Tropical Homegardens B.M. Kumar,P.K.R. Nair.2007-04-21 'Homegardens' are integrated tree-crop-animal production systems, often established on small parcels of land surrounding homesteads, and primarily found in tropical environments. This multi-authored volume contains peer-reviewed chapters from the world's leading researchers and professionals in this topic. It summarizes the current state of knowledge on homegarden systems, with a view to using this knowledge as a basis for improving both homegardens and other similar multistrata agroforestry systems.

The Return Sharon Sala.2012-11-15 Surprises await a young woman when she comes home to bury her grandmother in this romantic suspense tale by a New York Times–bestselling author. As a legacy of hatred erupts in a shattering moment of violence, a dying mother entrusts her newborn daughter to a caring stranger. . . . Now, twenty-five years later, Catherine Fane has come home to Camarune, Kentucky, to bury the woman who'd raised her, bringing a blood feud to its searing conclusion. At the cabin in the woods where she was born, Catherine is drawn to the ravaged town and its violent past. But her arrival has not gone unnoticed. A stranger is watching from the woods, a shattered old man is witnessing the impossible, and Sheriff Luke DePriest's only thoughts are to keep Catherine safe from the sleeping past she has unwittingly awoken . . .

Islam in the British Broadsheets Elzain Elgamri.2011-03 From the late Ayatollah Khomeini's fatwa against Salman Rushdie, to the extremism of the Taliban and the mass murder of the September 11th attacks, the image of Islam as a violent and anti-Western faith has featured dominantly in the global mass media. In this book, Elzain Elgamri sets out to refute such generalizations. Taking into account the historically conditioned Orientalist discourses, in light of the polarized relationship between Islam and the West, and deconstructing what has actually been reported in the British quality press, Elgamri points out that what has actually been journalistically covered is an incomplete fragment of a much more complex situation. While acknowledging that these terrible acts were indeed committed in the name of Islam, and that they did involve bloody violence that claimed the lives of innocent civilians and caused much intimidation, Elgamri argues that these events have been represented by the media as an archetype of Islam, whereas in actual fact there is no single monolithic Islam and, consequently, no single monolithic Muslim community. The author concludes that, contrary to what is frequently depicted, Islam and Muslim societies are not confined only to confrontation, violence, terrorism, and antagonism towards everything Western, but rather are extremely diverse in their religious and political outlooks.

Empire in Transition Alfred Hower.2018-02-20 The books in the Florida and the Caribbean Open Books Series demonstrate the University Press of Florida's long history of publishing Latin American and Caribbean studies titles that connect in and through Florida, highlighting the connections between the Sunshine State and its neighboring islands. Books in this series show how early explorers found and settled Florida and the Caribbean. They tell the tales of early pioneers, both foreign and domestic. They examine topics critical to the area such as travel, migration, economic opportunity, and tourism. They look at the growth of Florida and the Caribbean and the attendant pressures on the environment, culture, urban development, and the movement of peoples, both forced and voluntary. The Florida and the Caribbean Open Books Series gathers the rich data available in these architectural, archaeological, cultural, and historical works, as well as the travelogues and naturalists' sketches of the area in prior to the twentieth century, making it accessible for scholars and the general public alike. The Florida and the Caribbean Open Books Series is made possible through a grant from the National Endowment for the Humanities and the Andrew W. Mellon Foundation, under the Humanities Open Books program.

Developmentality Jon Harald Sande Lie.2015-09-01 Drawing on ethnographic fieldwork within the World Bank and a Ugandan ministry, this book critically examines how the new aid architecture recasts aid relations as a partnership. While intended to alter an asymmetrical relationship by fostering greater recipient participation and ownership, this book demonstrates how donors still seek to retain control through other indirect and informal means. The concept of developmentality shows how the World Bank's ability to steer a client's behavior is disguised by the underlying ideas of partnership, ownership, and participation, which come with other instruments through which the Bank manipulates the aid recipient into aligning with its own policies and practices.

