New Regionalism and the European Union Alex Warleigh-Lack, Nick Robinson, Ben Rosamond. 2011-06-01 The debates on regionalism have been polarized between European Union (EU) scholars and non-EU scholars, with the assumption being that regionalism within the EU and other regions of the world are quite distinct, with little to be learnt from dialogue with each other. This book challenges such assumptions and calls for a genuine debate between scholars of regionalism. This book demonstrates that more can and needs to be learned about regional integration all over the world through comparison and reflection on specific regional trends. Beginning with a theoretically driven introduction, leading experts in the field are brought together to offer a series of case studies on regional integration within Latin America, Africa, Asia, North America and Europe. In Part III the authors investigate the links between the EU and selected other regional organisations and processes, exploring the dynamics through which these interregional relations are developing and the implications they have for the study of contemporary regionalism/regionalisation both inside and beyond the continent of Europe. The conclusions set out a challenging research agenda for comparative studies in the field. Addressing one of the under-explored aspects of EU studies, the EU's coexistence with other pan-continental/regional organisations in the European continent, this book will be of interest to students and scholars of regionalism, IPE, European Studies and international politics.

Latin American and Caribbean International Institutional Law Marco Odello, Francesco Seatzu. 2015-07-10 This book is one of the few comprehensive works focusing on the sub-regional institutions in the Latin American and Caribbean region. These organisations and institutions enrich the co-operation at sub-regional level, but, in most cases, are neglected in legal literature. They have mainly economic purposes but they also contribute to new forms of institutional co-operation in other areas, including financial, political and social matters. The volume addresses some of the most representative of these institutions, such as the Mercosur, the Andean Community and sub-regional financial organisations (e.g. Central American Bank for Economic Integration and Andean Development Corporation) as well as new developments including the UNASUR and the Alliance for the Pacific. It provides updated information on the structure and changes of the institutions, and constitutes a valuable resource for those wishing to keep pace with legal developments in the fast-moving world of international institutional law. The book will appeal to a wide audience including researchers and practitioners specialising in international law and international organisations and related disciplines. Marco Odello, JD (Rome), LLM (Nottingham), PhD (Madrid) is a Reader in Law at Aberystwyth University, Wales, UK. Francesco Seatzu, JD (Cagliari), PhD (Nottingham) is Professor of International and European Law at the University of Cagliari, Sardinia, Italy.

Megaregulation Contested Benedict Kingsbury,David M. Malone,Paul Mertenskötter,Richard B. Stewart,Thomas Streinz,Atsushi Sunami.2019-06-06 The Japan-led Trans-Pacific Partnership (CPTPPA) of 2018 is the most far-reaching 'megaregional' economic agreement in force, with several major countries beyond its eleven negotiating countries also interested. Still bearing the stamp of the original US involvement before the Trump-era reversal, TPP is the first instance of 'megaregulation': a demanding combination of inter-state economic ordering and national regulatory governance on a highly ambitious substantive and trans-regional scale. Its text and ambition have influenced other negotiations ranging from the Japan-EU Agreement (JEEPA) and the US-Mexico-Canada Agreement (USMCA) to the projected Pan-Asian Regional Comprehensive Economic Partnership (RCEP). This book provides an extensive analysis of TPP as a megaregulatory project for channelling and managing new pressures of globalization, and of core critical arguments made against economic megaregulation from standpoints of development, inequality, labour rights, environmental interests, corporate capture, and elite governance. Specialized chapters cover supply chains, digital economy, trade facilitation, intellectual property, currency levels, competition and state-owned enterprises, government procurement, investment, prescriptions for national regulation, and the TPP institutions. Country studies include detailed analyses of TPP-related politics and approaches in Japan, Mexico, Brazil, China, India, Indonesia, and Thailand. Contributors include leading practitioners and scholars in law, economics, and political science. At a time when the WTO and other global-scale institutions are struggling with economic nationalism and geopolitics, and bilateral and regional agreements are pressed by public disagreement and incompatibility with digital and capital and value chain flows, the megaregional ambition of TPP is increasingly important as a precedent requiring the close scrutiny this book presents.

Mammals of South America, Volume 1 Alfred L. Gardner.2008-09-15 The vast terrain between Panama and Tierra del Fuego contains some of the world's richest mammalian fauna, but until now it has lacked a comprehensive systematic reference to the identification, distribution, and taxonomy of its mammals. The first such book of its kind and the inaugural volume in a three-part series, *Mammals of South America* both summarizes existing information and encourages further research of the mammals indigenous to the region. Containing identification keys and brief descriptions of each order, family, and genus, the first volume of *Mammals of South America* covers marsupials, shrews, armadillos, sloths, anteaters, and bats. Species accounts include taxonomic descriptions, synonymies, keys to identification, distributions with maps and a gazetteer of marginal localities, lists of recognized subspecies, brief summaries of natural history information, and discussions of issues related to taxonomic interpretations.Highly anticipated and much needed, this book will be a landmark contribution to mammalogy, zoology, tropical biology, and conservation biology.

