The Jewess in Nineteenth-Century British Literary Culture Nadia Valman.2007-04-12 Stories about Jewesses proliferated in nineteenth-century Britain as debates about the place of the Jews in the nation raged. While previous scholarship has explored the prevalence of antisemitic stereotypes in this period, Nadia Valman argues that the figure of the Jewess - virtuous, appealing and sacrificial - reveals how hostility towards Jews was accompanied by pity, identification and desire. Reading a range of texts from popular romance to the realist novel, she investigates how the complex figure of the Jewess brought the instabilities of nineteenth-century religious, racial and national identity into uniquely sharp focus. Tracing the narrative of the Jewess from its beginnings in Romantic and Evangelical literature, and reading canonical writers including Walter Scott, George Eliot and Anthony Trollope alongside more minor figures such as Charlotte Elizabeth Tonna, Grace Aguilar and Amy Levy, Valman demonstrates the remarkable persistence of this narrative and its myriad transformations across the century.

Land to Investors Dessalegn Rahmato.2011 Under its program of land investments, the Ethiopian government has leased out huge tracts of land to domestic and foreign investors on terms that are highly favorable to both but particularly to foreign ones. Critical reports on the ibonzai reaped by foreign capital have appeared in the world media and the websites of international activist organizations, and while some of these are based on questionable evidence, the global attention they have drawn may well be deserved given the image of the country as a land of poverty and hunger. This study, which is based on information gathered from field interviews as well as other sources, looks at the subject from a land rights perspective, with emphasis on the relations of power between small land-users and their communities on the one hand and the state on the other. At bottom what is at stake is the land and the resources on it, and what is being grabbed are rights that in most cases belong to peasant farmers, pastoralists and their communities. In the long run, the shift of agrarian system from small-scale to large-scale, foreign dominated production -which is what the investment program is now doing- will marginalize small producers, and cause immense damage to local ecosystems, wildlife habitats and biodiversity.

Judaism and Enlightenment Adam Sutcliffe.2004 This study investigates the philosophical and political significance of Judaism in the intellectual life of seventeenth and eighteenth century Europe. Adam Sutcliffe shows how the widespread and enthusiastic fascination with Judaism prevalent around 1650 was largely eclipsed a century later by attitudes of dismissal and disdain. He argues that Judaism was uniquely difficult for Enlightenment thinkers to account for, and that their intense responses, both negative and positive, to Jewish topics are central to an understanding of the underlying ambiguities of the Enlightenment itself. Judaism and the Jews were a limit case, a destabilising challenge, and a constant test for Enlightenment rationalism. Erudite and highly broad-ranging in its sources, and yet extremely accessible in its argument, Judaism and Enlightenment is a major contribution to the history of European ideas, of interest to scholars of Jewish history and to those working on the Enlightenment, toleration and the emergence of modernity itself.

Cultural and Spiritual Values of Biodiversity United Nations Environment Programme.1999 Weaving together philosophical, historical, legal, scientific and personal viewpoints, this book gives a rich sample of the vast web which makes up our cultural, spiritual and social diversity. It demonstrates how many cultures see Nature as an extension of society, and how sensitive stewardship is an integral part of existence. The book covers: language and how cognition and speech encode indigenous knowledge systems are critical for preservation of diversity; the complex issue of indigenous people and the problems of preserving their relationships both with and within their societies; voices of the world - expressions of concern and disquiet over the declining world diversity; holistic health practices where environment and diet are integrated into indigenous medical health systems; the importance of developing effective intellectual property rights and territorial and land rights to enhance and maintain local control. Brexit and Beyond: Nation and Identity Daniela Keller,Ina Habermann.2021-03-08 This volume explores the cultural significance of Brexit, situating it in debates about nation and identity. Contributors to this collection seek to contextualize Britain's decision to leave the EU and to assess its reverberations in language, literature, and culture. Addressing such aspects as British exceptionalism, myth-making, medievalism, and nostalgia, contributions range from travelogues, Ladybird books, and rural cinema-going to ageing. An important focus lies on marginalized groups and geographical fringes, as contributors attend to the Irish situation and the scarcity of EU migrants in Brexit literature (BrexLit). Finally, two essays widen the perspective to assess American parallels to the discourses about a Brexit that is still far from done.

