Superdiversity Steven Vertovec. 2022-11-15 Superdiversity explores processes of diversification and the complex, emergent social configurations that now supersede prior forms of diversity in societies around the world. Migration plays a key role in these processes, bringing changes not just in social, cultural, religious, and linguistic phenomena, but also in the ways that these phenomena combine with others like gender, age, and legal status. The concept of superdiversity has been adopted by scholars across the social sciences in order to address a variety of forms, modes, and outcomes of diversification. Central to this field is the relationship between social categorization and social organization, including stratification and inequality. Increasingly complex categories of social “difference” have significant impacts across scales, from entire societies to individual identities. While diversification is often met with simplifying stereotypes, threat narratives, and expressions of antagonism, superdiversity encourages a perspective on difference as comprising multiple social processes, flexible collective meanings, and overlapping personal and group identities. A superdiversity approach encourages the re-evaluation and recognition of social categories as multidimensional, unfixed, and porous as opposed to views based on hardened, one-dimensional thinking about groups. Diversification and increasing social complexity are bound to continue, if not intensify, in light of climate change. This will have profound impacts on the nature of global migration, social relations, and inequalities. Superdiversity presents a convincing case for recognizing new social formations created by changing migration patterns and calls for a re-thinking of public policy and social scientific approaches to social difference. This introduction to the multidisciplinary concept of superdiversity will be of considerable interest to students and researchers in a range of fields in the humanities and social sciences. Disinventing and Reconstituting Languages Sinfree Makoni, Alastair Pennycook. 2007 This book questions assumptions about the nature of language. Looking at diverse contexts from sign languages in Indonesia to literacy practices in Brazil, the authors argue that unless we change and reconstitute the ways in which languages are taught and conceptualized, language studies will not be able to improve the social welfare of language users.

Celluloid Revolt Christina Gerhardt, Marco Abel. 2019 Provides new insights into German-language cinema around 1968 and its relationship to the period's epoch-making cultural and political happenings.

Divided, But Not Disconnected Tobias Hochscherf, Christoph Laucht, Andrew Plowman. 2010-12-01 The Allied agreement after the Second World War did not only partition Germany, it divided the nation along the fault-lines of a new bipolar world order. This inner border made Germany a unique place to experience the Cold War, and the “German question” in this post-1945 variant remained inextricably entwined with the vicissitudes of the Cold War until its end. This volume explores how social and cultural practices in both German states between 1949 and 1989 were shaped by the existence of this inner border, putting them on opposing sides of the ideological divide between the Western and Eastern blocs, as well as stabilizing relations between them. This volume’s interdisciplinary approach addresses important intersections between history, politics, and culture, offering an important new appraisal of the German experiences of the Cold War.

Fictional Artworks Valeria Cammarata,Valentina Mignano.2016 The volume is devoted to images in painting, photography and cinema invented by literature. At the same time it intends to question, through this perspective, the relationship between text and image, between verbal and visual in modern and contemporary literature. Mediating Languages and Cultures Dieter Buttjes,Michael Byram.1991 The history of language teaching is shot through with methods and approaches to language learning - most recently with communicative language teaching - but this book demonstrates that a more differentiated and richer understanding of learning a foreign language is both necessary and desirable. Languages and cultures are interlinked and interdependent and their teaching and learning should be too. Learning another language is part of a complex process of learning and understanding other people's ways of life, ways of thinking and socio-economic experience

The linguistic integration of adult migrants: from one country to another, from one language to another .2014-01-01 The linguistic integration of migrants affects every aspect of settling in a new country (employment, health, etc.). The aim of this collection of texts is to propose a number of specific measures member states can take to help adult migrants become acquainted with the language of the host country. The main focus is on organising language courses that meet migrants' real communication needs. It is not enough for authorities simply to consider the technical aspects of such courses, they should also design and conduct them in accordance with the fundamental values of the Council of Europe. A number of issues concerning the linguistic integration of adult migrants are presented here, beginning with the notion of linguistic integration itself. Family reunion, the nature of citizenship and the function of language tests, among others, are dealt with from the point of view of language and language use. Readers are invited to reflect on the type of language competences that need to be acquired as well as an appropriate use of the Common European Framework of Reference for Languages. The collection also sets out approaches and instruments designed to assist in implementing effective policies.

Introduction to Literary Hermeneutics Peter Szondi.1995-02-24 Peter Szondi is widely regarded as being among the most distinguished post-war literary critics. This first English edition of one of his most lucid and interesting series of lectures opens up his work in hermeneutics for English-speaking readers. The question of what is involved in understanding a text occupied Biblical and legal scholars long before it became a

concern of literary critics. Peter Szondi here traces the development of hermeneutics through examination of the work of eighteenth-century German scholars. Ordinarily treated only as prefigurations of Schleiermacher, the work of Enlightenment theorists Johann Martin Chladenius, George Friedrich Meier, and Friedrich Ast yields valuable insight into the 'material theory' of interpretation, on which a practical interpretive methodology might be built.

Efraim's Book Alfred Andersch.1994 Efraim's Book is the sophisticated, offbeat novel about the peculiar society of post-World-II Berlin. Its hero George Efraim is a Jewish reporter who has fought for the British on the Italian front and lost both parents to Auschwitz. He returns home to Berlin in 1962 for the first time since the war to investigate the wartime disappearance of his editor's daughter, only to begin writing a novel, which helps him to embark on a certain arrangement of signs with the help of which I hope to chart my position. Like the great German novels of Günter Grass and Heinrich Böll, Alfred Andersch's Efraim's Book grapples with the legacy of World War II and the Holocaust in all its horror and sad humanity. A troubling yet often humorous book, it offers a poignant account of the traumatized German state.
