*International Encyclopedia of Housing and Home* .2012-10-09 Available online via SciVerse ScienceDirect, or in print for a limited time only, The International Encyclopedia of Housing and Home, Seven Volume Set is the first international reference work for housing scholars and professionals, that uses studies in economics and finance, psychology, social policy, sociology, anthropology, geography, architecture, law, and other disciplines to create an international portrait of housing in all its facets: from meanings of home at the microscale, to impacts on macro-economy. This comprehensive work is edited by distinguished housing expert Susan J. Smith, together with Marja Elsinga, Ong Seow Eng, Lorna Fox O'Mahony and Susan Wachter, and a multi-disciplinary editorial team of 20 world-class scholars in all. Working at the cutting edge of their subject, liaising with an expert editorial advisory board, and engaging with policy-makers and professionals, the editors have worked for almost five years to secure the quality, reach, relevance and coherence of this work. A broad and inclusive table of contents signals (or testifies to) detailed investigation of historical and theoretical material as well as in-depth analysis of current issues. This seven-volume set contains over 500 entries, listed alphabetically, but grouped into seven thematic sections including methods and approaches; economics and finance; environments; home and homelessness; institutions; policy; and welfare and well-being. Housing professionals, both academics and practitioners, will find The International Encyclopedia of Housing and Home useful for teaching, discovery, and research needs. International in scope, engaging with trends in every world region The editorial board and contributors are drawn from a wide constituency, collating expertise from academics, policy makers, professionals and practitioners, and from every key center for housing research Every entry stands alone on its merits and is accessed alphabetically, yet each is fully cross-referenced, and attached to one of seven thematic categories whose 'wholes' far exceed the sum of their parts

Housing on the Hills in India Bhaskar Majumder.2011 Study conducted in Uttarakhand, India.  
Disaster Studies Janki Andharia.2020-03-25 This book covers several dimensions of disaster studies as an emerging discipline. It is the inaugural book in the series 'Disaster Studies and Management' and deals with questions such as "Is disaster management a field of practice, a profession, or simply a new area of study?" Exploring intersectionalities, the book also examines areas of research that could help enhance the discourse on disaster management from policy and practice perspectives, revisiting conventional event-centric approaches, which are the basis for most writings on the subject. Several case studies and comparative analyses reflect a critical reading of research and practice concerning disasters and their management. The book offers valuable insights into various subjects including the challenge of establishing inter- and multi-disciplinary teams within the academia involved in disaster studies, and sociological and anthropological readings of post-disaster memoryscapes. Each of the contributors has an enduring interest in disaster studies, thus enriching the book immensely. This book will be of interest to all the students and scholars of disaster studies and disaster management, as well as to practitioners and policymakers.

**Politics and Society between Elections** Siddharth Swaminathan, Suhas Palshikar. 2020-12-29 Elections are episodic; governance is routine. This book studies patterns in public opinion on politics and society between elections in India. By using the survey data covering 24 Indian states including the National Capital Region of Delhi (NCR), it will serve as State barometers of public opinion. The surveys seek to understand how politics and governance processes are nested in the social and political relationships between citizens inter se and with government functionaries. The book explores citizen perceptions about the social and political universes they inhabit in periods between elections. It examines social attitudes of citizens, friendship ties across social groups, gender roles and relationships; opinions on governance, ease of public service access, the citizen-state interface, and trust in political institutions; and, political attitudes and identity, nationalism, freedom of expression, and populism. This book explores public perceptions of everyday development and governance outcomes that are shaped by how the government functions between elections: how it relates to citizens on a regular basis; how it provides routine public services to them; and how public order is maintained. An incisive study on public opinion on politics, society, and governance in India, this book will be of great interest to scholars and researchers of political science, governance, public policy, and South Asian studies. It will also be of immense interest to bureaucrats, policymakers, think tanks, and organisations working in the areas of development studies, politics, society, and governance. Section 3.3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

*DISASTER MITIGATION* PARDEEP SAHNI, ALKA DHAMEJA, UMA MEDURY. 2001-01-01 Human vulnerability to natural disasters is an age-old phenomenon. Besides nature's wrath, human

interventions, too, have led to many calamities in the recent past. The heedless pace of development has left us ecologically barren. Most of the world's people live in ~developing~ economies, as do most of the world's poor. They also face the most debilitating consequences in the form of economic and social disruption caused by disasters. The long history of disasters and their intensity has brought the question of disaster management to the forefront. Disaster mitigation is a major component of a disaster management plan. Mitigation entails measures to reduce the physical, economic and social vulnerability of a community to disasters. Disaster management is still an untouched domain, suffering for want of systematic and committed research and development inputs. It is essential not only to consolidate its academic stature but also to infuse the requisite knowledge, skills and attitudes in the personnel connected with this field. This collection of articles from several contributors is an excellent analysis of different mitigation strategies. It offers insight into the different dimensions of disaster preparedness and mitigation. The underlying attempt in each chapter is to illuminate the pertinence of those mitigation efforts that would prepare everyone related with disaster management to comprehend and approach the problem more holistically. Besides government agencies, NGOs, and community-based bodies, the book is suitable for students pursuing the certificate programme in Disaster Management developed by the Indira Gandhi National Open University, New Delhi.
