Personal Days Ed Park.2009-10-06 Ever wondered what your boss does all day?Or if there is a higher - perhaps an existential - significance to Microsoft Word malfunctions? Filled with sabotage and romance and capturing the relentless monotony and paranoia of office life with unnerving precision, *Personal Days* is a scathingly funny look at a group of office workers who have no idea what the unnamed corporation they work for actually does. When it looks like the company may be taken over, fear of redundancy unleashes a delicious mystery. Meet Pru, the ex-graduate turned spreadsheet drone; Laars, the hysteric whose work anxiety follows him into tooth-grinding dreams; and Jonah, the secret striver who must pick his allegiance... Each struggling to figure out who among them is trying to bring down the company, and why.

The Return of the Mother Andrew Harvey.2013-08-20 Adapted from a series of lectures on the historical basis and current resurgence of the sacred feminine, given by Andrew Harvey at the California Institute of Integral Studies in Spring 1994, *The Return of the Mother* is a profound journey into the heart of the Divine Mother. In this comprehensive and groundbreaking work, mystical scholar Andrew Harvey unearths traces of the sacred feminine in major world religions—Hinduism, Islam (Sufism), Buddhism, Taoism, and Christianity—and in aboriginal and indigenous wisdom traditions. Harvey presents a scathing critique of the patriarchal distortions in religious history and doctrine that have obscured full knowledge of the Divine Mother, and shows how to reintegrate this vital aspect into the spiritual consciousness of humankind. *The Return of the Mother* offers a

radical new perspective, balancing the historical overemphasis on transcendence by honoring the immanence of the divine in passionate engagement in the world. Only by cultivating a direct, respectful relationship with the transformative power of the sacred feminine can we alter our disastrous attitude of dissociation from nature, the body, sexuality, and the details of human life, and generate the energy and compassion needed to reverse the course of destruction we have set the planet—and all of life—hurtling toward. In lively question-and-answer sections, Harvey further illuminates these vital issues and takes a strong stand against our dependence on “gurus” and “masters,” proposing instead an egalitarian model of spiritual community based on intimate groups of mutually supportive guides and friends. *The Return of the Mother* is an eloquent and passionate call for all of us to rediscover and reclaim an authentic and empowering relationship to the divine, and recreate a sacred life-in-the-world.

National Museums and Nation-building in Europe

1750-2010 Peter Aronsson, Gabriella Elgenius. 2014-12-05

Europe’s national museums have since their creation been at the centre of on-going nation making processes. National museums negotiate conflicts and contradictions and entrain the community sufficiently to obtain the support of scientists and art connoisseurs, citizens and taxpayers, policy makers, domestic and foreign visitors alike. *National Museums and Nation-building in Europe 1750-2010* assess the national museum as a manifestation of cultural and political desires, rather than that a straightforward representation of the historical facts of a nation. *National Museums and Nation-building in Europe 1750-2010* examines the degree to which national museums have created models and representations of nations, their past, present and future, and proceeds to assess the consequences of such attempts. Revealing how different types of nations and states – former empires, monarchies, republics, pre-modern, modern or

post-imperial entities - deploy and prioritise different types of museums (based on art, archaeology, culture and ethnography) in their making, this book constitutes the first comprehensive and comparative perspective on national museums in Europe and their intricate relationship to the making of nations and states.

Sakura's Cherry Blossoms Robert Paul Weston.2018-02-20 A warm, gorgeous exploration of a little girl's experience immigrating to a new country and missing her home and her grandmother, who still lives far away. Sakura's dad gets a new job in America, so she and her parents make the move from their home in Japan. When she arrives in the States, most of all she misses her grandmother and the cherry blossom trees, under which she and her grandmother used to play and picnic. She wonders how she'll ever feel at home in this new place, with its unfamiliar language and landscape. One day, she meets her neighbor, a boy named Luke, and begins to feel a little more settled. When her grandmother becomes ill, though, her family takes a trip back to Japan. Sakura is sad when she returns to the States and once again reflects on all she misses. Luke does his best to cheer her up -- and tells her about a surprise he knows she'll love, but she'll have to wait till spring. In the meantime, Sakura and Luke's friendship blooms and finally, when spring comes, Luke takes her to see the cherry blossom trees flowering right there in her new neighborhood. *Sakura's Cherry Blossoms* captures the beauty of the healing power of friendship through Weston's Japanese poetry-inspired text and Saburi's breathtaking illustrations.

