The Myth of Mirror Neurons: The Real Neuroscience of Communication and Cognition Gregory Hickok.2014-08-18 An essential reconsideration of one of the most far-reaching theories in modern neuroscience and psychology. In 1992, a group of neuroscientists from Parma, Italy, reported a new class of brain cells discovered in the motor cortex of the macaque monkey. These cells, later dubbed mirror neurons, responded equally well during the monkey's own motor actions, such as grabbing an object, and while the monkey watched someone else perform similar motor actions. Researchers speculated that the neurons allowed the monkey to understand others by simulating their actions in its own brain. Mirror neurons soon jumped species and took human neuroscience and psychology by storm. In the late 1990s theorists showed how the cells provided an elegantly simple new way to explain the evolution of language, the development of human empathy, and the neural foundation of autism. In the years that followed, a stream of scientific studies implicated mirror neurons in everything from schizophrenia and drug abuse to sexual orientation and contagious yawning. In *The Myth of Mirror Neurons*, neuroscientist Gregory Hickok reexamines the mirror neuron story and finds that it is built on a tenuous foundation—a pair of codependent assumptions about mirror neuron activity and human understanding. Drawing on a broad range of observations from work on animal behavior, modern neuroimaging, neurological disorders, and more, Hickok argues that the foundational assumptions fall flat in light of the facts. He then explores alternative explanations of mirror neuron function while illuminating crucial questions about human cognition and brain function: Why do humans imitate so prodigiously? How different are the left and right hemispheres of the brain? Why do we have two visual systems? Do we need to be able to talk to understand speech? What's going wrong in autism? Can humans read minds? *The Myth of Mirror Neurons* not only delivers an instructive tale about the course of scientific progress—from discovery to theory to revision—but also provides deep insights into the organization and function of the human brain and the nature of communication and cognition.

Chesterton: Apostle of Common Sense*, is the President of the American Chesterton Society.

**Luminous Fish** Lynn Margulis.2007-03-07 This collection of linked stories by internationally renowned evolutionist Lynn Margulis reveals science from the inside—its thrills, disappointments, and triumphs. A largely fictional account, it draws on her decades of experience to portray the poor judgment, exhaustion, and life-threatening dedication of real scientists—their emotional preoccupations, sexual distractions, and passions for research. The esoteric, demanding, sometimes exhilarating world of science emerges from the shadows of its passive narrative into the sunlight of the personal voice of those who attempt to wrench secrets directly from nature. All of us who struggle to balance family, professional, and social commitments with intellectual quest will be intrigued by the humanity of these tales.

*Considering Animals* Carol Freeman, Elizabeth Leane, Yvette Watt.2011 *Considering Animals* draws on the expertise of scholars trained in the biological sciences, humanities, and social sciences to investigate the complex and contradictory relationships humans have with nonhuman animals. Taking their cue from the specific animal moments that punctuate these interactions, the essays engage with contemporary issues and debates central to human-animal studies: the representation of animals, the practical and ethical issues inseparable from human interactions with other species, and, perhaps most challengingly, the compelling evidence

that animals are themselves considering beings. Case studies focus on issues such as animal emotion and human sentimentality; the representation of animals in contemporary art and in recent films such as *March of the Penguins*, *Happy Feet*, and *Grizzly Man*; animals' experiences in catastrophic events such as Hurricane Katrina and the SARS outbreak; and the danger of overvaluing the role humans play in the earth's ecosystems. From Marc Bekoff's moving preface through to the last essay, *Considering Animals* foregrounds the frequent, sometimes uncanny, exchanges with other species that disturb our self-contained existences and bring into focus our troubled relationships with them. Written in an accessible and jargon-free style, this collection demonstrates that, in the face of species extinction and environmental destruction, the roles and fates of animals are too important to be left to any one academic discipline.

*The Tablet of Destinies* Roberto Calasso.2022-07-26 Roberto Calasso, a literary institution of one (The Paris Review), tells the story of the eternal life of Utnapishtim, the savior of man, in the eleventh part of his great literary project. A long time ago, the gods grew tired of humans, who were making too much noise and disturbing their sleep, and they decided to send a Flood to destroy them. But Ea, the god of fresh underground water, didn't agree and advised one of his favorite mortals, Utnapishtim, to build a quadrangular boat to house humans and animals. So Utnapishtim saved living creatures from the Flood. Rather than punish Utnapishtim, Enlil, king of the gods, granted him eternal life and banished him to the island of Dilmun. Thousands of years later, Sindbad the Sailor is shipwrecked on that very same island, and the two begin a conversation about courage, loss, salvation, and sacrifice. What Utnapishtim tells Sindbad is the subject of this book, the eleventh part of Roberto Calasso's great opus that began in 1983 with *The Ruin of Kasch*. The *Tablet of Destinies*, a continuous narrative from beginning to end, delves into our earliest mythologies and records the origin stories of human civilization.

