The Political Fragmentation of Germany Zef M. Segal. 2019-06-18
This book analyses the development of German territorial states in the nineteenth century through the prism of five Mittelstaaten: Bavaria, Saxony, Hanover, Württemberg, and Baden. It asks how a state becomes a place, and argues that it involves a contested and multi-faceted process, one of slow and uneven progress. The study approaches this question from a new and crucial angle, that of spatiality and public mobility. The issues covered range from the geography of state apparatus, the aesthetics of German

cartography and the trajectories of public movement. Challenging the belief that territorial delimitation is primarily a matter of policy and diplomacy, this book reveals that political territories are constructed through daily practices and imagination.

Hidden Cities Fabrizio Nevola, David Rosenthal, Nicholas Terpstra.2022-03-02 This groundbreaking collection explores the convergence of the spatial and digital turns through a suite of smartphone apps (Hidden Cities) that present research-led itineraries in early modern cities as public history. The Hidden Cities apps have expanded from an initial case example of Renaissance Florence to a further five historic European cities. This collection considers how the medium structures new

methodologies for site-based historical research, while also providing a platform for public history experiences that go beyond typical heritage priorities. It also presents guidelines for user experience design that reconciles the interests of researchers and end users. A central section of the volume presents the underpinning original scholarship that shapes the locative app trails, illustrating how historical research can be translated into public-facing work. The final section examines how history, delivered in the format of geolocated apps, offers new opportunities for collaboration and innovation: from the creation of museums without walls, connecting objects in collections to their original settings, to informing decision-making in city tourism management. *Hidden Cities* is a valuable resource for upper-level undergraduates, postgraduates, and scholars across a variety of disciplines including urban history, public history, museum studies, art and architecture, and digital humanities. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Cartographies of Travel and Navigation James R.

Akerman. 2010-11-15 Finding one's way with a map is a relatively recent phenomenon. In premodern times, maps were used, if at all, mainly for planning journeys in advance, not for guiding travelers on the road. With the exception of navigational sea charts, the use of maps by travelers only became common in the modern era; indeed, in the last two hundred years, maps have

become the most ubiquitous and familiar genre of modern cartography. Examining the historical relationship between travelers, navigation, and maps, *Cartographies of Travel and Navigation* considers the cartographic response to the new modalities of modern travel brought about by technological and institutional developments in the twentieth century. Highlighting the ways in which the travelers, operators, and planners of modern transportation systems value maps as both navigation tools and as representatives of a radical new mobility, this collection brings the cartography of travel—by road, sea, rail, and air—to the forefront, placing maps at the center of the history of travel and movement. Richly and colorfully illustrated, *Cartographies of Travel and Navigation* ably fills the void in historical literature on transportation mapping.

Three D. A. Mishani. 2020-08-18 Three seemingly disparate women in Israel are united by a troubling secret in this psychological thriller. When Orna meets Gil on an online dating site, their lackluster affair seems like nothing more than a way to stave off the pain of her recent divorce. But soon it becomes clear that Gil may not be exactly who he claims to be. And Orna's own lies may be weaving an unexpected trap for her. Set against the turbulent backdrop of the gritty Holon neighborhood in Tel Aviv, this enigmatic and intelligent novel is in fact an intricate puzzle. Mishani's first standalone book explores Israel's forgotten margins, unearthing complicated layers, conflicts, and prejudices. At turns shocking, deceptive, and subversive, *Three* is a slow burning psychological thriller from one of Israel's most beloved writers. "[A] thoughtful puzzle mystery. . . . To be sure, there are scenes of genuine terror But there are also surprising plot twists and smart character insights, not to mention some terrific Tel Aviv street scenes." —Marilyn Stasio, *The New York Times* Book Review "Mishani . . . displays a superior gift for psychological suspense in this taut and twisty standalone. . . . Mishani imbues his flawed, plausibly-drawn characters with a

deep melancholy, spinning the noirish elements into a deeply satisfying conclusion. Mishani demonstrates a real flair for literary crime fiction.” —Publishers Weekly

