The Pasteurization of France Bruno Latour.1993-10-15 What can one man accomplish, even a great man and brilliant scientist? Although every town in France has a street named for Louis Pasteur, was he alone able to stop people from spitting, persuade them to dig drains, influence them to undergo vaccination? Pasteur's success depended upon a whole network of forces, including the public hygiene movement, the medical profession (both military physicians and private practitioners), and colonial interests. It is the operation of these forces, in combination with the talent of Pasteur, that Bruno Latour sets before us as a prime example of science in action. Latour argues that the triumph of the biologist and his methodology must be understood within the particular historical convergence of competing social forces and conflicting interests. Yet Pasteur was not the only scientist working on the relationships of microbes and disease. How was he able to galvanize the other forces to support his own research? Latour shows Pasteur's efforts to win over the French public—the farmers, industrialists, politicians, and much of the scientific establishment. Instead of reducing science to a given social environment, Latour tries to show the simultaneous building of a society and its scientific facts. The first section of the book, which retells the story of Pasteur, is a vivid description of an approach to science whose theoretical implications go far beyond a particular case study. In the second part of the book, “Irreductions,” Latour sets out his notion of the dynamics of conflict and interaction, of the “relation of forces.” Latour's method of analysis cuts across and through the boundaries of the established disciplines of sociology, history, and the philosophy of science, to reveal how it is possible not to make the distinction between reason and force. Instead of leading to sociological reductionism, this method leads to an unexpected irreductionism.

Inmunidad común Roberto Esposito.2023-09-19 Durante la pandemia de COVID-19 la inmunización se convirtió en el centro de gravedad de toda la experiencia contemporánea. La medicalización de la política y las medidas de confinamiento y distancia social hicieron sonar las alarmas del control de la población. Así, las sociedades de todo el mundo parecieron quedar atrapadas en un verdadero síndrome inmunológico. Para comprender los efectos ambivalentes de este fenómeno, Roberto Esposito se remonta a su origen en la Modernidad, cuando los lenguajes de la medicina, el derecho y la política comienzan a fundirse en el horizonte biopolítico y la democracia misma se ve profundamente modificada en sus procedimientos y supuestos. De este modo, las tensiones entre seguridad y libertad, norma y excepción, poder y existencia, en los años de la pandemia revelaron la relación compleja entre comunidad e inmunidad, que este libro indaga en sus cruces decisivos.

Dos micróbios aos mosquitos Jaime Larry Benchimol.1999-01-01 Consistente contribuição à história social da ciência e da medicina no Brasil, que articula recentes avanços da história, filosofia e antropologia da ciência. Analisa, sem anacronismos, a trajetória que Domingos Freire descreveu no efervescente mundo das ciências biomédicas de finais do século XIX, desnudando a complexa rede que começava então a unir os médicos cientistas. Enfim, uma obra com o mérito de mostrar que, na 'corrida' por compreender a febre amarela e finalmente anular os seus efeitos, o passo dos que 'perderam' também bateu o chão sobre o qual se ergueria o pódio para os 'vencedores'.
