Winning with the Right KPIs Peter Geelen.2020-08-05 A common pitfall for organisations is that they - albeit often unknowingly and with the best intentions - create barriers for a successful execution of their strategy by implementing Key Performance Indicators (or KPIs). This comes at the expense of customers and fixing the mistakes takes a lot of time, effort, and money. KPIs don't generate the desired performance improvement and the daily delusions continue to rule the organisation. But working with KPIs can have a different result. In *Winning With the Right KPIs*, iPM founder and former Performance Manager at Philip, Peter Geelen shares practical insights to use KPIs effectively and describes an innovative approach that has been battle-tested and proven successfully in practice. You learn how to set up KPIs that really do improve collaboration, customer value and customer service, and give you buttons you can truly press to realise the ambitions, goals, and dreams of your organisation.

Innovative Forms of Organizing Andrew M Pettigrew, Richard Whittington, Leif Melin, Carlos Sanchez-Runde, Frans A J van den Bosch, Winfried Ruigrok, Tsuyoshi Numagami.2003-07-17 This book presents novel theoretical ideas and empirical findings where the fields of strategizing and organizing meet. At this boundary lie many of the most crucial theoretical and practical issues for management and managing. *Innovative Forms of Organizing*, the eagerly awaited sequel to *The Innovating Organization* (SAGE, 2000), draws upon the comprehensive data sets of the INFORM programme of research, to examine the development of innovative forms of organizing and company performance in organizations across Europe, Japan and the United States. *Innovative Forms of Organizing* establishes and develops three strong themes: organizing and strategizing; complementarities, change and performance; and the management of dualities in the modern corporation. The book then discusses the implications of its presented ideas for strategizing/organizing in the 21st century firm and the challenges for management researchers of conducting large scale, international comparative research. *Innovative Forms of Organizing* thereby illustrates 21st Century management research in 21st Century organizations across Europe, Japan and the USA. This seminal international study will be a classic in the field for years to come for scholars and policy makers in academia, business and government who are interested in strategy, organization and international management.

**The Causal Structure of Long-Term Supply Relationships** Gjalte de Jong, Bart Nooteboom. 2011-09-26 Long-term supply relationships are of crucial importance in industrial organization. The present (r)evolution in information and communication technology such as e-business is proof of the increasingly dynamic environment in which firms operate. As a result, firms have to focus on their core competencies and obtain complementary ones from partner firms to be able to survive. This can hardly be realized without having long-term supply relationships. In the past decades, research on strategic alliances -the class of interfirm arrangements to which long-term supply relationships belong mushroomed. Many of the (empirical) studies in the alliance literature focus on a single variable that is then explained by a set of independent variables. For example, for international joint ventures the level of commitment, interdependence, asymmetry, and dedicated investments explains the development of trust. By itself there is nothing wrong in this approach. On the contrary, because of all these studies we now have some knowledge about the reasons why firms enter in alliances and why some alliances are more successful than others. In fact, one of our first studies also belonged to this research-tradition.

**Agent-Based Strategizing** Duncan A. Robertson.2019-10-17 Strategic management is a system of continual disequilibrium, with firms in a continual struggle for competitive advantage and relative fitness. Models that are dynamic in nature are required if we are to really understand the complex notion of sustainable competitive advantage. New tools are required to tackle challenges of how firms should compete in environments characterized by both exogeneous shocks and intense endogenous competition. Agent-based modelling of firms' strategies offers an alternative analytical approach, where individual firm or component parts of a firm are modelled, each with their own strategy. Where traditional models can assume homogeneity of actors, agent-based models simulate each firm individually. This allows experimentation of strategic moves, which is particularly important where reactions to strategic moves are non-trivial. This Element introduces agent-based models and their use within management, reviews the influential NK suite of models, and offers an agenda for the development of agent-based models in strategic management.