Mapping Space, Sense, and Movement in Florence Nicholas Terpstra, Colin Rose. 2016-02-05 Mapping Space, Sense, and Movement in Florence explores the potential of digital mapping or Historical GIS as a research and teaching tool to enable researchers and students to uncover the spatial, kinetic and sensory dimensions of the early modern city. The exploration focuses on new digital research and mapping projects that engage the rich social, cultural, and artistic life of Florence in particular. One is a new GIS tool known as DECIMA, (Digitally-Encoded Census Information and Mapping Archive), and the other is a smartphone app called Hidden Florence. The international collaborators who have helped build these and other projects address three questions: how such projects can be created when there are typically fewer sources than for modern cities; how they facilitate more collaborative models for historical research into social relations, senses, and emotions; and how they help us interrogate older historical interpretations and create new models of analysis and communication. Four authors examine technical issues around the software programs and manuscripts. Five then describe how GIS can be used to advance and develop existing research projects. Finally, four authors look to the future and consider how digital mapping transforms the communication of research results, and makes it possible to envision new directions in research. This exciting new volume is illustrated throughout with maps, screenshots and diagrams to show the projects at work. It will be essential reading for students and scholars of early modern Italy, the Renaissance and digital humanities.

Materialising Identity Judith Schueler. 2008 Since 1882, the Gotthard Railway, with its fifteen-kilometer-long tunnel under the Gotthard Mountains, has provided a crucial international link through the Swiss Alps, between North-Western Europe and Italy. Its symbolic meaning has never sunk into oblivion. In Swiss society today, references to the railway evoke images of a technological railway project, with allusions to Swiss history, alpine nature, and national identity. Reading this book helps us understand contemporary discussions about the future of the Gotthard Railway, the region in which it lies, and the Swiss national identity. To illustrate to what extent historical actors co-constructed the railway and Swiss identity, the book starts with an engineering discussion about tunneling methods. Then it examines reactions in Switzerland to the inauguration of the railway line. Subsequently, it describes how the railway line was portrayed in travel guides of the belle époque. The last chapter captures the glory days of the Gotthard myth, before and during the Second World War, with a focus on novels and plays in which the Gotthard Tunnel construction occurs. This historical overview offers insight into the multiple roles that technology plays in the construction of a sense of national identity.

Geology of Northwest Africa Alain Piqué. 2001 Northwest Africa comprises a vast territory, from Morocco, Algeria, Tunisia to Mauritania, made up of rocks which range in age from the Archaean (Early Precambrian) to the Quaternary. The book is the result of the author's extensive field studies in many parts of the

covered area and a comprehensive compilation of previously published data. Alain Pique is professor of structural geology at the Universite de Bretagne occidentale, Brest (France).

Austria Walter M. Weiss.2010 Between Lake Constance and Lake Neusiedler, in the middle of the Bregenz Forest and the Vienna Woods, this guide conveys the magnificent, enthralling, and beautiful scenery of Austria. Lofty peaks, deep-cut valleys, crystal-clear lakes, and lush mountain pastures grace this collection of images, along with the lazy meanderings of the Danube, gently rolling hills, terraces of vines, and the Pannonian Plain. Relating the country's grand history, medieval strongholds, baroque palaces, churches, and monasteries are depicted as well as Jugendstil edifices and fantastical contemporary architecture, bearing witness to the cultural diversity of this Alpine republic. The Salzburg Festspiele, the Vienna Boys' Choir, and the waltz plus a vast collection of major works of art are reviewed, forming only a small part of Austria's rich artistic heritage. The charm and comfort of the imperial and royal age of the Habsburgs is captured, having been preserved in many a wine tavern, pub, and coffee house. Idyllic mountain village traditions are illustrated in local costume parades and the celebration of joyous festivals. This travel companion also features the age-old dynasty of the Habsburgs, the musical city of Vienna, the baroque monasteries of the Danube, the mountains of the Hohe Tauern, the culinary delights of Austria, and the country's many achievements in contemporary architecture.
