Studying Men and Masculinity David Ford, Jeff Hearn. 1988

Why Jane and John Couldn't Read--and how They Learned Rosalie Fink. 2006 Although there is broad agreement about the major components of good reading instruction, many students continue to struggle with reading, and some never achieve high levels of literacy. This book presents an interest-driven model of reading that focuses on students' strengths and abilities, not their deficits.

Coco and Igor Chris Greenhalgh. 2013-07-01 Paris 1920. When Coco Chanel meets Igor Stravinsky, the exiled composer accepts the wealthy designer's offer to bring his family to summer at her villa. Soon she and her guest embark upon an affair which is complicated by their rigid devotion to their work, and Stravinsky's commitment to his family. The two lovers must consider the depth of their feelings, and whether, with the autumn drawing in, theirs is a relationship that can survive.

Suicide and the Body Politic in Imperial Russia Susan K. Morrissey. 2007-01-04 In early twentieth-century Russia, suicide became a public act and a social phenomenon of exceptional scale, a disquieting emblem of Russia's encounter with modernity. This book draws on an extensive range of sources, from judicial records to the popular press, to examine the forms, meanings, and regulation of suicide from the seventeenth century to 1914, placing developments into a pan-European context. It argues against narratives of secularization that read the history of suicide as a trajectory from sin to insanity, crime to social problem, and instead focuses upon the cultural politics of self-destruction. Suicide - the act, the body, the socio-medical problem - became the site on which diverse authorities were established and contested, not just the priest or the doctor but also the sovereign, the public, and the individual. This panoramic history of modern Russia, told through the prism of suicide, rethinks the interaction between cultural forms, individual agency, and systems of governance.

The Winter Solstice Ellen Jackson. 1994 Presents facts and folklore about the shortest day of the year, a day that has been filled with magic since ancient times.

The Seven Sins of Memory Daniel L. Schacter. 2002-05-07 A New York Times Notable Book: A psychologist's "gripping and thought-provoking" look at how and why our brains sometimes fail us (Steven Pinker, author of *How the Mind Works*). In this intriguing study, Harvard psychologist Daniel L. Schacter explores the memory miscues that occur in everyday life, placing them into seven categories: absent-mindedness, transience, blocking, misattribution, suggestibility, bias, and persistence. Illustrating these concepts with vivid examples—case studies, literary excerpts, experimental evidence, and accounts of highly visible news events such as the O. J. Simpson verdict, Bill Clinton's grand jury testimony, and the search for the Oklahoma City bomber—he also delves into striking new scientific research, giving us a glimpse of the fascinating neurology of memory and offering "insight into common malfunctions of the mind" (*USA Today*). "Though memory failure can amount to little more than a mild annoyance, the consequences of misattribution in eyewitness testimony can be devastating, as can the consequences of suggestibility among pre-school children and among adults with 'false memory syndrome' . . . Drawing upon recent neuroimaging research that allows a glimpse of the brain as it learns and remembers, Schacter guides his readers on a fascinating journey of the human mind." —*Library Journal* "Clear, entertaining and provocative . . . Encourages a new appreciation of the complexity and fragility of memory." —*The Seattle Times* "Should be required reading for police, lawyers, psychologists, and anyone else who wants to understand how memory can go terribly wrong." —*The Atlanta Journal-Constitution* "A fascinating journey through paths of memory, its open avenues and blind alleys . . . Lucid, engaging, and enjoyable." —*Jerome Groopman, MD* "Compelling in its science and its probing examination of everyday life, *The Seven Sins of Memory* is also a delightful book, lively and clear." —*Chicago Tribune* Winner of the William James Book Award

Will he catch them before they cause a national catastrophe?

Saint Brigid of Kildare Noel Kissane.2017 Despite being the female patron saint of Ireland and one of the most remarkable women in Irish history, St. Brigid has always been an elusive figure. Some scholars have argued that she never existed as a real person but was merely the Christian personification of the cult of a pagan goddess of the same name. This book reviews all the evidence-history, legend and folklore-and concludes that while she has many of the attributes of the goddess Brigit, she was certainly a real person. The book also reviews her cult and veneration in Ireland and overseas, from her lifetime down to the present day, as attested by place-names, holy wells, and folklore, and also by the large numbers of churches (Roman Catholic and Church of Ireland), schools, and GAA clubs dedicated to her. The Content and Context of Hate Speech Michael Herz,Peter Molnar.2012-04-09 The contributors to this volume consider whether it is possible to establish carefully tailored hate speech policies that are cognizant of the varying traditions, histories and values of different countries. Throughout, there is a strong comparative emphasis, with examples (and authors) drawn from around the world. All the authors explore whether or when different cultural and historical settings justify different substantive rules given that such cultural relativism can be used to justify content-based restrictions and so endanger freedom of expression. Essays address the following questions, among others: is hate speech in fact so dangerous or harmful to vulnerable minorities or communities as to justify a lower standard of constitutional protection? What harms and benefits accrue from laws that criminalize hate speech in particular contexts? Are there circumstances in which everyone would agree that hate speech should be criminally punished? What lessons can be learned from international case law?