Fetal and Neonatal Brain Injury David K. Stevenson,William E. Benitz,Philip Sunshine,Susan R. Hintz,Maurice L. Druzin.2017-12-21 Improvements in the detection of fetal and neonatal brain injuries, advances in our understanding of the pathophysiology, cellular and molecular bases of encephalopathy, and new treatment options have all combined to produce significant changes in the management of neonatal brain disorders in the past few years. This new edition of *Fetal and Neonatal Brain Injury* brings the reader fully up to date with all advances in clinical management and outcome assessment. Updated material includes inflammation focusing in particular on chorioamnionitis and fetal brain injury; genetic brain injury; and expanded sections on cholestasis, diabetes, and thyroid disease. An updated, highly illustrated chapter on structural and functional imaging of the fetal and neonatal brain is also included. An outstanding international team of highly experienced neonatologists and maternal-fetal medicine clinicians have produced a practical, authoritative clinical text that gives clear management advice to all clinicians involved in the treatment of these patients.

The Near Earth Asteroid Rendezvous Mission Christopher Russell.1998-02-28 Even before the present Administrator of NASA, Daniel Goldin, made the phrase 'better, faster, cheaper' the slogan of at least the Office of Space Science, that same office under the Associate Administrator of Lennard Fisk and its Division of Solar System Exploration under the direction of Wes Huntress had begun a series of planetary spacecraft whose developmental cost, phase CID in the parlance of the trade, was to be held to under \$150M. In order to get the program underway rapidly they chose two missions without the open solicitation now the hallmark of the program. One of these two missions, JPL's Mars Pathfinder, was to be a technology demonstration mission with little immediate science return that would enable later high priority science missions to Mars. Many of the science investigations that were included had significant foreign contributions to keep NASA's cost of the mission within the Discovery budget. The second of these missions and the first to be launched was the Near

Earth Asteroid Rendezvous mission, or NEAR, awarded to Johns Hopkins University's Applied Physics Laboratory. This mission was quite different than Mars Pathfinder, being taken from the list of high priority objectives of the science community and emphasizing the science return and not the technology development of the mission. This mission was also to prove to be well under the \$150M phase CID cap.

Qualitative Research for the Information Professional G. E. Gorman, Peter Robert Clayton, Sydney J. Shep, Adela Clayton.2005 This established text is the only introduction to qualitative research methodologies in the field of library and information management. Its extensive coverage encompasses all aspects of qualitative research work from conception to completion, and all types of study in a variety of settings from multi-site projects to data organization. The book features many case studies and examples, and offers a comprehensive manual of practice designed for LIS professionals. This new edition has been thoroughly revised and includes three new chapters. It has been updated to take account of the substantial growth in the amount and quality of web-based information relevant to qualitative research methods and practice, and the many developments in software applications and resources. The authors have identified a clear need for a new chapter on the evaluation of existing research, as a gateway into new research for information professionals. The final chapter, 'Human Resources In Knowledge Management', takes the form of a model case study, and is an 'ideal' qualitative investigation in an information setting. It exemplifies many of the approaches to qualitative research discussed in earlier chapters. Readership: Directed primarily at the beginner researcher, this book also offers a practical refresher in this important area for the more experienced researcher. It is a useful tool for all practitioners and researchers in information organizations, whether libraries, archives, knowledge management centres, record management centres, or any other type of information service provider.

Territorial Designs and International Politics Boaz Atzili, Burak Kadercan.2018-12-07 Territory is back with a vengeance. Although territorial politics never really went away, it was often perceived that way in public discussion and among scholars. The territorial conflicts of the last several years, however, have raised new academic and policy questions, revived old debates that were nearly forgotten, and forced us to rethink many of our common conceptions. Social scientists broadly agree that territory, as well as the boundaries that confine it and group identity that relates to it, are socially constructed rather than natural or primordial. But how and through which mechanisms is the meaning of territory constructed? By whom? For which purposes and by what tools? Which forces influence such "territorial designs"? How do different territorial designs affect state behavior in particular, and the dynamics of international politics in general? This book brings together political scientists and geographers—both disciplines in which scholars have long researched such questions—to create a mutually fertilizing dialogue, which will advance our understanding of territorial designs. The authors tackle core theoretical questions, institutions and ideas of territoriality, borders, space, place, and identity, as well as the methodologies used to study them. They utilize case studies as far apart as the Ottoman Empire, the colonization of Ireland, and current day Middle East; and they interrogate the characteristics of spaces as different as land, air, and water. The chapters were originally published as a special issue of *Territory, Politics, Governance*.

