TransArea Ottmar Ette.2016-07-11 Ottmar Ette's TransArea proceeds from the thesis that globalization is not a recent phenomenon, but rather, a process of long duration that may be divided into four main phases of accelerated globalization. These phases connect our present, across the world's widely divergent modern eras, to the period of early modern history. Ette demonstrates how the literatures of the world make possible a tangible perception of that which constitutes Life, both of our planet and on our planet, which may only be understood through the application of multiple logics. There is no substitute for the knowledge of literature: it is the knowledge of life, from life. This English translation will be of great interest to English-speaking scholars in the fields of Global and Area Studies, Literary Studies, Cultural Studies, History, Political Science, and many more. About the author Ottmar Ette has been Chair of Romance Literature at the University of Potsdam, Germany, since 1995. He is Honorary Member of the Modern Language Association of America (MLA) (elected in 2014), member of the Berlin-Brandenburg Academy of Sciences and Humanities (elected in 2013), and regular member of the Academia Europaea (since 2010).

The Ethics of Archaeology Chris Scarre,Geoffrey Scarre.2006-01-19 The question of ethics and their role in archaeology has stimulated one of the discipline's liveliest debates. In this collection of essays, first published in 2006, an international team of archaeologists, anthropologists and philosophers explore the ethical issues archaeology needs to address. Marrying the skills and expertise of practitioners from different disciplines, the collection produces interesting insights into many of the ethical dilemmas facing archaeology today. Topics discussed include relations with indigenous peoples; the professional standards and responsibilities of researchers; the role of ethical codes; the notion of value in archaeology; concepts of stewardship and custodianship; the meaning and moral implications of 'heritage'; the question of who 'owns' the past or the interpretation of it; the trade in antiquities; the repatriation of skeletal material; and treatment of the dead. This important collection is essential reading for all those working in the field of archaeology, be they scholar or practitioner.

Archaeogaming Andrew Reinhard.2018-06-18 Video games exemplify contemporary material objects, resources, and spaces that people use to define their culture. Video games also serve as archaeological sites in the traditional sense as a place, in which evidence of past activity is preserved and has been, or may be, investigated using the discipline of archaeology, and which represents a part of the archaeological record. This book serves as a general introduction to archaeogaming; it describes the intersection of archaeology and video games and applies archaeological method and theory into understanding game-spaces as both site and artifact.

Death in Luxor Graham Warren.2017-10-18 Death in Luxor is a page turning modern-day adventure set in an Egypt full of ancients. Having survived an attack by three-thousand-year-old soldiers by the narrowest of margins, Kathryn - Kate to her friends - enters the second week of her holiday in Luxor, only this is no holiday. Armed with the knowledge that the unknown Pharaoh Nakhtifi not only existed - he exists, and he is the most important member of her ancient family, this is now a battle for her life and his afterlife. Kate having 'seen', her young mind is in turmoil. Her own traumas, such as the recent unexpected death of her mother, sit uneasily alongside memories of a complete ancient life which she struggles to make sense of.

This is not good for the people around her. It is a prerequisite for Kate to be in control. When she is not, even small things, a wrong word, a glance, can send her into a rage. This her friends, Alex and Cairo, can attest to. Alex even has the bruises to prove it! The three friends are up against an ancient magician, a warlock, who, though imprisoned in a tomb, has brought nothing except trouble to the afterlife for thousands of years. His ancient magic is very powerful, he has supporters who do his dirty work for him, and he, above anything else, wants to permanently remove Pharaoh Nakhtifi from the afterlife. Help, or perhaps hindrance, comes in the form of the red wine drinking ancients Ramses II and Alexander the Great, not forgetting the beautiful ancient cat god Bast. Ultimately though, this is a power struggle which only Kate, Alex and Cairo can resolve, because ancients can only see and travel the world as it was in their time. Kate may have plenty of attitude, but she and Alex are forced to weave their adventures between the needs of the oldies. Aggie, Kate's guardian, enjoys nothing more than drinking and gossiping with the expat community. Alex's father, a world-renowned archaeologist, is in his element checking out a prospective dig. Though when not doing so, he enjoys showing off his knowledge of ancient Egypt to anyone who will listen, whilst his wife flounders. Join Kate, Alex and their Egyptian friend Cairo as they meet ancient gods and pharaohs, and find out how modern academics have got it all wrong. Visit tombs and temples with them, and experience fear, friendship and humour in equal parts. In the week when Kate should be celebrating her 14th birthday, not everyone will survive to enjoy the day!

