Brock,Douglas Fisher.2013-04-15 This popular text, now in its Fourth Edition, introduces pre-service and in-service teachers to the most current theories and methods for teaching literacy to children in elementary schools. The methods presented are based on scientific findings that have been tested in many classrooms. A wealth of examples, hands-on activities, and classroom vignettes--including lesson plans, assessments, lists of children's literature books to fiction and nonfiction texts, and more--illustrate the methods and bring them to life.The text highlights the importance of teaching EVERY child to become competent in all of the nuances and complexities of

reading, writing, and speaking. The value of reflection and peer discussion in learning to expand their students' literacies is emphasized. Readers are encouraged to reflect on their own experiences with reading and teaching throughout their lifetimes--experiences that will serve well in learning to teach reading. Your Turn boxes invite readers to think about their views of the material presented, and to talk with colleagues and teachers about their best ways of learning this new information. Asset Recovery Handbook Jean-Pierre Brun,Anastasia Sotiropoulou,Larissa Gray,Clive Scott.2021-02-08 Developing countries lose billions each year through bribery, misappropriation of funds, and other corrupt practices. Much of the proceeds of this corruption find 'safe haven' in the world's financial centers. These criminal flows are a drain on social services and economic development programs, contributing to the impoverishment of the world's poorest countries. Many developing countries have already sought to recover stolen assets. A number of successful high-profile cases with creative international cooperation has demonstrated that asset recovery is possible. However, it is highly complex, involving coordination and collaboration with domestic agencies and ministries in multiple jurisdictions, as well as the capacity to trace and secure assets and pursue various legal options—whether criminal confiscation, non-conviction based confiscation, civil actions, or other alternatives. This process can be overwhelming for even the most experienced

practitioners. It is exceptionally difficult for those working in the context of failed states, widespread corruption, or limited resources. With this in mind, the Stolen Asset Recovery (StAR) Initiative has developed and updated this Asset Recovery Handbook: A Guide for Practitioners to assist those grappling with the strategic, organizational, investigative, and legal challenges of recovering stolen assets. A practitioner-led project, the Handbook provides common approaches to recovering stolen assets located in foreign jurisdictions, identifies the challenges that practitioners are likely to encounter, and introduces good practices. It includes examples of tools that can be used by practitioners, such as sample intelligence reports, applications for court orders, and mutual legal assistance requests. StAR—the Stolen Asset Recovery Initiative—is a partnership between the World Bank Group and the United Nations Office on Drugs and Crime that supports international efforts to end safe havens for corrupt funds. StAR works with developing countries and financial centers to prevent the laundering of the proceeds of corruption and to facilitate more systematic and timely return of stolen assets.
