Burke,Peter Ross.1996-10-02 Provides detailed information about the signal transduction pathways used by interferons to activate gene transcription. In addition, this book discusses how the same pathways are used by many other cytokines and thus provide a forum for cross-talk among these important biological response modifiers. Additionally, the book introduces the interferon system and describes the interferon-inducible genes whose products are responsible for the cellular actions of interferons. The nature of the interferon receptors and how the transcriptional signals are transmitted from the receptors on the cell surface to the genes in the nucleus are discussed in detail. Finally, the use of similar pathways of signal transduction by other cytokines is highlighted.

Translanguaging in Higher Education Catherine M. Mazak, Kevin S. Carroll. 2016-12-09 This book examines translanguaging in higher education and provides clear examples of what translanguaging looks like in practice in particular contexts around the world. While higher education has historically been seen as a monolingual space, the case studies from the international contexts included in this collection show us that institutions of higher education are often translingual spaces that reflect the multilingual environments in which they exist.

Chapters demonstrate how the use of translanguaging practices within the context of global higher education, where English plays an increasingly important role, allows students and professors to build on their linguistic repertoires to more efficiently and effectively learn content. The documentation of such practices within the context of higher education will further legitimize translanguaging practices and may lead to their increased use not only in higher education but also in both primary and secondary schools.

*Comparative Law* Uwe Kischel.2019-02-21 Uwe Kischel's comprehensive treatise on comparative law offers a critical introduction to the central tenets of comparative legal scholarship. The first part of the book is dedicated to general aspects of comparative law. The controversial question of methods, in particular, is addressed by explaining and discussing different approaches, and by developing a contextual approach that seeks to engage with real-world issues and takes a practical perspective on contemporary comparative legal scholarship. The second part of the book offers a detailed treatment of the major legal contexts across the globe, including common law, civil law systems (based on Germany and France, and extended to Eastern Europe, Scandinavia, and Latin America, among others), the African context (with an emphasis on customary law), different contexts in Asia, Islamic law and law in Islamic countries (plus a brief treatment of Jewish law and canon law), and transnational contexts (public international law, European Union law, and *lex mercatoria*). The book offers a coherent treatment of global legal systems that aims not only to describe their varying norms and legal institutions but to propose a better way of seeking to understand how the overall context of legal systems influences legal thinking and legal practice.