A Shadow of War Claudia Theune.2017-08-30 This book presents archaeological research from places of war, violence, protest and oppression of the 20th and the 21st century; sites where the material relics give a deep insight to fateful events - a shadow of war. Alongside renewed interest in National Socialism and the Holocaust, archaeological interest started in former concentration camps of the Nazi dictatorship. The focus was on the central places of the camps, such as the gas chambers, the crematoria, or execution sites, as well as prisoners' barracks and the parade ground. In many cases, these sites revealed forgotten and vanished structures, where archaeological excavations can offer the possibility for commemorating the victims. The research has since widened and includes other sites of Nazi dictatorship and the Second World War, as well as the First World War, the Cold War and locations of civil wars and civilian protest against state authorities and against companies and corporations in many parts of the world. In order to come to a comprehensive understanding contemporary archaeology must take a global perspective. Archaeological finds often shed light on daily life, revealing survival conditions in the internment camps; the lives of people and their fighting and dying on battlefields and in trenches. Likewise, the relics of politically active people in protest camps give an impression of their commitment in civilian protest. Sometimes material remains can help to tell an alternative or balancing narrative to the state's official recorded history. The enormous volume and diverse range of material culture presents challenges and opportunities. Through careful archaeological investigation, we can present different and new perspectives that are not recorded clearly in existing written, pictorial or oral archives. The merging and examination of all sources together is what enables us to understand the complexity of the history. This book will also present future directions in contemporary archaeology that will help bring the study focus beyond sites and assemblages of war and protest.

Lost in the White Desert Graham Warren.2019-04-06 Ramses II, living as an ancient in modern day Luxor, is about to set out across the White Desert. His insistence that he is going to visit a friend does not ring true to Kate and Alex. If this is such a friendly visit, then why is Ramses so vehement that they must remain in Luxor? And, more to the point, why is Ramses moving with the vast contingent of his massive army? Does visiting a friend really warrant such a show of force? Kate and Alex are determined not to let Ramses leave Luxor without them. Unable to come up with a workable plan, time is against them, when Cairo turns up with the perfect solution ... at least it starts out as perfect! A bitter ancient Queen has a

score to settle with Kate. A powerful ancient magician has a plan, developed over centuries, to take his revenge on Ramses. Tutankhamun comes to the aid of Alex, in a rather strange ancient temple where Kate and Cairo are missing. Can anybody be trusted in this page turning adventure?

Contested Pasts Katharine Hodgkin, Susannah Radstone.2003-09-02 This inter-disciplinary volume demonstrates, from a range of perspectives, the complex cultural work and struggles over meaning that lie at the heart of what we call memory. In the last decade, a focus on memory in the human sciences has encouraged new approaches to the study of the past. As the humanities and social sciences have put into question their own claims to objectivity, authority and universality, memory has appeared to offer a way of engaging with knowledge of the past as inevitably partial, subjective and local. At the same time, memory and memorial practices have become sites of contestation, and the politics of memory are increasingly prominent.