Twelve Years a Slave Solomon Northup.2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

In the Land of Mosques & Minarets Milburg Francisco Mansfield.2023-07-18 This book is a beautifully illustrated account of a journey to the Islamic world by two American travelers. The authors, Blanche McManus and Francis Miltoun, explored many of the great cities of the Ottoman Empire, including Istanbul, Baghdad, Cairo, and Jerusalem. They provide a vivid description of the landscapes, architecture, and people they encountered, as well as their thoughts on the cultural and political issues of their time. This is a fascinating and informative read for anyone interested in the Islamic world and its history. Global Historical Sociology Julian Go, George Lawson.2017-08-31 Bringing together historical sociologists from Sociology and International Relations, this collection lays out the international, transnational, and global dimensions of social change. It reveals the shortcomings of existing scholarship and argues for a deepening of the 'third wave' of historical sociology through a concerted treatment of transnational and global dynamics as they unfold in and through time. The volume combines theoretical interventions with in-depth case studies. Each chapter moves beyond binaries of 'internalism' and 'externalism,' offering a relational approach to a particular thematic: the rise of the West, the colonial construction of sexuality, the imperial origins of state formation, the global origins of modern economic theory, the international features of revolutionary struggles, and more. By bringing this sensibility to bear on a wide range of issue-areas, the volume lays out the promise of a truly global historical sociology.

The Beethoven Syndrome Mark Evan Bonds.2019 The Beethoven Syndrome is the inclination of listeners to hear music as the projection of a composer's inner self. This was a radically new way of listening that emerged only after Beethoven's death. Beethoven's music was a catalyst for this change, but only in retrospect, for it was not until after his death that listeners began to hear composers in general--and not just Beethoven--in their works, particularly in their instrumental music. The Beethoven Syndrome: Hearing Music as Autobiography traces the rise, fall, and persistence of this mode of listening from the middle of the eighteenth century to the present. Prior to 1830, composers and audiences alike operated within a framework of rhetoric in which the burden of intelligibility lay squarely on the composer, whose task it was to move listeners in a calculated way. But through a confluence of musical, philosophical, social, and economic changes, the paradigm of expressive objectivity gave way to one of subjectivity in the years around 1830. The framework of rhetoric thus yielded to a framework of hermeneutics: concert-goers no longer perceived composers as orators but as oracles to be deciphered. In the wake of World War I, however, the aesthetics of New Objectivity marked a return not only to certain stylistic features of eighteenth-century music but to the earlier concept of expression itself. Objectivity would go on to become the cornerstone of the high modernist aesthetic that dominated the century's middle decades. Masterfully citing a broad array of source material from composers, critics, theorists, and philosophers, Mark Evan Bonds's engaging study reveals how perceptions of subjective expression have endured, leading to the present era of mixed and often conflicting paradigms of listening.

Transition to Agro-Ecology Jelleke de Nooy van Tol.2016-09-29 Our global agricultural and food system is broken and needs to transition to one that is more sustainable and beneficial to the world's population. This

seems hard in the face of the linked challenges of climate change, natural resource depletion, and worldwide economic and social upheaval. At the same time, farmer-led social movements are growing, and there is increasing recognition that agroecology and food sovereignty are key solutions for both nutritious food security and climate change adaptation. This book takes you along in the transition to agroecology, which is already happening, worldwide! The author shows us the as of yet dispersed but growing movement of many smallholder farmers, projects, programs, research, and policy agendas that are making the change. Since the daily news prevents us from noticing, Jelleke shows us the most beautiful and intriguing examples of ground-breaking people and projects. She gives you the keys for transition. She makes us look back from 2030. What have we done by then you and I, your friends and colleagues, investors and politicians to have arrived in a changed food-secure world where agroecology is the new normal? This book is a must-read for researchers, politicians, students, and consumers alike.

The Finger Lakes Region O. D. von Engeln. 1988 The extraordinary beauty of the Finger Lakes region is well known to its residents and to the many tourists who explore it each year. What is not so well known is the region's unique geology. Its distinctive features are the results of a singular combination of structural units and forces that operated thousands of years ago, when successive advances of the Ice Age continental glaciers thrust their fronts against escarpments extending across their path and into pre-glacial valleys. How these escarpments affected the flow of ice and how the glacial invasions remodeled the entire region is the subject of O. D. von Engeln's classic study. Following a brief prologue on the region's pre-glacial history, the author discusses each of the region's characteristic features: what caused it, its nature, its relation to other phenomena of the region and, often, to other distinctive topographic phenomena throughout the world. His book is a valuable and accessible introduction to the region's geologic history and provides insights into geologic methodology--how a region gives evidence of its history, what possible explanations for a phenomenon exist for geologists, and how they choose among them. Natives of the Finger Lakes, newcomers, and tourists alike will finish this book with a greater appreciation of this geologically fascinating area and with renewed curiosity about the formative years of our planet.