Speaking Back Katharine Gelber.2002 What is hate speech? How does a person suffer when they are vilified? What can public policy do to redress it? This text proposes a new type of hate speech policy - speaking back - providing institutional, material and educational support to enable the victims of hate speech to respond.

From Wild Man to Wise Man Richard Rohr.2024-02-05 "Richard Rohr's work has been life-changing in my own experience. Over the last twenty years, no other teacher has had a more

formative impact on my mind and heart than this unpretentious Franciscan brother. Being set free from the need to perform—to get it right—has been a particularly important gift for me.”—Belden C. Lane, from the foreword A newly revised edition of Richard Rohr's perennial bestseller, this book reflects and incorporates his years of experience with men's work as well as changes in society. With Richard Rohr as mentor and guide, men—and women who care about men—will want to study and discuss the ideas presented here. A new foreword from Belden C. Lane emphasizes the need for this work to continue.

Psychosomatic Elizabeth A. Wilson.2004-06-16 How can scientific theories contribute to contemporary accounts of embodiment in the humanities and social sciences? In particular, how does neuroscientific research facilitate new approaches to theories of mind and body? Feminists have frequently criticized the neurosciences for biological reductionism, yet, Elizabeth A. Wilson argues, neurological theories—especially certain accounts of depression, sexuality, and emotion—are useful to feminist theories of the body. Rather than pointing toward the conventionalizing tendencies of the neurosciences, Wilson emphasizes their capacity for reinvention and transformation. Focusing on the details of neuronal connections, subcortical pathways, and reflex actions, she suggests that the central and peripheral nervous systems are powerfully allied with sexuality, the affects, emotional states, cognitive appetites, and other organs and bodies in ways not fully appreciated in the feminist literature. Whether reflecting on Simon LeVay's hypothesis about the brains of gay men, Peter Kramer's model of depression, or Charles Darwin's account of trembling and blushing, Wilson is able to show how the neurosciences can be used to reinvigorate feminist theories of the body.

The Hunger Pastor (German Classics) Wilhelm Raabe.2015-01-07 Wilhelm Raabe's novel entitled *Der Hungerpastor* (1864) is a classic example of the so-called poetic realism to which many - primarily bourgeois - German writers were devoted between 1850 and 1890. --- Wilhelm Raabe (1831 - 1910) became famous following the publication of his first novel, *Die Chronik der Sperlingsgasse* (The Sparrow Lane Chronicle), in 1856. His late works are known for their social criticism, while earlier novels, such as *The Hunger Pastor*, were intended to be primarily educational. --- With the figure of Hans Unwirrsch in *The Hunger Pastor*, Raabe completely lives up to his motto - Look up to the stars. Pay attention to the streets. The budding pastor, who was born into poverty, hungers for knowledge and a respected place in society, but he constantly stumbles over obstacles that his own life, as well as the lives of his family and friends, place before him. --- Raabe's rambling style makes his works difficult reading for many contemporary readers. In this version of *The Hunger Pastor*, several chapters have therefore been summarized by the translator, while the most important ones are published in their original length. --- Despite some anti-Semitic elements, which were commonly found in the works of some 19th century bourgeois writers in Germany, *The Hunger Pastor* is and remains a German literature classic.

Politics of Visibility Gerdien Jonker.2006 This book takes into view a large variety of Muslim actors who, in recent years, made their entry into the European public sphere. Without excluding the phenomenon of terrorists, it maps the whole field of Muslim visibility. The nine contributions present unpublished ethnographic materials that have been collected between 2003 and 2005. They track down the available space that is open to Muslims in EU member states claiming a visibility of their own. The volume collects male and female, secular and religious, radical and pietistic voices of sometimes very young people. They all speak about being a Muslim in Europe and the meaning of

real Islam.--BOOK JACKET.

Pejoration Rita Finkbeiner,Jörg Meibauer,Heike Wiese.2016-03-31 Though "pejoration" is an important notion for linguistic analysis and theory, there is still a lack of theoretical understanding and sound descriptive analysis. In this timely collection, the phenomenon of pejoration is studied from a number of angles. It contains studies from phonology, morphology, syntax, semantics and pragmatics, and deals with diverse languages and their variants. The collection will appeal to all those linguists with a genuine interest in locating pejoration at the grammar-pragmatics interface.

