water, insects impersonate flowers, birds don't fly, frogs come back from the dead, and virgin sharks give birth. Animals, writes Emmanuelle Pouydebat, are lyric poets; they discover and shape the world when they sing, dance, explore, and reproduce. The animal kingdom has been evolving for millions of years, weathering many crises of extinction; this book allows us to draw inspiration from animals' enduring vitality. Pouydebat's text, accompanied by striking color illustrations by artist Julie Terrazoni, offers a catalog of wondrous beings. Pouydebat describes the African bush elephant—the biggest land mammal of them all, but the evolutionary descendant of a tiny animal that stood less than fifty centimeters (nineteen inches) high sixty million years ago; the scaly, toothless pangolin, the world's most endangered mammal—and perhaps its most atypical; the red-lipped batfish, which walks, rather than swims, across the ocean floor; and the great black cockatoo, a gifted percussionist. Chimpanzees, she tells us, self-medicate with medicinal plants; the jellyfish, under stress, reverts to juvenile polyp-hood; and the sweetly named honey badger feeds on reptiles, termites, scorpions, and earthworms. Pouydebat, a researcher at the French Museum of Natural History, and Terrazoni capture the astonishment promised by any excursion into nature—the happiness that comes from watching a dragonfly, spider, frog, lizard, elephant, parrot, mouse, orangutan, or ladybug. It's the joy of witnessing life itself. We need only open our eyes to see.

The Boy Who Climbed into the Moon David

Almond.2010-04-13 Crackpot notions, community spirit, and sky-high aspirations transform a quiet boy's life in this whimsical tale from the stellar team of David Almond and Polly Dunbar. Then there's Clarence, the poodle who thinks he can fly. But the strangest notion of all is Paul's. You see, Paul believes that the moon is not the moon but a great hole in the sky. And he knows that sausages are better than war. How on earth (or not) will he find out if he is bonkers or a genius? With a few equally bonkers (or genius) helpers and a very long ladder, that's how! From a master of magical realism and a celebrated artist comes another delightfully outrageous expedition.

Darwin and the True Story of the Dinosaurs Luca

Novelli.2017 When Charles Darwin published The Origin of Species in 1859, he shocked the world. In it he claimed that humans were just another animal species that had evolved from more primitive life forms. Years earlier, Darwin had collected thousands of animal specimens during a five-year voyage around the world, specimens that he used to make his case for biologic evolution through natural selection. Darwin and the True Story of the Dinosaurs tells the story of the brilliant naturalist who changed humankind's understanding of its origins.

Just as day turns into night and back again, a many-tiered cake is both created and eaten down to a single piece. With simple, graphic illustrations sure to appeal to even the youngest of children, this smart exploration of the fascinating theme of before and after will please the most discerning adult readers, too.

Beyond the Station Lies the Sea Jutta Richter.2011-12-28 This fable-like novella about a homeless boy's quest to make it to the beach offers "a darkly poetic, masterfully crafted view of life on the streets" (Publishers Weekly). Niner and Cosmos offer their only item of value—Niner’s guardian angel. Once they’ve set out, Niner takes a turn for the worse, and Cosmos realizes he needs that guardian angel back to save his friend. An arresting tale for readers young and old, *Beyond the Station Lies the Sea* is a terrific addition to Jutta Richter’s beloved body of work. “Weaving together the spare symbolism of fable and the magical high stakes of fairy tale, this skillfully written novella by an award-winning German author offers much food for reflection. While the subject matter is difficult, the story is universal; not tied to place or culture, it remains open to broad interpretation. A good choice for discussion.” —Kirkus Reviews