Biological and Chemical Oceanography Austin

Brennan.2021-11-16 The study of the ocean and its biological and physical aspects is known as oceanography. It is an earth science that includes a wide range of topics such as ocean current, ecosystem, and geophysical fluid dynamics. It also encompasses

the study of plate tectonics as well as the geology of the sea floor. It examines different physical properties and chemical substances found in the ocean and across its boundaries. It blends the understanding of the processes within a number of disciplines like biology, chemistry, climatology, geology, geography, hydrology, physics and astronomy in order to acquire an in-depth knowledge of the oceans. Biological oceanography and chemical oceanography are two primary branches of oceanography. Biological oceanography includes the ecology of marine organisms. The study is done on the basis of the ecological characteristics of an individual organism and the physical, chemical and geological aspects of its ocean environment. The chemistry of the ocean is studied under chemical oceanography. It is concerned with the understanding of seawater properties. This book covers in detail some existent theories and innovative concepts revolving around biological and chemical oceanography. It includes contributions made by international experts. It is meant for students who are looking for an elaborate reference text on these disciplines.

Random Walks on Disordered Media and their Scaling Limits

Takashi Kumagai.2014-01-25 In these lecture notes, we will analyze the behavior of random walk on disordered media by means of both probabilistic and analytic methods, and will study the scaling limits. We will focus on the discrete potential theory and how the theory is effectively used in the analysis of disordered media. The first few chapters of the notes can be used as an introduction to discrete potential theory. Recently, there has been significant progress on the theory of random walk on disordered media such as fractals and random media. Random walk on a percolation cluster('the ant in the labyrinth')is one of the typical examples. In 1986, H. Kesten showed the anomalous behavior of a random walk on a percolation cluster at critical probability. Partly motivated by this work, analysis and diffusion processes on fractals have been developed since the late eighties.

As a result, various new methods have been produced to estimate heat kernels on disordered media. These developments are summarized in the notes.

Leadership for a Better World NCLP (National Clearinghouse for Leadership Programs). 2016-11-14 The essential guide to the theory and application of the Social Change Model Leadership for a Better World provides an approachable introduction to the Social Change Model of Leadership Development (SCM), giving students a real-world context through which to explore the seven C's of leadership for social change as well as approaches to socially responsible leadership. From individual, group, and community values through the mechanisms of societal change itself, this book provides fundamental coverage of this increasingly vital topic. Action items, reflection, and discussion questions throughout encourage students to think about how these concepts apply in their own lives. The Facilitator's Guide includes a wealth of activities, assignments, discussions, and supplementary resources to enrich the learning experience whether in class or in the co-curriculum. This new second edition includes student self-assessment rubrics for each element of the model and new discussion on the critical roles of leadership self-efficacy, social perspective, and social justice perspectives. Content is enriched with research on how this approach to leadership is developed, and two new chapters situate the model in a broader understanding of leadership and in applications of the model. The Social Change Model is the most widely-used leadership model for college students, and has shaped college leadership curricula at schools throughout the U.S. and other countries including a translation in Chinese and Japanese. This book provides a comprehensive exploration of the model, with a practical, relevant approach to real-world issues. Explore the many facets of social change and leadership Navigate group dynamics surrounding controversy, collaboration, and purpose Discover the meaning of citizenship and your commitment to the

greater good Become an agent of change through one of the many routes to a common goal The SCM is backed by 15 years of research, and continues to be informed by ongoing investigation into the interventions and environments that create positive leadership development outcomes. Leadership for a Better World provides a thorough, well-rounded tour of the Social Change Model, with guidance on application to real-world issues. Please note that The Social Change Model: Facilitating Leadership Development (978-1-119-24243-7) is intended to be used as a Facilitator's Guide to Leadership for a Better World, 2nd Edition in seminars, workshops, and college classrooms. You'll find that, while each book can be used on its own, the content in both is also designed for use together. The Ungovernable Society Grégoire Chamayou.2021-05-03 Rebellion was in the air. Workers were on strike, students were demonstrating on campuses, discipline was breaking down. No