Friedrich Rosen Amir Theilhaber.2020-09-07 The German lacuna in Edward Said's 'Orientalism' has produced varied studies of German cultural and academic Orientalisms. So far the domains of German politics and scholarship have not been conflated to probe the central power/knowledge nexus of Said's argument. Seeking to fill this gap, the diplomatic career and scholarly-literary productions of the centrally placed Friedrich Rosen serve as a focal point to investigate how politics influenced knowledge generated about the "Orient" and charts the roles knowledge played in political decision-making regarding extra-European regions. This is pursued through analyses of Germans in British imperialist contexts, cultures of lowly diplomatic encounters in Middle Eastern cities, Persian poetry in translation, prestigious Orientalist congresses in northern climes, leveraging knowledge in high-stakes diplomatic encounters, and the making of Germany's Islam policy up to the Great War. Politics drew on bodies of knowledge and could promote or hinder scholarship. Yet, scholars never systemically followed empire in its tracks but sought their own paths to cognition. On their own terms or influenced by "Oriental" savants they aligned with politics or challenged claims to conquest and rule.

Reciprocity in Ancient Greece Christopher Gill, Norman Postlethwaite, Richard Seaford.1998 Reciprocity has been seen as an important notion for anthropologists studying economic and social relations, and this volume examines it in connection with Greek culture from Homer to the Hellenistic period.

Critical Terms for Literary Study, Second Edition Frank Lentricchia, Thomas McLaughlin.2010-05-15 Since its publication in 1990, *Critical Terms for Literary Study* has become a landmark introduction to the work of literary theory—giving tens of thousands of students an unparalleled encounter with what it means to do theory and criticism. Significantly expanded, this new edition features six new chapters that confront, in different ways, the growing understanding of literary works as cultural practices. These six new chapters are Popular Culture, Diversity, Imperialism/Nationalism, Desire, Ethics, and Class, by John Fiske, Louis Menand, Seamus Deane, Judith Butler, Geoffrey Galt Harpham, and Daniel T. O'Hara, respectively. Each new essay adopts the approach that has won this book such widespread acclaim: each provides a concise history of a literary term, critically explores the issues and questions the term raises, and then puts theory into practice by showing the reading strategies the term permits. Exploring the concepts that shape the way we read, the essays combine to provide an extraordinary introduction to the work of literature and literary study, as the nation's most distinguished scholars put the tools of critical practice vividly to use.

The Heuneburg and the Early Iron Age Princely Seats Dirk Krausse, Manuel Fernández-Götz, Leif Hansen, Inga Kretschmer.2016 The Heuneburg

on the Upper Danube is one of the best-studied sites of the European Iron Age. Recent research has radically changed our traditional understanding of this central place, which in the 6th century BC covered an area of about 100 hectares. As we argue in the book, the settlement can be classified as the first city north of the Alps. This volume has two main, interconnected aims: to provide the first synthesis in English on the archaeology of the Heuneburg and its surroundings, including the rich burial evidence and the hillforts in the vicinity; and to set the development of this important Early Iron Age site into the broader context of the centralisation and urbanisation processes of the Late Hallstatt period. The final chapter includes an overview of the main contemporaneous sites in Temperate Europe, from Bourges and Mont Lassois in France to Závist in the Czech Republic.

Experiments Past Jodi Reeves Flores, Roeland Paardekooper. 2014 With Experiments Past the important role that experimental archaeology has played in the development of archaeology is finally uncovered and understood. Experimental archaeology is a method to attempt to replicate archaeological artefacts and/or processes to test certain hypotheses or discover information about those artefacts and/or processes. It has been a key part of archaeology for well over a century, but such experiments are often embedded in wider research, conducted in isolation or never published or reported. Experiments Past provides readers with a glimpse of experimental work and experience that was previously inaccessible due to language, geographic and documentation barriers, while establishing a historical context for the issues confronting experimental archaeology today. This volume contains formal papers on the history of experimental methodologies in archaeology, as well as personal experiences of the development of experimental archaeology from early leaders in the field, such as Hans-Ole Hansen. Also represented in these chapters are the histories of experimental approaches to taphonomy, the archaeology of boats, building structures and agricultural practices, as well as narratives on how experimental archaeology has developed on a national level in several European countries and its role in encouraging a wide-scale interest and engagement with the past.