Planet Earth And Environmental Alarms Anwar Hussain Khan.2023-11-09 Before discussing alarming environmental concerns, the readers are familiarized with basic geography of earth: its physical characteristics, its atmosphere, major water bodies & land masses, types of climates, natural vegetation, types of animals including marine life & human races. Subsequently natural disasters, environmental pollution, global warming, climate change and role of human activities in these are described. The book sheds light on present & future dangers to the earth due to environmental pollution & global warming leading to changing weather patterns, extreme weather

events, increased extent and frequency of natural disasters, which are environmental alarms, warranting urgent preventive measures. The book gives an overview of the steps to contain the pollution & global warming. The efforts at individual, national & international levels are required to sustain safe and healthy life on planet Earth for our present & future generations. As responsible inhabitants of earth, it is our duty to contribute as much as possible towards this cause. The complex subject is made easy for common understanding. The book only gives an overview with the aim to create awareness so that those interested may explore further. The top title of the book is therefore given as "Explore yourself".

Traditionally, the concept of quality of life has been viewed through objective indicators. Beyond Facts looks at quality of life through a new lens, namely, the perceptions of millions of Latin Americans. Using an enhanced version of the recently created Gallup World Poll that incorporates Latin America-specific questions, the Inter-American Development Bank surveyed people from throughout the region and found that perceptions of quality of life are often very different from the reality. These surprising findings have enormous significance for the political economy of the region and provide a wealth of information for policymakers and development practitioners to feast upon.

Recent Advances in Immunology to Target Cancer, Inflammation and Infections Jagat Kanwar. 2012-05-09 Immunology is the branch of biomedical sciences to study of the immune system physiology both in healthy and diseased states. Some aspects of autoimmunity draws our attention to the fact that it is not always associated with pathology. For instance, autoimmune reactions are highly useful in clearing off the excess, unwanted or aged tissues from the body. Also, generation of autoimmunity occurs after the exposure to the non-self antigen that is structurally similar to the self, aided by the stimulatory molecules like the cytokines. Thus, a narrow margin differentiates immunity from auto-immunity as already discussed. Hence, finding answers for how the physiologic immunity turns to pathologic autoimmunity always remains a question of intense interest. However, this margin could be cut down only if the physiology of the immune system is better understood. The individual chapters included in this book will cover all the possible aspects of immunology and pathologies associated with it. The authors have taken strenuous effort in elaborating the concepts that are lucid and will be of reader's interest.

Hydropolitical Vulnerability and Resilience Along International Waters .2007 Water is a unique and vital source, for which there is no substitute. Sustainable development of this rich resource in the region is complex as the distribution of water to all nations is heterogeneous, which increases the risk of being used or adapted inequitably. In recent years the sustainability discourse has broadened to include human systems. The purpose of this publication on hydropolitical vulnerability and resilience along international is to warrant broader promotion and dissemination of assessed information and data in order to support informed policy-making and provide a model for the regions

that face similar water challenges.

Routledge Handbook of Latin American Politics Peter Kingstone, Deborah J. Yashar. 2013-03-05 Latin America has been one of the critical areas in the study of comparative politics. The region's experiments with installing and deepening democracy and promoting alternative modes of economic development have generated intriguing and enduring empirical puzzles. In turn, Latin America's challenges continue to spawn original and vital work on central questions in comparative politics: about the origins of democracy; about the relationship between state and society; about the nature of citizenship; about the balance between state and market. The richness and diversity of the study of Latin American politics makes it hard to stay abreast of the developments in the many sub-literatures of the field. The Routledge Handbook of Latin American Politics offers an intellectually rigorous overview of the state of the field and a thoughtful guide to the direction of future scholarship. Kingstone and Yashar bring together the leading figures in the study of Latin America to present extensive empirical coverage, new original research, and a cutting-edge examination of the central areas of inquiry in the region.

The Ecology and Evolution of Heliconius Butterflies Chris D. Jiggins. 2017-01-27 The Heliconius butterflies are one of the classic systems in evolutionary biology and have contributed hugely to our understanding of evolution over the last 150 years. Their dramatic radiation and remarkable mimicry has fascinated biologists since the days of Bates, Wallace, and Darwin. The Ecology and Evolution of Heliconius Butterflies is the first thorough and accessible treatment of the ecology, genetics, and behaviour of these butterflies, exploring how they offer remarkable insights into tropical biodiversity. The book starts by outlining some of the evolutionary questions that Heliconius research has helped to address, then moves on to an overview of the butterflies themselves and their ecology and behaviour before focussing on wing pattern evolution, and finally, speciation. Richly illustrated with 32 colour plates, this book makes the extensive scientific literature on Heliconius butterflies accessible to a wide audience of professional ecologists, evolutionary biologists, entomologists, and amateur collectors.

Power in the International Investment Framework Maria A. Gwynn. 2016-07-26 This book offers a unique analysis of bilateral investment treaties (BITs). By developing a new, power-focused paradigm for understanding the international investment framework, the author illustrates why there was no paradoxical behaviour when developing countries agreed to the BIT regime, and what has spurred their reaction against it now. She also examines how attempts to regulate investment at a multilateral level have failed, and why the rules of the framework are evolving. Inspired by the work of Susan Strange, Gwynn fills a significant lacuna in our understanding of these issues by demonstrating how power determines the actions of all those involved. This holistic reinterpretation of international investment focuses in particular on Latin America, but has wider implications for the negotiation of new treaties, including such controversial provisions as the Transatlantic Trade and Investment Partnership. It will appeal to lawyers, economists, political scientists and scholars of Latin America.