relation of domination was left untouched – the relation between the sexes, the racial order, the hierarchies of class, relationships in families, workplaces and colleges. The upheavals of the late 1960s and early 1970s quickly spread through all sectors of social and economic life, threatening to make society ungovernable in the eyes of ruling elites. This crisis was also the birthplace of the authoritarian liberalism which continues to cast its shadow across the world in which we now live. To ward off the threat, new arts of government were devised in business-related circles, which included a war against the trade unions, the primacy of shareholder value and a dethroning of politics. The neoliberalism that thus began its triumphal march was not, however, determined by a simple ‘state phobia’ and a desire to free up the economy from government interference. On the contrary, the strategy for overcoming the crisis of governability consisted in an authoritarian liberalism in which the liberalization of society went hand-in-hand with new forms of power imposed from above: a ‘strong state’ for a ‘free economy’ became the new magic formula of our capitalist societies. Grégoire Chamayou analyses this crisis as it was perceived and theorized in the 1970s by those who strove to defend the interests of business – that is, the ruling elites, especially in the United States, from which a far-reaching intellectual and political movement spread. The new arts of government they devised are still with us today and we can understand their nature and lasting influence only by re-examining the history of the conflicts that brought them into being.

The Museum Age Germain Bazin.1967

My Darkest Years James Bachner.2010-06-25 Born in Berlin in 1922, James Bachner was a German Jew during the darkest days of the Third Reich. Once a happy child in a well-to-do German family, as the years passed Bachner faced first ridicule and persecution, then imprisonment and deprivation. Attributing his survival to a combination of strength and being in the right place at the right time, Bachner's memoir is a poignant and often horrific account of Jewish struggles during the days of World War II. Beginning with his idyllic childhood, Bachner expresses the range of emotions he experienced as the Nazis transformed his homeland into a nation where he and his fellow Jews were no longer welcome. He describes the volatile political atmosphere and the fears inspired in all Germans by tales of the concentration camps. In addition, he tells of the belief many Jews held that the West would step in and put an end to Hitler's reign. The work then details the realities of life in a concentration camp. The end of the war, Bachner's reunion with his remaining family members and his eventual relocation to America are also discussed.

Toronto Cooks Amy Rosen.2014 There has never been a more exciting time to eat in Toronto. While always known for its vibrant and varied food scene, over the past few years the city has been experiencing a culinary explosion. Innovative, globally minded, locally focused restaurants have been cropping up all over town as Toronto evolves into one of the world's greatest places to eat. **Toronto Cooks: 100 Signature Recipes from the City's Best Restaurants** captures this evolution specifically with the home cook in mind. Dozens of our greatest chefs, from veteran to rising

star, have generously shared their fan-favourite, personally tested recipes, ranging from the decadent (The Grove's foie gras, hibiscus, beet and lingonberry) to the sublime (Momofuku Milk Bar's Crack Pie®). This collection covers the entire menu, with starters (prawns from Amaya, Richmond Station's country terrine), soups (Tabule's lemony lentil), salads (roasted mushroom from Splendido), entrées (Bymark's fennel-cruste black cod), desserts (Edulis's baba au rhum), and even a cocktail or two (Geraldine's Charlemagne). An amazing compilation that is as diverse as the city itself. Some creations are elevated comfort food (Ruby Watchco's braised short ribs or Pizza Libretto's spicy meatballs), while others are definitely designed to impress (Café Boulud's crispy duck egg à la bourguignonne and Bosk's potato gnocchi with forest mushroom and tomato emulsion). But all are spectacular, and ultimately doable for the home chef. Beautifully illustrated throughout by acclaimed photographer Ryan Szulc, Toronto Cooks is the perfect book for those who want to recreate their favourite dining experiences in their very

Lebanon in Limbo Theodor Hanf,Nawwāf Salām.2003 Twelve years after the wars ended, the country of Lebanon entered a state of limbo. It was no longer in the center of the Middle Eastern conflicts, yet it remained under the impact of the region's conflicts. Ethno-religious communities persisted, with a modernization of their co-existence. However, the entrepreneurial middle classes had become weakened by emigration, and social cleavages deepened. Considerable achievements in reconstruction were followed by economic stagnation. The danger of authoritarianism by diffusion could not be overlooked. In this reprint - originally published in 2003 - a representative survey shows what lessons the Lebanese learned from the war. They refused the use of violence and war. Their willingness to co-exist in diversity increased. The citizens have not particularly valued their political leaders, yet they remain democratic by conviction.