Portals to the Past and to the Future Jürgen Seefeldt, Ludger Syré. 2017 The advent of the digital era has raised questions on the future course of library development. The challenge of maintaining a balance between their educational, cultural and service roles has presented libraries with new challenges - challenges which their rich and varied media holdings, modern technical infrastructure and information specialist competence well equip them to face. This fourth revised and updated English edition of *Portals to the Past and to the Future* by Jürgen Seefeldt and Ludger Syré, now in its fifth German edition, is an in-depth state-of-the-art report on current German librarianship. Lavishly illustrated, the book traces the history of libraries in Germany, portrays the various types of library and cites many examples of the outstanding achievements of nationwide library cooperation in the Federal Republic of Germany. The reader will gain both a revealing insight into the cultural and educational policy underlying the German library system and an outline of the profession. Special attention has been paid to current developments such as the preservation and presentation of the common cultural heritage and the emergence of the digital library. This book has been translated not only into English but also into Arabic, Italian, Japanese, Spanish, Russian and Turkish and is now the standard work on libraries and librarianship in Germany. Because of the interest it has generated internationally, it was decided to publish the German and English versions of this new edition simultaneously. The book provides trainee librarians and non-librarians alike with a clear picture of the way in which libraries were able to cooperate in the aftermath of the Second World War to overcome the vagaries of the federal system and create an effective decentralized library network more than a match for the challenges of the third millennium.

The Value of an Archaeological Open-air Museum is in Its Use Roeland Paardekooper.2012 There are about 300 archaeological open-air museums in Europe, which do more than simply present (re)constructed outdoor sceneries based on archaeology. They have an important role as education facilities and many showcase archaeology in a variety of ways. This research assesses the value of archaeological open-air museums, their management and their visitors, and is the first to do so in such breadth and detail. After a literature study and general data collection among 199 of such museums in Europe, eight archaeological open-air museums from different countries were selected as case studies. Management and visitors have different perspectives leading to different priorities and appreciation levels. The studies conclude with recommendations, ideas and strategies which are applicable not just to the eight archaeological open-air museums under study, but to any such museum in general. The recommendations are divided into the six categories of management, staff, collections, marketing, interpretation and the visitors.

Feasting, Craft and Depositional Practice in Late Bronze Age Palaepaphos Constance von Rügen,Artemis Georgiou,Ariane Jacobs,Paul Halstead.2016-12-29

The Bronze Age in Europe J. M. Coles,A. F. Harding.2014-10-30 This book provides an account of the development of European culture and society during the Bronze Age, the time span between c. 2000 and 700 BC. It was a period of remarkable innovation, seen for instance in the development and growth of metallurgy as a major industry, the spread of trading contacts, the origins of urbanism and the beginnings of social stratification. The study is divided chronologically into two, the earlier and later Bronze Age, giving a clear picture of the nature of the radical changes which occurred in the period as a whole. The geographical area covered, from the Atlantic shores across Europe into the Soviet Union and from northern Scandinavia to the Mediterranean, is too vast to be taken as one unit, and has been broken down into five regions; each is discussed in terms of settlement form, burial practices, ritual and religious sites, material culture, economic and social background, and trading patterns. The book describes and develops common themes that link together the different areas and cultural groups, rather than taking the typographical approach often adopted by Bronze Age specialists, and uses the results of radiocarbon dating to establish an objective chronology for the period. The text is generously illustrated and fully documented with radiocarbon dating tables and extensive bibliography. Our understanding of Bronze Age Europe is still increasing, but no other book of this scope had been written before this, in 1979. It is a major study of its time of interest to anyone looking beyond popular accounts of the day.

The Destroyed Synagogues of Vienna Bob Martens, Herbert Peter (Dipl.-Ing.). 2011 This book is devoted to the former Viennese synagogues that were destroyed and thus disappeared irretrievably from the face of the city. With the help of computer-aided design and rapid prototyping, a working group was able to virtually rebuild the destroyed synagogues. Historical photographs and plans from the time these synagogues were built are contrasted with the virtual reconstructions. Together with the accompanying texts, the book provides a complete image of the individual houses of prayer. Of particular interest are the re-creations of the urban fabric that place the destroyed synagogues in the context of the present-day city. (Series: Stadtbildverluste - Vol. 4)

Ancient Marbles to American Shores Stephen L. Dyson. 1998 Uncovers the history of classical archaeology as a discipline in the United States from the Revolutionary War to today. Along the way Dyson discusses the development of American museums and the changing perceptions Americans have had of the classical past.