The Commedia dell'Arte Domenico Pietropaolo. 2022-07-14 What were the origins of commedia dell'arte and how did it evolve as a dramatic form over time and as it spread from Italy? How did its relationship to the ruling ideology of the day change during the Enlightenment? What is its legacy today? These are just some of the questions addressed in this authoritative overview of the dramatic, ideological and aesthetic form of commedia dell'arte. The book's 3 sections examine the changing role of performers and playwrights, improvisatory scenarios and scripted performance, and its function as a vehicle for social criticism, to offer readers a clear understanding of commedia dell'arte's evolution in Renaissance Italy and beyond. This study throws new light on the role of women performers; on the changing ideological discourse of commedia dell'arte, which included social reform and, later, conservatism as well as the alienation of ethnic minorities in complicity with its audience; and on its later adaptation into hybrid forms including grotesque dance and the giullarata typified by the work of Dario Fo.

MRAPs, Irregular Warfare, and Pentagon Reform Christopher J. Lamb, Matthew J. Schmidt, Berit G. Organic Waste Composting through Nexus Thinking Hiroshan Hettiarachchi, Serena Caucci, Kai Schwärzel. 2020-11-23 Organic waste composting is another excellent example to demonstrate the power and the benefits of nexus thinking. Even though organic waste composting itself is not a new topic, those who want to start a new project or align an ongoing project with nexus thinking, find it difficult to gather the necessary information. With nine case studies from four continents, this book aims to fill above gap in literature. While current literature on composting is often found to be limited to either soil/agriculture sector or waste management sector, this book presents a combined point of view. This open access book starts with an introductory chapter that describes the need to bring the waste management aspects and soil nutrient management aspects of compost production into one integrated theme. The relevance of nexus thinking and the Sustainable Development Goals (SDGs) are also presented in this introduction. The first three chapters after the introduction covers composting from the solid waste management and its policy aspects, taking examples from three developing countries. The next three examples are mostly about the benefits composting can provide to the soil and agriculture. These examples are also from three developing countries, but with a mixture of urban as well as rural settings. Last three chapters present more insight into the latest developments taking examples from Europe, as well as new methods adapted from the traditional styles from Africa.

Renaissance Fun Philip Steadman. 2021-04-13 Renaissance Fun is about the technology of Renaissance entertainments in stage machinery and theatrical special effects; in gardens and fountains; and in the automata and self-playing musical instruments that were installed in garden grottoes. How did the machines behind these shows work? How exactly were chariots filled with singers let down onto the stage? How were flaming dragons made to fly across the sky? How were seas created on stage? How did mechanical birds imitate real birdsong? What was 'artificial music', three centuries before Edison and the phonograph? How could pipe organs be driven and made to play themselves by waterpower alone? And who were the architects, engineers, and craftsmen who created these wonders? All these questions are answered. At the end of the book we

visit the lost 'garden of marvels' at Pratinolo with its many grottoes, automata and water jokes; and we attend the performance of Mercury and Mars in Parma in 1628, with its spectacular stage effects and its music by Claudio Monteverdi - one of the places where opera was born. Renaissance Fun is offered as an entertainment in itself. But behind the show is a more serious scholarly argument, centred on the enormous influence of two ancient writers on these subjects, Vitruvius and Hero. Vitruvius's Ten Books on Architecture were widely studied by Renaissance theatre designers. Hero of Alexandria wrote the Pneumatics, a collection of designs for surprising and entertaining devices that were the models for sixteenth and seventeenth century automata. A second book by Hero On Automata-Making - much less well known, then and now - describes two miniature theatres that presented plays without human intervention. One of these, it is argued, provided the model for the type of proscenium theatre introduced from the mid-sixteenth century, the generic design which is still built today. As the influence of Vitruvius waned, the influence of Hero grew.

You can use online tools like Smallpdf, iLovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