The Politics of Belonging Nira Yuval-Davis.2011-12-06 In this groundbreaking book, Nira Yuval-Davis provides a cutting-edge investigation of the challenging debates around belonging and the politics of belonging. Alongside the hegemonic forms of citizenship and nationalism which have tended to dominate our recent political and social history, the author examines alternative contemporary political projects of belonging

constructed around the notions of religion, cosmopolitanism, and the feminist 'ethics of care'. The book also explores the effects of globalization, mass migration, the rise of both fundamentalist and human rights movements on such politics of belonging, as well as some of its racialized and gendered dimensions. A special space is given to the various feminist political movements that have been engaged as part of or in resistance to the political projects of belonging.

Metacognition and Theory of Mind Eleonora Papaleontiou-Louca. 2008 This little book aims to clarify and give a synoptic description of both the notions of ~Metacognition (TM) and ~Theory of Mind (TM), as well as a short comparison of these two ~hot (TM) scientific topics. After giving the theoretical framework of the concept of ~Metacognition (TM), it describes a number of practical suggestions of how educators of all levels can enhance their students' (TM) metacognitive abilities in practice. Then it analyzes all the basic aspects of the concept of ~Theory of Mind (TM) and its relation to Language. Finally, it tries to combine the two theoretical concepts, i.e. ~Metacognition (TM) and ~Theory of Mind (TM), by making some helpful clarifications and identifying their major similarities, differences and convergences. In this way, the author hopes strongly to contribute to the resume of the Literature Review in a concise and handy volume, and wishes to help all the interesting parts, scholars and teachers, to do their own insights and improvements (theoretical and practical) in these crucial areas.

Studying the Jew Alan E Steinweis. 2009-06-30 "Exposes the culpability of scholars who collaborated with Nazi race policy . . . an excellent [book] . . . to understand the mentality of 'desk murderers.'" (Claudia Koonz, author of *The Nazi Conscience*) Early in his political career, Adolf Hitler declared the importance of what he called "an antisemitism of reason." He hoped that his exclusionary and violent policies would be legitimized by scientific scholarship. The result was a disturbing, and long-overlooked, aspect of National Socialism: Nazi Jewish Studies. *Studying the Jew* investigates the careers of a few dozen German scholars who forged an interdisciplinary field, drawing upon studies in anthropology, biology, religion, history, and the social sciences to create a comprehensive portrait of the Jew—one with devastating consequences. Working within the universities and research institutions of the Third Reich, these men fabricated an elaborate empirical basis to support the Nazi campaign against Jews by defining them as racially alien, morally corrupt, and inherently criminal. A chilling story of academics who distorted their research in support of persecution and genocide, *Studying the Jew* explores the intersection of ideology and scholarship to provide a new appreciation of the horrors perpetrated in the name of reason. "This brilliant new book reveals how the academy became nazified, shaping a new interdisciplinary enterprise: pathologizing the Jew." —Susannah Heschel, author of *Abraham Geiger and the Jewish Jesus* "An essential sequel to Max Weinreich's classic of 1946, *Hitler's Professors*. [*Studying the Jew*] is a valuable contribution to the extensive history of politicization of scholarship in modern dictatorships." —Jeffrey Herf, author of *The Jewish Enemy: Nazi Propaganda during World War II and the Holocaust*