My Body Given for You Helmut Hoping . 2019 The Eucharist originated at the Last Supper of Jesus with his disciples. It is based on the prayer of thanksgiving that Jesus pronounced over the bread and wine at that meal. "Eucharist" means "thanksgiving", "praise", and "blessing". The Church celebrates the Eucharist as a memorial of the death and Resurrection of Jesus Christ, which is more than a remembrance of the Last Supper of Jesus with his disciples. In the Eucharist the sacrifice of our redemption becomes present sacramentally. In the past, dogmatic theology has treated the meaning of the Eucharist while disregarding the form of its liturgical celebration, whereas liturgical studies have been content with only the latter. Yet the two cannot be separated, any more than liturgy and dogma or pastoral practice and doctrine can be understood without the other. The Church's liturgy is not something external to Christian revelation, but rather, as Joseph Ratzinger said, "revelation accepted in faith and prayer". In this work Helmut Hoping combines the approaches of dogmatic theology and liturgy while examining the Eucharist from a historical and systematic perspective. This new English translation of the second German edition of this major work, revised and expanded, includes a comparative analysis of the Second Eucharistic Prayer and a chapter on the theology of the words of institution.

Chronophobia Pamela M. Lee. 2006-02-17 An examination of the pervasive anxiety about and fixation with time seen in 1960s art. In the 1960s art fell out of time; both artists and critics lost their temporal bearings in response to what E. M. Cioran called not being entitled to time. This anxiety and uneasiness about time, which Pamela Lee calls chronophobia, cut across movements, media, and genres, and was figured in works ranging from kinetic sculptures to Andy Warhol films. Despite its pervasiveness, the subject of time and 1960s art has gone largely unexamined in historical accounts of the period. Chronophobia is the first critical attempt to define this obsession and analyze it in relation to art and technology. Lee discusses the chronophobia of art relative to the emergence of the Information Age in postwar culture. The accompanying rapid technological transformations, including the advent of computers and automation processes, produced for many an acute sense of historical unknowing; the seemingly accelerated pace of life began to outstrip any attempts to make sense of the present. Lee sees the attitude of 1960s art to time as a historical prelude to our current fixation on time and speed within digital culture. Reflecting upon the 1960s cultural anxiety about temporality, she argues, helps us historicize our current relation to technology and time. After an introductory framing of terms, Lee discusses such topics as presentness with respect to the interest in systems theory in 1960s art; kinetic sculpture and new forms of global media; the temporality of the body and the spatialization of the visual image in the paintings of Bridget Riley and the performance art of Carolee Schneemann; Robert Smithson's interest in seriality and futurity, considered in light of his reading of George Kubler's important work *The Shape of Time: Remarks on the History of Things* and Norbert Wiener's discussion of cybernetics; and the endless belaboring of the present in sixties art, as seen in Warhol's *Empire* and the work of On Kawara.

Ethical Issues in Archaeology Larry J. Zimmerman, Karen D. Vitelli.2003 Ethics in the field of archaeological research has become increasingly more complicated, particularly in response to the recent growth of contract archaeology. The past is not in fact dead and buried, and ethical questions about this living record demand an ongoing discussion within the social and cultural groups who interpret this record. Authored largely by members of the Society for American Archaeology Ethics Committee, this up-to-date edited volume of original articles tackles issues such as the origins of and theory behind archaeological ethics, as well as archaeologists' responsibilities to the archaeological record, to diverse publics, to each other, and to their students. The book promises to fuel a critical debate among professionals and will be an important tool for training the next generation of archaeologists.
