South East Asia (Routledge Revivals) Jonathan Rigg. 2013-09-13 Southeast Asia: A Region in Transition, first published in 1991, is a contemporary human geography of the 'market' economies of the region usually defined by membership of the Association of Southeast Asian Nations (ASEAN). Organized thematically, the chapters deal with the environment and development, plural societies, agrarian change and urbanization. This thematic approach provides a comprehensive picture of the ASEAN countries and gives a depth of coverage often lacking in other regional geographies. With a detailed introduction dealing with the physical environment and history of the region, this work will be of great value to students studying the human geography of Southeast Asia, as well as those with a more general interest in the issues and developments affecting the ASEAN region.

Effects of Land-Use Change on Atmospheric CO₂ Concentrations Virginia H. Dale. 2012-12-06 Roger C. Dahlman Environmental Sciences Division U.S. Department of Energy Washington, D.C. The potential for humans to alter Earth's atmosphere has been recognized since the end of the 19th century when Arrhenius estimated that a doubling of atmospheric carbon dioxide could alter the atmospheric radiation balance and raise average global temperature. Today, atmospheric CO concentrations play an important part in the 2 climate-change debate. Sources and sinks of CO associated with land use can be 2 significant determinants of the rate and magnitude of atmospheric CO change. 2 Combustion of fossil fuels and the deforestation associated with land-use change both contribute CO to the atmosphere; in contrast, biological processes on land create 2 potential sinks for the excess CO . Thus, land-use change and associated biological 2 processes become important elements in assessments of future atmospheric CO 2 increase; land-cover properties also affect the Earth's albedo, which is a climate feedback.
