**The Sounds of Early Cinema** Richard Abel,Rick R. Altman.2001-10-03 The Sounds of Early Cinema is devoted exclusively to a little-known, yet absolutely crucial phenomenon: the ubiquitous presence of sound in early cinema. Silent cinema may rarely have been silent, but the sheer diversity of sound(s) and sound/image relations characterizing the first 20 years of moving picture exhibition can still astonish us. Whether instrumental, vocal, or mechanical, sound ranged from the improvised to the pre-arranged (as in scripts, scores, and cue sheets). The practice of mixing sounds with images differed widely, depending on the venue (the nickelodeon in Chicago versus the summer Chautauqua in rural Iowa, the music hall in London or Paris versus the newest palace cinema in New York City) as well as on the historical moment (a single venue might change radically, and many times, from 1906 to 1910). Contributors include Richard Abel, Rick Altman, Edouard Arnoldy, Mats Björkin, Stephen Bottomore, Marta Braun, Jean Châteauevert, Ian Christie, Richard Crangle, Helen Day-Mayer, John Fullerton, Jane Gaines, André Gaudreault, Tom Gunning, François Jost, Charlie Keil, Jeff Klenotic, Germain Lacasse, Neil Lerner, Patrick Loughney, David Mayer, Dominiq Nasta, Bernard Perron, Jacques Polet, Lauren

Ricardo Bofill Gestalten,Ricardo Bofill,Pablo Bofill,Robert Klanten,Maria-Elisabeth Niebius.2019-03-05 Poetic spaces, surreal structures and dramatic visions. The extraordinary career of Ricardo Bofill is collected in this monograph, which reveals his inspiring approach to architecture, and to life.Ricardo Bofill is one of the 20th century's most unique architects and radical visionaries. With his Taller de Arquitectura he built spaces for everyday life with otherworldly aesthetics, that have been elevated to iconic status in countless films and images. His visions for urban and communal life challenged preconceived notions of shared space and proposed alternative styles of living. This monograph explores his revolutionary approach by profiling his greatest projects. Spectacular new photography, texts from experts and from Bofill himself are complemented by working drawings and floor plans. At a time when prevailing styles in architecture are becoming ever more homogenous, Bofill's fantastic creations satisfy a longing for originality, personality and progressive ideals.

Decorative Furnishings and Objets D'art in the Louvre Musée du Louvre,Marc Bascou.2014 Over two hundred and fifty masterpieces from one of the most magnificent eras in the decorative arts are featured in this book, ranging from the splendors of courtly art under Louis XIV to the dazzling creations inspired first by Madame de Pompadour under Louis XV and then by Queen Marie-Antoinette under Louis XVI. A broad perspective on interior decoration, luxury goods, and the art market is offered through lavish furniture by the likes of André-Charles Boulle and Charles Cressent durine, the Régence, through extravagant dinner services, and through the magnificent porcelain and tapestries produced by the royal manufactories, constituting a 'moment of perfection in French art' that lasted until the Revolution. The Louvre's new rooms devoted to seventeenth-

and eighteenth-century decorative arts opened in May 2014. Some two thousand items are displayed in nearly twenty thousand square feet of exhibition space, representing one of the world's finest collections of furnishings and objets d'art from the reign of Louis XIV, through that of Louis XVI. The new galleries are organized chronologically and are punctuated by spectacular period rooms that recreate the magnificent wood-paneled interiors of lavish residences and princely palaces in eighteenth-century Paris. These reconstitutions of a bygone period provide the setting for truly remarkable objets d'art from the Louvre's Department of Decorative Arts--now placed in their original intellectual and material context, these items recreate a vanished atmosphere and reveal their full meaning as well as their full beauty.--Page [4] of cover.

**The Public Domain** James Boyle.2016-09-06 Please read the legal notice included in this e-book and/or check the copyright status in your country. In this enlightening book James Boyle describes what he calls the range wars of the information age--today's heated battles over intellectual property. Boyle argues that just as every informed citizen needs to know at least something about the environment or civil rights, every citizen should also understand intellectual property law. Why? Because intellectual property rights mark out the ground rules of the information society, and today's policies are unbalanced, unsupported by evidence, and often detrimental to cultural access, free speech, digital creativity, and scientific innovation. Boyle identifies as a major problem the widespread failure to understand the importance of the public domain--the realm of material that everyone is free to use and share without permission or fee. The public domain is as vital to innovation and culture as the realm of material protected by intellectual property rights, he asserts, and he calls for a movement akin to the environmental movement to preserve it. With a clear analysis of issues ranging from Jefferson's philosophy of innovation to musical sampling, synthetic biology and Internet file sharing, this timely book brings a positive new perspective to important cultural and legal debates. If we continue to enclose the commons of the mind, Boyle argues, we will all be the poorer.