Think Big, Start Small, Scale Fast Jim Carroll. 2020-01-03 *Think Big, Start Small, Scale Fast* is based on the key business transformation guidance that futurist Jim Carroll has been providing to his global client base for over 25 years. He has shared his insight with over 2 million people in more than 1,500 keynote presentations worldwide. The book provides a glimpse into the uniqueness of the work that Jim has done in preparing for these events, and is based on insight from a long career as an advisor to countless global organizations. Jim came to realize this unique experience -- a life on the stage -- provided him with some very unique observations into how people try to deal with a world of massive change and challenge. Over time, he began to capture these observations, usually inspirational, sometimes controversial. Notes Jim: In late July 2016, through a variety of colliding circumstances, the opportunity to focus my thinking into a message of hope and inspiration took on a life of its own. Since that moment in time, I have started each workday, without fail, very early in the morning, with my coffee, my laptop, and a moment of quiet reflection. They are a critical part of a very important journey, that of painting a picture of hope and optimism for what the day might bring. I have not missed one day, since starting this in early August 2016. I mark my personal progress and success one day at a time by my ability to inspire myself and others each and every day through this small personal thought. The book is a story of inspiration and transformation. It provides motivational guidance to those who seek how to navigate our increasingly complex and ever faster world. It provides insight into what people and organizations must do to deal with a world of massive disruption and transformation in everything they know: disruptive business models; competitive markets, product and service lines; changing consumer behaviour; the impact of accelerating technology, and more.

Bonaparte in Egypt J. Christopher Herold. 2009-05 The French expedition to Egypt, which Bonaparte launched in 1798, was one of the most exciting, harrowing, futile, and yet most fruitful adventures in modern times. Although the expedition was doomed, and almost everyone in it had only one wish-to go home-the impact of the three years of French occupation left a lasting mark on Egypt. The book is crowded with dramatic episodes. We see the French, without supplies, crossing the desert in midsummer and, without a rest, fighting the Battle of the Pyramids. We witness the glories and horrors of the Battle of the Nile, the uprising of Cairo, the butcheries at Jaffa and at Acre, the labors of the Institute of Egypt, the ravages of the plague, and the unbelievable game that Bonaparte played with Islam. The personalities are no less colorful than the

incidents. Besides Bonaparte, who revealed, while in Egypt, his most repulsive and his most admirable qualities, there are the forthright and caustic General Kleber; Lord Nelson of the Nile; the uncatchable Mameluke Murad Bey; the Pasha of Acre, who gloried in the surname Djezzar, the Butcher; and the chivalrous and eccentric Sir Sidney Smith. Add to that list the selfless and heroic General Desaix; Dr. Desgenettes, who inoculated himself with the plague and survived to give Bonaparte a public dressing-down; General Menou, who became a Moslem to marry a bath-keeper's daughter; and Pauline Foures, who became Bonaparte's mistress in one of the more ludicrous episodes of the campaign. Christopher Herold has drawn on official documents, on Arabic chronicles, on the memoirs and diaries of generals, officers, simple soldiers, artists, engineers, and physicians. He has also visited the countries where the action took place and pushed thoroughness to the point of contracting (briefly) Egyptian ophthalmia; although he stopped short at seeking first-hand experience with the plague. If you wish to understand the Napoleonic Era, this book is a must read.

Obesity: The Biography Sander L. Gilman. 2010-05-13 According to the World Health Organization we are in the midst of a global obesity crisis. Is obesity a disease itself or a symptom of underlying physiological or psychological illnesses? Is it a sign of social excess and therefore not a disease in the medical sense at all? Is it really 'new'? Sander L. Gilman, a leading authority in the social and cultural history of the body, presents a fascinating account of the history of obesity, looking at the changing attitudes towards the body, from regarding it as 'God's temple' to more mechanical and practical concerns from the Enlightenment onwards. In the eighteenth century obesity was understood as a problem of the affluent; today the affluent are more likely to have a personal trainer and a healthier diet, and it is the poorer classes who are more likely to be overweight. Gilman considers obesity in many contexts - including a chapter on obesity in China and the impact of modernization and Westernization on this very different culture. Taking the issue up to the present day, Gilman examines the wider political and social implications obesity raises, considering whether obesity should be cured by diet or surgery, by psychotherapy or economic improvement, by healthier food choices or by social relocation.