*Semiotics of Animals in Culture* Gianfranco Marrone,Dario Mangano.2018-12-28 To place animals within the realm of nature, means inserting them among the articulations of culture and the social. Semiotics has never avoided this chiasmus, choosing to deal from the outset with the problem of the languages of animals following the old admonition of Montaigne: it is not that animals do not talk, it is us who do not understand them. Recent research in the field of the anthropology of nature and sociology of sciences and techniques allow to think about the Zoosemiotic issue in a different way. Instead of transplanting the language structures - gestures, LIS, etc. - for a semiotic study of the forms of the human and social meaning, it seems more apt to look at their discourse, and as such, the actual interactions, communicative and scientific as well as practical and functional, between humans and non-humans. This book aims to investigate precisely this hypothesis, known here as Zoosemiotics 2.0, working on several fronts and levels: · Anthropology · Languages of the image and visual representations, from art history to cinema · Old and new media. From literature to comics, from cartoons to TV documentaries but also advertising, music, Web and social networks. All those cultural products that talk about the role of human and non-human in society implicitly proposing (and in some way imposing) a form of articulation of such a relationship. · Food and feeding rites · Animalist, vegetarian and vegan movements · Philosophy: metaphysics, ethics, aesthetics

*Contested Categories* Ayo Wahlberg,Susanne Bauer.2016-05-13 Drawing on social science perspectives, *Contested Categories* presents a series of empirical studies that engage with the often shifting and day-to-day realities of life sciences categories. In doing so, it shows how such categories remain contested and dynamic, and that the boundaries they create are subject to negotiation as well as re-configuration and re-stabilization processes. Organized around the themes of biological substances and objects, personhood and the genomic body and the creation and dispersion of knowledge, each of the volume's chapters reveals the elusive nature of fixity with regard to life science categories. With contributions from an international team of scholars, this book will be essential reading for anyone interested in the social, legal, policy and ethical implications of science and technology and the life sciences.

**The Cambridge Companion to Ballet** Marion Kant.2007-06-07 Ballet is a paradox: much loved but little studied. It is a beautiful fairy tale; detached from its origins and unrelated to the men and women who created it. Yet ballet has a history, little known and rarely presented. These great works have dark sides and moral ambiguities, not always nor immediately visible. The daring and challenging quality of ballet as well as its perceived 'safe' nature is not only one of its fascinations but one of the intriguing questions to be explored in this Companion. The essays reveal the conception, intent and underlying meaning of ballets and recreate the historical reality in which they emerged. The reader will find new and unexpected aspects of ballet, its history and its aesthetics, the evolution of plot and narrative, new insights into the reality of training, the choice of costume and the transformation of an old art in a modern world.

The subject matter presented here ranges from detailed accounts and personal observations relating to Fromm's distinguished career, to some very new and valuable data on the psychophysiological correlates of hypnosis, the phenomenology of self-hypnosis, and an integrative model for short-term therapy. **Meta Math!** Gregory Chaitin.2006-11-14 Gregory Chaitin, one of the world's foremost mathematicians, leads us on a spellbinding journey, illuminating the process by which he arrived at his groundbreaking theory. His investigations shed light on what we can ultimately know about the universe and the very nature of life. He takes us to the very frontiers of scientific thinking, and helps us to appreciate the art—and the sheer beauty—in the science of math.

**October 16, 1943/Eight Jews** Giacomo Debenedetti.2020-11-15 For more than fifty years, Giacomo Debenedetti's *October 16, 1943* has been considered one of the best and most accurate accounts of the shockingly brief and efficient roundup of more than one thousand Roman Jews from the oldest Jewish community in Europe for the gas chambers of Auschwitz. Completed a year after the event, Debenedetti's intimate details and vivid glimpses into the lives of the victims are especially poignant because Debenedetti himself was there to witness the event, which forced him and his entire family into hiding. *Eight Jews*, the companion piece to *October 16, 1943*, was written in response to testimony about the Ardeatine Cave Massacres of March 24, 1944. In this essay, Debenedetti offers insights into that grisly horror and into assumptions about racial equality. Both of these stunning works are appearing together, along with Alberto Moravia's preface to Debenedetti's *October 16, 1943*, for the first time in an American translation. *October 16, 1943/Eight Jews* gives American readers a first glimpse into the extraordinary mind of the man who was Italy's foremost critic of twentieth-century literature. In addition to probing the deeper, haunting questions of the Holocaust, Debenedetti briefly describes the seizure of the Roman Jewish community's library of early manuscripts and incunables, the most valuable Jewish library in all of Italy. Following the roundup, this library was never seen again. Award-winning translator Estelle Gilson offers an additional essay on the history of the library and modern-day attempts to locate it. *October 16, 1943/Eight Jews* is a moving work that will continue to challenge readers long after they have closed its pages.

**The Other Venice** Predrag Matvejević.2007 To know a city is to become intimately intertwined with its nooks, crevices, secret passageways, and dark places where its lifeblood flows--and what city has more of those than Venice? In *The Other Venice*, Predrag Matvejevic ventures past the infamous canals and cobblestone streets of the tourist's Venice to find the heart of the ancient Italian metropolis. A lyric re-imagining of the City of Romance, *The Other Venice* utterly reconfigures the Venetian landscape, as Matvejevic follows both real and imaginary maps, contemporary and historical, to trace out the details of this sensuous city. He probes into what the ancient metropolis means to its people, the nation, and global culture. But he also finds hints of life in the smallest and most mundane details--ancient bridges, rust-flecked boats, wall sculptures, rivers, and piazzas scattered throughout the city. Each has a little-known story and with Matvejevic as our guide, he reveals the stories behind them all. The book carries readers to a Venice that has escaped the eyes of writers, artists, and photographers through the centuries, and Matejevic by turns plays a historian, cartographer, anthropologist, and philologist as he unravels elusive artifacts of time past. Arresting black-and-white photographs by renowned photographer Sarah Quill accompany the text, offering a silent testament to Matvejevic's pilgrimage. A fascinating and beautifully written guide, *The Other Venice* reminds us that there is always another mystery to uncover in the city of water and stone.
