**Fatima's Great Outdoors** Ambreen Tariq.2021-03-30 An immigrant family embarks on their first camping trip in the Midwest in this lively picture book by Ambreen Tariq, outdoors activist and founder of @BrownPeopleCamping Fatima Khazi is excited for the weekend. Her family is headed to a local state park for their first camping trip! The school week might not have gone as planned, but outdoors, Fatima can achieve anything. *Challenges and Channels* Ikram Ahmed Ibrahim Elsherif,Piers Michael Smith.2016-06-22 This book deals with the "challenges of teaching the English language and literature" in the Middle East and North Africa region, with a special focus on the Gulf countries. It consists of different articles by an international group of educators and scholars who have first-hand experience in teaching the English language and its literatures in this region. The contributors not only investigate student attitudes, cultural, political and administrative obstacles and challenges, but they also embark upon soul-searching journeys in which they examine their own attitudes, teaching strategies, cultural prejudices and preconceptions, and personal responses to

their teaching environments. They also explore, from their own personal experiences, the 'crisis in the humanities', cultural hegemony, ethics in translation, cross-cultural encounters, pedagogical challenges, textuality, and second language acquisition, among other issues and concerns. As such, the book represents both a scholarly investigation and a colorful palette of personal experience and response to human encounters in the classroom.

**Cultivating Genius** Gholdy Muhammad.2019-12-23 In *Cultivating Genius*, Dr. Gholdy E. Muhammad presents a four-layered equity framework--one that is grounded in history and restores excellence in literacy education. This framework, which she names, Historically Responsive Literacy, was derived from the study of literacy development within 19th-century Black literacy societies. The framework is essential and universal for all students, especially youth of color, who traditionally have been marginalized in learning standards, school policies, and classroom practices. The equity framework will help educators teach and lead toward the following learning goals or pursuits: Identity Development--Helping youth to make sense of themselves and others Skill Development-- Developing proficiencies across the academic disciplines Intellectual Development--Gaining knowledge and becoming smarter Criticality--Learning and developing the ability to read texts (including print and social contexts) to understand power, equity, and anti-oppression When these four learning pursuits are taught together--through the Historically Responsive Literacy Framework, all students receive profound opportunities for personal, intellectual, and academic success. Muhammad provides probing, self-reflective questions for teachers, leaders, and teacher educators as well as sample culturally and historically responsive sample plans and text sets across grades and content areas. In this book, Muhammad presents practical approaches to cultivate the genius in students and within teachers.

**Transforming the Workforce for Children Birth Through Age 8** National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success.2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a

blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

**Stretch** Scott Sonenshein.2017-02-07 Wall Street Journal Bestseller A groundbreaking approach to succeeding in business and life, using the science of resourcefulness. We often think the key to success and satisfaction is to get more: more money, time, and possessions; bigger budgets, job titles, and teams; and additional resources for our professional and personal goals. It turns out we're wrong. Using captivating stories to illustrate research in psychology and management, Rice University professor Scott Sonenshein examines why some people and organizations succeed with so little, while others fail with so much. People and organizations approach resources in two different ways: "chasing" and "stretching." When chasing, we exhaust ourselves in the pursuit of more. When stretching, we embrace the resources we already have. This frees us to find creative and productive ways to solve problems, innovate, and engage our work and lives more fully. Stretch shows why everyone—from executives to entrepreneurs, professionals to parents, athletes to artists—performs better with constraints; why seeking too many resources undermines our work and well-being; and why even those with a lot benefit from making the most out of a little. Drawing from examples in business, education, sports, medicine, and history, Scott Sonenshein advocates a powerful framework of resourcefulness that allows anybody to work and live better.

**Overloaded and Underprepared** Denise Pope, Maureen Brown, Sarah Miles.2015-07-27 Praise for Overloaded and Underprepared "Parents, teachers, and administrators are all concerned that America's kids are stressed out, checked out, or both—but many have no idea where to begin when it comes to solving the problem. That's why the work of Challenge Success is so urgent. It has created a model for creating change in our schools that is based on research and solid foundational principles like communication, creativity, and compassion. If your community wants to build better schools and a brighter future, this book is the place to start." —Daniel H. Pink, author of Drive and A Whole New Mind "Challenge Success synthesizes the research on effective school practices and offers concrete tools and strategies that educators and parents can use immediately to make a difference in their communities. By focusing on the day-to-day necessities of a healthy schedule; an engaging, personalized, and rigorous curriculum; and a caring climate, this book is an invaluable resource for school leaders, teachers, parents, and students to help them design learning communities where every student feels a sense of belonging, purpose, and motivation to learn the skills necessary to succeed now and in the future." —Linda Darling-Hammond, Charles E. Ducommun Professor of Education, Stanford University "Finally, a book about education and student well-being that is both research-based and eminently readable. With all the worry about student stress and academic engagement, Pope, Brown and Miles gently remind us that there is much we already know about how to create better schools and healthier kids. Citing evidence-based 'best practices' gleaned from years of work with schools across the country, they show us what is not working, but more importantly, what we need to do to fix things. Filled with practical suggestions and exercises that can be implemented easily, as well as advice on how to approach long-term change, Overloaded and Underprepared is a clear and compelling roadmap for teachers, school administrators and parents who believe that we owe our children a better education." —Madeline Levine, co-founder Challenge Success; author of The Price of Privilege and Teach Your Children Well "This new book from the leaders behind Challenge Success provides a thorough and balanced exploration of the structural challenges facing students, parents, educators, and administrators in our primary and secondary schools today. The authors' unique approach of sharing proven strategies that enable students to thrive, while recognizing that the most effective solutions are tailored on a school-by-school basis, makes for a valuable handbook for anyone seeking to better understand the many complex dimensions at work in a successful learning environment." —John J. DeGioia, President of Georgetown University