Women of Exile Andreas Lixl-Purcell. 1988-06-24 A collection of extracts from 26 autobiographies by German-Jewish women on the Nazi period in Germany and the problems of emigration. The introduction (pp. 1-8) notes that Nazi brutality operated in a special way against Jewish married women, who were singled out and targeted as mediators of Nazi policies; for example, after Kristallnacht they were forced to secure emigration papers in order to obtain the release of their husbands from concentration camps. Mentions that in 1939 there remained in Germany 135 Jewish women for every 100 Jewish men, suggesting that more men fled abroad.

The Inheritance of Wealth Daniel Halliday. 2018 Daniel Halliday examines the moral grounding of the right to bequeath or transfer wealth. He engages with contemporary concerns about wealth inequality, class hierarchy, and taxation, while also drawing on the history of the egalitarian, utilitarian, and liberal traditions in political philosophy. He presents an egalitarian case for restricting inherited wealth, arguing that unrestricted inheritance is unjust to the extent that it enables and enhances the intergenerational replication of inequality. Here, inequality is understood in a group-based sense: the unjust effects of inheritance are principally in its tendency to concentrate certain opportunities into certain groups. This results in what Halliday describes as 'economic segregation'. He defends a specific proposal about how to tax inherited wealth: roughly, inheritance should be taxed more heavily when it comes from old money. He rebuts some sceptical arguments against inheritance taxes, and makes suggestions about how tax schemes should be designed.

The Crucible of Consciousness Zoltan Torey. 2009-04-17 An interdisciplinary examination of the evolutionary breakthroughs that rendered the brain accessible to itself. In *The Crucible of Consciousness*, Zoltan Torey offers a theory of the mind and its central role in evolution. He traces the evolutionary breakthrough that rendered the brain accessible to itself and shows how the mind-boostered brain works. He identifies what it is that separates the human's self-reflective consciousness from mere animal awareness, and he maps its neural and linguistic underpinnings. And he argues, controversially, that the neural technicalities of reflective awareness can be neither algorithmic nor spiritual—neither a computer nor a ghost in the machine. The human mind is unique; it is not only the epicenter of our knowledge but also the outer limit of our intellectual reach. Not to solve the riddle of the self-aware mind, writes Torey, goes against the evolutionary thrust that created it. Torey proposes a model that brings into a single focus all the elements that make up the puzzle: how the brain works, its functional components and their interactions; how language evolved and how syntax evolved out of the semantic substrate by way of neural transactions; and why the mind-endowed brain deceives itself with entelechy-type impressions. Torey first traces the language-linked emergence of the mind, the subsystem of the brain that enables it to be aware of itself. He then explores this system: how consciousness works, why it is not transparent to introspection, and what sense it makes in the context of evolution. The “consciousness revolution” and the integrative focus of neuroscience have made it possible to

make concrete formerly mysterious ideas about the human mind. Torey's model of the mind is the logical outcome of this, highlighting a coherent and meaningful role for a reflectively aware humanity.

