Bass Rivera,David Gandreau.2011-06-14 Earthen architecture constitutes one of the most diverse forms of cultural heritage and one of the most challenging to preserve. It dates from all periods and is found on all continents but is particularly prevalent in Africa, where it has been a building tradition for centuries. Sites range from ancestral cities in Mali to the palaces of Abomey in Benin, from monuments and mosques in Iran and Buddhist temples on the Silk Road to Spanish missions in California. This volume's sixty-four papers address such themes as earthen architecture in Mali, the conservation of living sites, local knowledge systems and intangible aspects, seismic and other natural forces, the conservation and management of

archaeological sites, research advances, and training.

Seneca the Elder and His Rediscovered ›Historiae ab initio bellorum civilium‹ Maria Chiara Scappaticcio.2020-06-08 The refreshed insights into early-imperial Roman historiography this book offers are linked to a recent discovery. In the spring of 2014, the binders of the archive of Robert Marichal were dusted off by the ERC funded project PLATINUM (ERC-StG 2014 n°636983) in response to Tiziano Dorandi's recollections of a series of unpublished notes on Latin texts on papyrus. Among these was an in-progress edition of the Latin rolls from Herculaneum, together with

Marichal's intuition that one of them had to be ascribed to a certain 'Annaeus Seneca'. PLATINUM followed the unpublished intuition by Robert Marichal as one path of investigation in its own research and work. Working on the Latin P.Herc. 1067 led to confirm Marichal's intuitions and to go beyond it: P.Herc. 1067 is the only extant direct witness to Seneca the Elder's *Historiae*. Bringing a new and important chapter of Latin literature arise out of a charred papyrus is significant. The present volume is made up of two complementary sections, each of which contains seven contributions. They are in close dialogue with each other, as looking at the same literary matter from several points of view yields undeniable advantages and represents an innovative and fruitful step in Latin literary criticism. These two sections express the two different but interlinked axes along which the contributions were developed. On one side, the focus is on the starting point of the debate, namely the discovery of the papyrus roll transmitting the *Historiae* of Seneca the Elder and how such a discovery can be integrated with prior knowledge about this historiographical work. On the other side, there is a broader view on early-imperial Roman historiography, to which the new perspectives opened by the rediscovery of Seneca the Elder's *Historiae* greatly contribute.

Acadie Then and Now Warren A. Perrin, Phil Comeau, Mary Broussard Perrin. 2014-08-18 *Acadie Then and Now: A People's History* is an international collection of articles from 50 authors that chronicles the historical and contemporary realities of the Acadian and Cajun people worldwide. In 1605, French colonists settled Acadie (today Nova Scotia, Canada) and for the next 150 years developed a strong and unique Acadian culture. In 1755, the British conducted forced deportations of the Acadians rendering thousands homeless, and for the next 60 years these exiles migrated to seaports along the Atlantic Ocean and the Gulf of Mexico, eventually settling in new lands. This tragic upheaval did not succeed in extinguishing the Acadians, but instead planted the seeds of many

new Acadies, where today their fascinating culture still thrives. This collection includes 65 articles on the Acadians and Cajuns living today in the American states of Louisiana, Texas, and Maine, in the Canadian provinces of New Brunswick, Nova Scotia, Prince Edward Island, Newfoundland, and Quebec, and in the French regions of Poitou, Belle-Ile-en-Mer, and St-Pierre et Miquelon.

Henry James's Europe Dennis Tredy,Annick Duperray,Adrian Harding.2011 As an American author who chose to live in Europe, Henry James frequentlywrote about cultural differences between the Old and New World. Theplight of bewildered Americans adrift on a sea of European sophisticationbecame a regular theme in his fiction.This collection of twenty-four papers from some

of the world's leading James scholars offers a comprehensive picture of the author's crosscultural aesthetics. It provides detailed analyses of James's perception of Europe - of its people and places, its history and culture, its artists and thinkers, its aesthetics and its ethics - which ultimately lead to a profound reevaluation of his writing. With in-depth analysis of his works of fiction, his autobiographical and personal writings, and his critical works, the collection is a major contribution to current thinking about James, transtextuality and cultural appropriation.