Face Value Alexander Todorov.2017-05-30 The scientific story of first impressions—and why the snap character judgments we make from faces are irresistible but usually incorrect We make up our minds about others after seeing their faces for a fraction of a second—and these snap judgments predict all kinds of important decisions. For example, politicians who simply look more competent are more likely to win elections. Yet the character judgments we make from faces are as inaccurate as they are irresistible; in most situations, we would guess more accurately if we ignored faces. So why do we put so much stock in these widely shared impressions? What is their purpose if they are completely unreliable? In this book, Alexander Todorov, one of the world's leading researchers on the subject, answers these questions as he tells the story of the modern science of first impressions. Drawing on psychology, cognitive science, neuroscience, computer science, and other fields, this accessible and richly illustrated book describes cutting-edge research and puts it in the context of the history of efforts to read personality from faces. Todorov describes how we have evolved the ability to read basic social signals and momentary emotional states from faces, using a network of brain regions dedicated to the processing of faces. Yet contrary to the nineteenth-century pseudoscience of physiognomy and even some of today's psychologists, faces don't provide us a map to the personalities of others. Rather, the impressions we draw from faces reveal a map of our own biases and stereotypes. A fascinating scientific account of first impressions, Face Value explains why we pay so much attention to faces, why they lead us astray, and what our judgments actually tell us.
Exposing the Demagogues Karsten Grabow,Florian Hartleb.2013 PDF available for free from <http://martenscentre.eu/publications/exposing-demagogues-right-wing-and-national-populist-parties-europe> Europe's right-wing and national populist parties are on the upswing, even despite some recent electoral setbacks. They have entered parliaments across Europe and some parties are even participating in national governments. What is remarkable is that right-wing and national populist

parties have changed their mobilisation tactics. While predominantly xenophobic in the past, right-wing populists now mobilise against further European integration and not without success. For all actors involved in EU politics, these developments should be taken seriously. As political think tanks either directly involved in EU politics or deeply committed to the idea of European integration, The Centre for European Studies (CES) and the Konrad-Adenauer-Stiftung (KAS) analyse the reasons behind the advance of Europe's right-wing populist parties. In addition, this volume discusses possible response strategies for the member parties of the European People's Party in order to counter the progress of right-wing and national populists.

Collecting Experiments Bruno J. Strasser.2019-06-07 Databases have revolutionized nearly every aspect of our lives. Information of all sorts is being collected on a massive scale, from Google to Facebook and well beyond. But as the amount of information in databases explodes, we are forced to reassess our ideas about what knowledge is, how it is produced, to whom it belongs, and who can be credited for producing it. Every scientist working today draws on databases to produce scientific knowledge. Databases have become more common than microscopes, voltmeters, and test tubes, and the increasing amount of data has led to major changes in research practices and profound reflections on the proper professional roles of data producers, collectors, curators, and analysts. *Collecting Experiments* traces the development and use of data collections, especially in the experimental life sciences, from the early twentieth century to the present. It shows that the current revolution is best understood as the coming together of two older ways of knowing—collecting and experimenting, the museum and the laboratory. Ultimately, Bruno J. Strasser argues that by serving as knowledge repositories, as well as indispensable tools for producing new knowledge, these databases function as digital museums for the twenty-first century.

Rhumb Lines and Map Wars Mark Monmonier.2010-11-15 In *Rhumb Lines and Map Wars*, Mark Monmonier offers an insightful, richly illustrated account of the controversies surrounding Flemish cartographer Gerard Mercator's legacy. He takes us back to 1569, when Mercator announced a clever method of portraying the earth on a flat surface, creating the first projection to take into account the earth's roundness. As Monmonier shows, mariners benefited most from Mercator's projection, which allowed for easy navigation of the high seas with rhumb lines—clear-cut routes with a constant compass bearing—for true direction. But the projection's popularity among nineteenth-century sailors led to its overuse—often in inappropriate, non-navigational ways—for wall maps, world atlases, and geopolitical propaganda. Because it distorts the proportionate size of countries, the Mercator map was criticized for inflating Europe and North America in a promotion of colonialism. In 1974, German historian Arno Peters proffered his own map, on which countries were ostensibly drawn in true proportion to one another. In the ensuing map wars of the 1970s and 1980s, these dueling projections vied for public support—with varying degrees of success. Widely acclaimed for his accessible, intelligent books on maps and mapping, Monmonier here examines the uses and limitations of one of cartography's most significant innovations. With informed skepticism, he offers insightful interpretations of why well-intentioned clerics and development advocates rallied around the Peters projection, which flagrantly distorted the shape of Third World nations; why journalists covering the controversy ignored alternative world maps and other key issues; and how a few postmodern writers defended the Peters worldview with a self-serving overstatement of the power of maps. *Rhumb Lines and Map Wars* is vintage Monmonier: historically rich, beautifully written, and fully engaged with the issues of our time.