◆ [A] fascinating volume, which establishes marine environmental history as a major new discipline for academics as well as an exciting way to bring history and the natural world alive for the public. ◆ ANDREW A. ROSENBERG, UNIVERSITY OF NEW HAMPSHIRE ◆ The HMAP project is to be congratulated on this book, which presents vivid, evidence-based reconstructions of historical fisheries and the prolific ecosystems in which they were embedded. ◆ TONY J. PITCHER, UNIVERSITY OF BRITISH COLUMBIA ◆ The ingenuity and scholarship of the authors allow us to see ... how human societies have depended on and influenced marine living resources from periwinkles to whales. ◆ MIKE SINCLAIR, BEDFORD INSTITUTE OF OCEANOGRAPHY ◆ This book exalts the surprisingly fruitful marriage of historians and marine scientists - a union that has proven to be one of the most exciting developments in ocean research in recent years. ◆ KATHERINE RICHARDSON, UNIVERSITY OF COPENHAGEN ◆ For centuries the seas appeared to offer limitless supplies of food and other resources, their waters a cornucopia never to be exhausted. In more recent times, episodes such as the extreme exploitation and subsequent collapse of cod populations of the Grand Banks off Newfoundland have highlighted the fallaciousness of this view. Yet all too often the lessons from our historical interactions with marine animals are little known, let alone learned. Based on research for the History of Marine Animal Populations project, *Oceans Past* examines the complex relationship our forebears had with the sea and the animals that inhabit it. It presents eleven studies ranging from fisheries and invasive species to offshore technology and the study of marine environmental history, bringing together the perspectives of historians and marine scientists to enhance understanding of ocean management of the past, present and future. In doing so, it also highlights the influence that changes in marine ecosystems have upon the politics, welfare and culture of

human societies.

Capitals of Capital Youssef Cassis.2006-11-23 International financial centres have come to represent a major economic stake. Yet no historical study has been devoted to them. Professor Cassis, a leading financial historian, attempts to fill this gap by providing a comparative history of the most important centres that constitute the capitals of capital - New York, London, Frankfurt, Paris, Zurich, Amsterdam, Tokyo, Hong Kong, Singapore - from the beginning of the industrial age up to the present. The book has been conceived as a reflection on the dynamics of the rise and decline of international financial centres, setting them in their economic, political, social, and cultural context. While rooted in a strong and lively historical narrative, it draws on the concepts of financial economics in its analysis of events. It should widely appeal to business and finance professionals as well as to scholars and students in financial and economic history.

Coarse Geometry and Randomness Itai Benjamini.2013-12-02

These lecture notes study the interplay between randomness and geometry of graphs. The first part of the notes reviews several basic geometric concepts, before moving on to examine the

manifestation of the underlying geometry in the behavior of random processes, mostly percolation and random walk. The study of the geometry of infinite vertex transitive graphs, and of Cayley graphs in particular, is fairly well developed. One goal of these notes is to point to some random metric spaces modeled by graphs that turn out to be somewhat exotic, that is, they admit a combination of properties not encountered in the vertex transitive world. These include percolation clusters on vertex transitive graphs, critical clusters, local and scaling limits of graphs, long range percolation, CCCP graphs obtained by contracting percolation clusters on graphs, and stationary random graphs, including the uniform infinite planar triangulation (UIPT) and the stochastic hyperbolic planar quadrangulation (SHIQ).

Random Obstacle Problems Lorenzo Zambotti.2017-02-27 Studying the fine properties of solutions to Stochastic (Partial) Differential Equations with reflection at a boundary, this book begins with a discussion of classical one-dimensional diffusions as the reflecting Brownian motion, devoting a chapter to Bessel processes, and moves on to function-valued solutions to SPDEs. Inspired by the classical stochastic calculus for diffusions, which is unfortunately still unavailable in infinite dimensions, it uses integration by parts formulae on convex sets of paths in order to describe the behaviour of the solutions at the boundary and the contact set between the solution and the obstacle. The text may serve as an introduction to space-time white noise, SPDEs and monotone gradient systems. Numerous open research problems in both classical and new topics are proposed.

The Rejection of Consequentialism Samuel Scheffler.1994-08-11

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.