The Voyages of Jacques Cartier Ramsay Cook. 2017-05-24 Jacques Cartier's voyages of 1534, 1535, and 1541 constitute the first record of European impressions of the St Lawrence region of northeastern North America and its peoples. The Voyages are rich in details about almost every aspect of the region's environment and the people who inhabited it. As Ramsay Cook points out in his introduction, Cartier was more than an explorer; he was also Canada's first ethnographer. His accounts provide a wealth of information about the native people of the region and their relations with each other. Indirectly, he also reveals much about himself and about sixteenth-century European attitudes and beliefs. These memoirs recount not only the French experience with the Iroquois, but also the Iroquois' discovery of the French. In addition to Cartier's Voyages, a slightly amended version of H.P. Biggar's 1924 text, the volume includes a series of letters relating to Cartier and the Sieur de Roberval, who was in command of Cartier on the last voyage. Many of these letters appear for the first time in English. Ramsay Cook's introduction, 'Donnacona Discovers Europe,' rereads the documents in the light of recent scholarship as well as from contemporary perspectives in order to understand better the viewpoints of Cartier and the native people with whom he came into contact.

L'Art des Vers Auguste Dorchain.2020-01-25 A l'occasion de sa mort, Auguste Dorchain (1857-1930) fut appelé par Émile Delval le dernier Poète Parnassien, formule ostensiblement panégyrique, qui n'en recouvre pas moins une réalité observable aujourd'hui, à savoir que l'élément constitutif fondamental de la poésie française d'autrefois, le VERS, n'existe plus. Pour l'internaute lambda, ce mot n'évoque plus qu'une ligne de longueur sensiblement inférieure à la largeur de l'écran, éventuellement suivie d'autres semblables, et de signification suffisamment vague, pour échapper à

toute critique. C'est pourquoi le traité de prosodie de Dorchain, est un outil remarquable pour ceux qui cherchent à comprendre et à goûter la poésie classique. Par de nombreux exemples, il établit de manière convaincante que les règles de la versification française ne sont pas arbitraires, mais fondées sur l'acoustique de notre langue, et sur la psychologie de l'âme humaine. Le rythme syllabique, la rime, la césure, la strophe, y font tour à tour l'objet d'une étude approfondie, et de remarques inédites. En écrivant l'Art des Vers, l'auteur se sentait certainement pressé de léguer aux générations à suivre, qui parleraient encore le français, un précieux testament spirituel.

Corpus Jean-Luc Nancy. 2009-08-25 How have we thought “the body”? How can we think it anew? The body of mortal creatures, the body politic, the body of letters and of laws, the “mystical body of Christ”—all these (and others) are incorporated in the word Corpus, the title and topic of Jean-Luc Nancy’s masterwork. Corpus is a work of literary force at once phenomenological, sociological, theological, and philosophical in its multiple orientations and approaches. In thirty-six brief sections, Nancy offers us at once an encyclopedia and a polemical program—reviewing classical takes on the “corpus” from Plato, Aristotle, and Saint Paul to Descartes, Hegel, Husserl, and Freud, while demonstrating that the mutations (technological, biological, and political) of our own culture have given rise to the need for a new understanding of the body. He not only tells the story of this cultural change but also explores the promise and responsibilities that such a new understanding entails. The long-awaited English translation is a bold, bravura rendering. To the title essay are added five closely related recent pieces—including a commentary by Antonia Birnbaum—dedicated in large part to the legacy of the “mind-body problem” formulated by Descartes and the challenge it poses to rethinking the ancient problems of the corpus. The last and most poignant of these essays is “The Intruder,” Nancy’s philosophical meditation on his heart transplant. The book also serves as the

opening move in Nancy's larger project called "The deconstruction of Christianity."