**The Architecture of the French Enlightenment** Allan Braham.1989-01-01 Allan Braham's comprehensive treatment of this brilliant and complex period introduces the reader to the major buildings, architects, and architectural patrons of the day. At the same time, it explores the broader determinants of architectural production: the rapid economic expansion of Paris and the main provincial centers and the increasing demand for improved public amenities--theaters, schools, markets, and hospitals. This generously illustrated book provides a vivid commentary on society and manners in pre-Revolutionary France.

Nicolas Lancret Mary Tavener Holmes,Nicolas Lancret.1991 During his lifetime (1690-1743), and throughout the greater part of the eighteenth century, Nicolas Lancret was one of the most celebrated artists in France. After nearly two centuries of having been overshadowed by the work of certain contemporaries (notably Watteau), the singular appeal and sophisticated charm of Lancret's genre paintings are once more widely recognized and appreciated. This is the first book in English about Lancret, a key force in the development of the visual arts in eighteenth-century France. As one of the leading artists of his time, Lancret counted among his patrons the crowned heads of Europe, along with major connoisseurs among the aristocracy and in the financial community. He was also the favorite genre artist of Louis XV, who commissioned paintings from him for various royal residences--especially Versailles and Fontainebleau. The reasons for Lancret's popularity and success are apparent in the paintings and drawings splendidly reproduced in this book. His pictures tell lively and intelligible stories, his themes are inventive and entertaining, and his color combinations are bright and striking. His images made the transition from decorative painting to engraving with ease, and then proceeded to capture the popular imagination in much the same way as amusing gossip. As he matured, Lancret developed his talent for narrative--for a visual form of storytelling that is subtle and sophisticated, yet also ingenuous and folkloric. This tradition in European art was strong and continuous, as reflected in the work of its most famous adherents, Hogarth and Greuze. No eighteenth-century painter was more firmly centered and active in that tradition than Nicolas Lancret.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. *On Divers Arts* Theophilus.2012-04-30 I have made it my concern to hunt out this technique for your study as I learned it by looking and listening. *On Divers Arts*, c. 1122, is the oldest extant manual on artistic crafts to be written by a practicing artist. Before Theophilus, manuscripts on the arts came from scholars and philosophers standing outside the actual profession. *On Divers Arts* describes actual 12th-century techniques in painting, glass, and metalwork, which the Benedictine author wished to pass on to those gifted by God with a talent for making beautiful things. Theophilus teaches, with rigorous attention to fact but also with great reverence the making of pigments for fresco painting, the manufacture of glue, the technique of gold leaf on parchment (the first recorded European reference to true paper), how to blow glass and design stained glass windows, how to fashion gold and silver chalices, and how to make a pipe organ and church bells. Precise instruction on enameling, chasing, repoussé, niello, and

beaded wire work prove Theophilus's first-hand knowledge of his craft. While 90 percent of Theophilus's writing is sound technical knowledge, medieval folk lore occasionally spices his text: Tools are also made harder by hardening them in the urine of a small red-headed boy than by doing so in plain water. But the magnificent fact of *On Divers Art* remains its status as the first technical treatise on painting, glass, and metalwork, for which actual specimens still survive. The editors have taken care to ensure both philological and technological accuracy for this authoritative edition of a medieval classic, a manual of great importance to craftsmen, historians of art and science, and all who delight in the making of the beautiful.

*An Introduction to Language and Linguistics* Ralph Fasold, Jeffrey Connor-Linton. 2006-03-06 This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

**European Clocks in the J. Paul Getty Museum** Gillian Wilson, David Harris Cohen, Jean Nérée Ronfort, Jean-Dominique Augarde, Peter Friess. 2013-08-15 Among the finest examples of European craftsmanship are the clocks produced for the luxury trade in the eighteenth century. The

J. Paul Getty Museum is fortunate to have in its decorative arts collection twenty clocks dating from around 1680 to 1798: eighteen produced in France and two in Germany. They demonstrate the extraordinary workmanship that went into both the design and execution of the cases and the intricate movements by which the clocks operated. In this handsome volume, each clock is pictured and discussed in detail, and each movement diagrammed and described. In addition, biographies of the clockmakers and enamellers are included, as are indexes of the names of the makers, previous owners, and locations.