**Ghost Boys** Jewell Parker Rhodes.2018-04-17 A heartbreaking and powerful story about a black boy killed by a police officer, drawing connections through history, from award-winning author Jewell Parker Rhodes. Only the living can make the world better. Live and make it better. Twelve-year-old Jerome is shot by a police officer who mistakes his toy gun for a real threat. As a ghost, he observes the devastation that's been unleashed on his family and community in the wake of what they see as an unjust and brutal killing. Soon Jerome meets another ghost: Emmett Till, a boy from a very different time but similar circumstances. Emmett helps Jerome process what has happened, on a journey towards recognizing how historical racism may have led to the events that ended his life. Jerome also meets Sarah, the daughter of the police officer, who grapples with her father's actions. Once again Jewell Parker Rhodes deftly weaves historical and socio-political layers into a gripping and poignant story about how children and families face the complexities of today's world, and how one boy grows to understand American blackness in the aftermath of his own death.

**The University of South Carolina** Elizabeth Cassidy West. 2006-10 On December 19, 1801, the South Carolina legislature established the South Carolina College, one of the nation's first publicly supported institutions of higher education. In the past two centuries, the institution has evolved from a small liberal arts college with one campus into a large modern university with eight spacious campuses. Carolina's heart, however, remains firmly nestled in the site of its original campus, the historic Horseshoe. Throughout its history, Carolina has faced challenges that at times threatened its existence, including the burning of Columbia in 1865, when the destructive fire swept up to the walls of the campus. Several reorganizations and name changes culminated in the school's final reorganization in 1906 as the University of South Carolina. The university adapted to history's societal changes, including the admission of women, desegregation, and the student unrest of the 1970s. This volume draws extensively from the collections of the University of South Carolina Archives to chronicle Carolina's remarkable history through images of its founders, administrators, faculty, campus, and most importantly, its students.

**Learner-Centered Teaching** Maryellen Weimer. 2008-05-02 In this much needed resource, Maryellen Weimer-one of the nation's most highly regarded authorities on effective college teaching-offers a comprehensive work on the topic of learner-centered teaching in the college and university classroom. As the author explains, learner-centered teaching focuses attention on what the student is learning, how the student is learning, the conditions under which the student is learning, whether the student is retaining and applying the learning, and how current learning positions the student for future learning. To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms the college classroom environment. *Learner-Centered Teaching* shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.

*Statistical Inference via Data Science: A Modern Dive into R and the Tidyverse* Chester Ismay, Albert Y. Kim. 2019-12-23 *Statistical Inference via Data Science: A Modern Dive into R and the Tidyverse* provides a pathway for learning about statistical inference using data science tools widely used in industry, academia, and government. It introduces the tidyverse suite of R packages, including the ggplot2 package for data visualization, and the dplyr package for data wrangling. After equipping readers with just enough of these data science tools to perform effective exploratory data analyses, the book covers traditional introductory statistics topics like confidence intervals, hypothesis testing, and multiple regression modeling, while focusing on visualization throughout. Features: ● Assumes minimal prerequisites, notably, no prior calculus nor coding experience ● Motivates theory using real-world data, including all domestic flights leaving New York City in 2013, the Gapminder project, and the data journalism website, FiveThirtyEight.com ● Centers on simulation-based approaches to statistical inference rather than mathematical formulas ● Uses the infer package

for tidy and transparent statistical inference to construct confidence intervals and conduct hypothesis tests via the bootstrap and permutation methods ● Provides all code and output embedded directly in the text; also available in the online version at [modernlive.com](http://modernlive.com) This book is intended for individuals who would like to simultaneously start developing their data science toolbox and start learning about the inferential and modeling tools used in much of modern-day research. The book can be used in methods and data science courses and first courses in statistics, at both the undergraduate and graduate levels.
