Kamusi ya Kijerumani na Kiswahili Cosmo Ambokile Lazaro. 2002

African Philosophy Paulin J. Hountondji. 1983 In this seminal exploration of the nature and future of African philosophy, Paulin J. Hountondji attacks a myth popularized by ethnophilosophers such as Placide Temples and Alexis Kagame that there is an indigenous, collective African philosophy, separate and distinct from the Western philosophical tradition. Hountondji contends that ideological manifestations of this view that stress the uniqueness of the African experience are protonationalist reactions against colonialism conducted, paradoxically, in the terms of colonialist discourse.

Loanwords in Japanese Mark Irwin. 2011-06-16 Loanwords in Japanese is the first monograph in a

Western language to offer a systematic and coherent overview of the vast number of words borrowed into Japanese since the mid-16th century. Its publication is timely given the fact that the loanword stratum's recent exponential growth has given rise to recent Japanese government publications seeking to outlaw foreign vocabulary or, at the very least, offer native translations. Beginning with a history of loanwords, chapters cover loanword phonology, loanword morphology, loanword orthography and official and public attitudes to Japanese loanwords. The volume will be of interest to a wide range of researchers, scholars and students of the Japanese language.

Teaching and Learning Mathematics in Multilingual Classrooms Anjum Halai, Philip Clarkson. 2015-12-17 Contemporary concerns in mathematics education recognize that in the increasingly technological and globalized world, with concomitant change in population demographics (e.g. immigration, urbanization) and a change in the status of languages (e.g. English as a dominant language of science and technology) multilingualism in classrooms is a norm rather than an exception. Shifts in perspective also view language not simply as an instrument for cognition with all learners equipped with this instrument in service of learning, although clearly in the classroom that remains of importance. Rather, it is now also being acknowledged that language use is inherently political, so that the language that gets official recognition in the classroom is invariably the language of the powerful elite, or the dominant societal language, or in the case of post-colonial contexts the language of the colonisers. From this socio-political role of language in learning quite different issues arise for teaching, learning and curriculum for linguistically marginalized learners than that of cognition (e.g. immigrants, second language learners, other). Policies on language in education are being considered and re-considered with specific reference to mathematics teaching and learning. Given the policy environment, globally the proposed publication

is timely. This edited collection draws on recent, emerging insights and understandings about the approaches to improving policy and practice in mathematics education and mathematics teacher education in multilingual settings. It presents, and discusses critically, examples of work from a range of contexts and uses these examples to draw out key issues for research in education in language diverse settings including teaching, learning, curriculum and fit these with appropriate policy and equity approaches. With contributions from all over the world, especially novice researchers in low income countries, this book is a valuable resource for courses in Mathematics Education and related social sciences both at the graduate and undergraduate levels, as well as for students of international development.

The volume's major asset lies in the diversity of topics, the range of languages and the African geographical areas covered. Not only do the contributors come from different nations in Africa but also many of them are established scholars who interact with and interpret the unique situations in their nations on a daily basis.

Stigmatization, Discrimination and Illness Bohle, Leah Franziska.2013-12-04 “She was given her own plate, her own cup, everything of her own, even when she just touched a cloth then nobody wanted to touch it again.” (Halima, HIV-seropositive) The book sheds light on the profound influence of an HIV-seropositive diagnosis on the lives of women and their social environment in the United Republic of Tanzania. The author, a medical doctor and social anthropologist, tells the story of six Tanzanian HIV-seropositive women, focusing on their negotiation and perception of illness and disease. Furthermore, the high levels of discrimination and stigmatization in the context of HIV-seropositivity that they experience are presented in detail, weaving together the impacts of an HIV-seropositive diagnosis with results analyzed both from a Medical Anthropology and Public Health perspective. Despite a new era of antiretroviral treatment, available in Tanzania free of cost, that has given cause for hope in a change in how the disease is perceived, the book impressively underlines that being HIV-seropositive remains a great challenge and heavy burden for women in Tanzania.

Gesundheit im Spiegel der Disziplinen, Epochen, Kulturen Dietrich H.W. Grönemeyer, Theo Kobusch, Heinz Schott. 2008-12-19 This is the initial volume in a new series entitled *Ars medicinae: The Science of Medicine and Human Salvation*. The name of the association behind the series is Initiative Gesundheit (Health Initiative), which is made up of physicians, researchers, and university teachers working in the sciences and the humanities. This first publication is designed to reflect the broad range of subjects to be addressed in the volumes to come, the immense variety of which has prompted the editors to opt for a format that will do justice to this multiplicity. The leitmotif for the first installment is health, a concept that both delineates the boundaries of the topics envisaged and provides an introduction to the issues and problems involved. In line with the interdisciplinary approach adopted by Initiative Gesundheit, the essays assembled in this volume approach the subject from the perspectives of medicine, medical history, philosophy, theology, and philology. Historically, the purview extends from antiquity to the present day.