The Winter Soldier Daniel Mason.2018-09-11 The epic story of war and medicine from the award-winning author of North Woods and The Piano Tuner is a dream of a novel...part mystery, part war story, part romance (Anthony Doerr, author of All the Light We Cannot See). Vienna, 1914. Lucius is a twenty-two-year-old medical student when World War I explodes across Europe. Enraptured by romantic tales of battlefield surgery, he enlists, expecting a position at a well-organized field hospital. But when he arrives, at a commandeered church tucked away high in a remote valley of the Carpathian Mountains, he finds a freezing outpost ravaged by typhus. The other doctors have fled, and only a single, mysterious nurse named Sister Margarete remains. But Lucius has never lifted a surgeon's scalpel. And as the war rages across the winter landscape, he finds himself falling in love with the woman from whom he must learn a brutal, makeshift medicine. Then one day, an unconscious soldier is brought in from the snow, his uniform stuffed with strange drawings. He seems beyond rescue, until Lucius makes a fateful decision that will change the lives of doctor, patient, and nurse forever. From the gilded ballrooms of Imperial Vienna to the frozen forests of the Eastern Front; from hardscrabble operating rooms to battlefields thundering with Cossack cavalry, *The Winter Soldier* is the story of war and medicine, of family, of finding love in the sweeping tides of history, and finally, of the mistakes we make, and the precious opportunities to atone. *The Winter Soldier* brims with improbable narrative pleasures...These pages crackle with excitement... A spectacular success. —Anthony Marra, *New York Times Book Review*

Beyond Work-Family Balance Rhona Rapoport.2002 Everyone who struggles to meet the demands of work and personal-life responsibilities knows how tough it is to do so. This bold new book shows that it is the deeply engrained separation of work and personal life that has limited our ability to deal effectively with the conflict between them. *Beyond Work-Family Balance* demonstrates why the image of balance is outmoded and why a new approach--work-personal life integration--offers greater promise for meaningful change. Providing many examples from action research projects in more than a dozen organizations of different kinds, the authors show how using their method of integrating rather than separating personal-life considerations from the workplace can achieve positive outcomes, not only for workers but also for the work. The method offers a way of looking deeply into the work culture to find inequitable and ineffective work practices that are so embedded and routine that no one thinks to question them^{3/4}they are just the way things get done. Once identified, these work practices can be changed to achieve what the authors call a Dual Agenda: a more equitable workplace where both men and women can achieve their full potential and a more effective workplace where the needs of the work, rather than gendered and outmoded assumptions, determine what gets done and how. *Beyond Work-Family Balance* offers an approach that achieves what family friendly policies, mommy tracks, and so-called flexibility programs cannot. Such programs address the symptoms of the problem. This book offers a way of changing the everyday work practices and norms that are at the root of the problem.

Executioner Albert Pierrepoint.1999-03 Albert Pierrepoint became an executioner in 1931, at the age of 27, and resigned his office as Official Executioner in 1956 ... This autobiography now offers a documentary record of his experience, which in retrospect he summed up as follows I do not now believe that any of the hundreds of executions I carried out has in any way acted as a deterrent against future murder. Capital punishment, in my view, achieved nothing except revenge.--Jacket.

Death Dealer Rudolf Hoss.2012-08-31 By his own admission, SS Kommandant Rudolf Höss was history's greatest mass murderer, having personally supervised the extermination of approximately two million people, mostly Jews, at the death camp in Auschwitz, Poland. *Death Dealer* is the first complete translation of Höss's memoirs into English. These bone-chilling memoirs were written between October 1946 and April 1947. At the suggestion of Professor Sanislaw Batawia, a psychologist, and Professor Jan Shen, the prosecuting attorney for the Polish War Crimes Commission in Warsaw, Höss wrote a lengthy and detailed description of how the camp developed, his impressions of the various personalities with whom he dealt, and even the extermination of millions in the gas chambers. This written testimony is perhaps the most important document attesting to the Holocaust, because it is the only candid, detailed, and (for the most part) honest description of the Final Solution from a high-ranking SS officer intimately involved in carrying out the plans of Hitler and Himmler. With the cold objectivity of a common hit-man, Höss chronicles the discovery of the most effective poison gas, and the technical obstacles that often thwarted his aim to kill as efficiently as possible. Staring at the horror without reacting, Höss allowed conditions at Auschwitz to reduce human beings to walking skeletons - then he labelled them as subhumans fit only to die. Readers will witness Höss's shallow rationalizations as he tries to balance his deeds with his increasingly disturbed, yet always ineffectual, conscience.
