Blue Ocean Strategy + Beyond Disruption Collection (2 Books) W. Chan Kim, Renée A.

Mauborgne. 2024-01-09 The two landmark books, *Blue Ocean Strategy* and *Beyond Disruption*, that together challenge everything you thought you knew about winning the future. These two iconic books, *Blue Ocean Strategy* and *Beyond Disruption*, together changed how the world thinks about strategy and innovation. *Blue Ocean Strategy*, the #1 global bestseller, reframed strategy not as a game between rivals fighting over markets and customers but as a new approach to creating markets and attracting customers—in untapped new market spaces free of competition. Just as *Blue Ocean Strategy* redefines the essence of strategy, *Beyond Disruption* redefines and expands the existing view of innovation by introducing a new approach, nondisruptive creation, that is free from the destructive displacement of jobs, people, companies, and industries that happens when companies set out to disrupt. Taken together, these bestselling books will help you chart a bold new path to winning the future.

Quality Services in Academic Libraries Felicia Etim.2016-06-25 There is great consistency throughout these articles, research projects, management schemes, and standards, in and out of librarianship. Does the repetition suggest that the lessons have not yet been learned? Rather, it may be that there is no new silver bullet or shortcut for academic libraries. Experience reveals that one may have the formal process without getting good results and vice versa; the determining factor is whether the library staff, managers, and stakeholders define certain fundamental assumptions about the nature of the enterprise. All the above have in common the following underlying components: The careful definition of goals or of some kind of criteria against which success can be assessed A focus on meeting the needs of the users, as defined by the library and the institution Leadership: a commitment from the top, conscious efforts at ensuring communication, the provision of training and resources for the process of evaluation, the active support of a process to promote shared values The involvement of all levels of staff in goal setting, evaluation, and the improvement of processes and services Integrating a process of evaluation that is continuous and adaptive, whether that

process is based on the framework of TQM, strategic planning, or another model
