Suffolk County Police Officer Exam Review Guide Suffolk County Police Test Study Guide *Police Selection and Career Assessment* Marvin D. Dunnette, Stephan J. Motowidlo. 1976 This report details the research activities and validation efforts undertaken in the development of the two personnel evaluation inventories designed during this project, and outlines the instruments' operational uses. The major objective of this research program was to develop new methods for evaluating persons who apply for positions in police work and for assessing the potential of present police officers being considered for promotion. In order to accomplish this, critical features of four different police jobs were determined. These jobs were general patrol officer, investigator/detective, patrol sergeant, and intermediate command. The means by which these critical features and other information such as job performance ratings were utilized to develop and validate two personnel evaluation instruments are described in detail. The first evaluation instrument developed, which came to be called the police career index, consists of a brief, easily administered and objectively scored inventory to be used in preliminary screening of applicants and candidates for police jobs. The second procedure, the regional assessment center, consists of a series of police job simulation exercises designed to elicit behavioral indicators of a person's potential for success in various aspects of police work. Procedures for utilizing these instruments are outlined. Appendixes to this report include job performance description booklets for the four police positions, and tables showing reliability estimates for job performance ratings.

Police Promotion Super Course Andrew Borrello.2013-01-07 The contents of this book are designed specifically for law enforcement officers, front-line supervisors, and managers who have reached the point in their careers where they are ready to advance their rank. The focus of this information is on the police promotional oral interview. In a majority of police agencies across the country the oral interview is both the most critical part of the promotion process and the most difficult. An officer's performance during the oral interview is paramount because the process is highly competitive. Officers must "out-score" others also vying for promotion. This is difficult in that candidates may be competing against dozens or even hundreds of other police personnel many of whom may have greater education or more experience. The goal of this book is to provide professional law enforcement officers with a highly effective and valuable preparatory edge. This "edge" translates into real-world techniques, easy-to-apply skills, and a wealth of information on how to be distinctive and perform in an exceptional manner during the oral interview. The police officer, deputy, supervisor, or manager who utilizes the content of this unique book correctly can stand out among the other candidates, be more competitive, achieve preparatory confidence, and up their performance toward higher interview scores.

Mastering the Assessment Center Process Linsey C. Willis.2021-08-09 The Assessment Center process is the best method for identifying management potential in candidates and whether they can demonstrate a talent for planning and organizing, and possess the necessary judgment, communication skills and decision-making ability to move up the ranks. Many candidates do possess these abilities, but they have not learned how to apply them. This book will teach you how to use all your potential. Law enforcement officers are often confused, afraid, nervous or just plain curious about what they will experience when they go through the process. Most books on the assessment center process cover primarily its history, the skill dimensions, a description of the process and provide a few sample exercises. What makes this book different is that it provides an experiential approach to preparing for an assessment center by including numerous practice exercises, experiential learning, role player scripts, sample detailed Assessor Guides, and information from an experienced professional who has a 360-degree view of assessment center processes. By practicing these exercises, the reader will learn a great deal about their potential and abilities. The organization of this book starts with the notorious, challenging, perplexing, incorrectly defined and

life-changing in-basket exercise. The author has many years of experience with in-baskets, which has included providing feedback to candidates and training assessors. Many of the essential sample exercises and components of the in-basket exercise are included in this book and have been used in past assessment center processes or in customized exercises. This second edition also includes a new chapter on "The Future of Policing Exercises," and several new exercises have been included in the Exhibits Appendix. After reading the sample exercises and commentary contained herein, you will be convinced that your time and money have been well spent. Why? Because you will have practiced the exercises herein and, beyond just reading about the assessment center process, you will have learned about many of the most important components of the process.

Some Questions and Answers about Police Officer Selection Testing John E. Furcon.1972 This report presents major results and practical implications of two projects aimed at the identification and validation of more effective written tests for police officer selection. The projects, conducted in 1966-68 and 1969-71, worked with a diversified group of tests in a 'battery' consisting of tests of motivation, work interests, visual perception, interpersonal aptitudes, temperament, and pressure tolerance, thus assessing the importance of a wide range of qualifications in police officer selection. The predictive power of the tests was established by comparing the test scores of experienced police officers with their performance on eight different measures of job success. This comparison indicated relationships between performance on written tests and on-the-street effectiveness. The projects also explored procedures of making testing programs more equitable to minority group members while attempting to upgrade selection standards. Contents of the report are organized in a question-answer format and include sample questions and sales sources for the various tests.
