Enthüllungen Über Den Kommunisten-Prozeß Zu Köln Karl Marx.2018-04-05 Aus dem Buch: Das Papier befand sich also im Munde, zwischen den Zähnen des Cherval, denn nur die eine Hälfte ward gerettet, die andere war schon verzehrt. Stieber und sein Helfershelfer, Polizeikommissär oder wer sonst, konnten die andere Hälfte nur retten, indem sie ihre Hände in den Rachen des gefährlichen Cherval steckten. Die nächste Art, wie Cherval sich gegen einen solchen Angriff verteidigen konnte, war die des Beißens, und wirklich meldeten die Pariser Blätter, Cherval habe die Frau Stieber gebissen, aber in dieser Szene wohnte dem Stieber nicht die Frau bei, sondern der Polizeikommissär. Dagegen erklärt Stieber, bei dem Attentat, das Cherval in seiner eigenen Wohnung verübt, sei Frau Stieber, die ihm zu Hülfe gekommen, verwundet worden. Karl Marx (1818-1883) war ein deutscher Philosoph, Ökonom, Gesellschaftstheoretiker, politischer Journalist, Protagonist der Arbeiterbewegung sowie Kritiker der bürgerlichen Gesellschaft und der Religion. Zusammen mit Friedrich Engels wurde er zum einflussreichsten Theoretiker des Sozialismus und Kommunismus. Bis heute werden seine Theorien kontrovers diskutiert.

"The Turk and Islam in the Western Eye, 1450?750 " JamesG. Harper.2017-07-05 Unprecedented in its range - extending from Venice to the New World and from the Holy Roman Empire to the Ottoman Empire - this collection probes the place that the Ottoman Turks occupied in the Western imaginaire, and the ways in which this occupation expressed itself in the visual arts. Individual essays in this volume examine specific images or groups of images, problematizing the 'truths' they present and analyzing the contexts that shape the presentation of Ottoman or Islamic subject matter in European art. The contributors trace the transmission of early modern images and representations across national boundaries and across centuries to show how, through processes of translation that often involved multiple stages, the figure of the Turk (and by extension that of the Muslim) underwent a multiplicity of interpretations that reflect and reveal Western needs, anxieties and agendas. The essays reveal how anachronisms and inaccuracies mingled with careful detail to produce a Turk, a figure which became a presence to reckon with in painting, sculpture, tapestry and printmaking.

The Retreat of the Elephants Mark Elvin.2004-03-10 The eminent China scholar delivers a landmark study of Chinese culture's relationship to the natural environment across thousands of years of history. Spanning the three millennia for which there are written records, *The Retreat of the Elephants* is the first comprehensive environmental history of China. It is also a treasure trove of literary, political, aesthetic, scientific, and religious sources, which allow the reader direct access to the views and feelings of Chinese people toward their environment and their landscape. China scholar and historian Mark Elvin chronicles the spread of the Chinese style of farming that eliminated elephant habitats; the destruction of most of the forests; the impacts of war on the landscape; and the re-engineering of the countryside through gigantic water-control systems. He documents the histories of three contrasting localities within China to show how ecological dynamics defined the lives of the inhabitants. And he shows that China in the eighteenth century was probably more environmentally degraded than northwestern Europe around this time. Indispensable for its new perspective on long-term Chinese history and its explanation of the roots of China's present-day environmental crisis, this book opens a door into the Chinese past.

[Air Transport and Regional Development Policies](#) Anne Graham,Nicole Adler,Hans-Martin Niemeier,Ofelia Betancor,António Pais Antunes,Volodymyr

Bilotkach, Enrique J. Calderón, Gianmaria Martini. 2020-12-18 Air Transport and Regional Development Policies is one of three interconnected books related to a four-year European Cooperation in Science and Technology (COST) Action established in 2015. The Action, called Air Transport and Regional Development (ATARD), aimed to promote a better understanding of how the air transport-related problems of core regions and remote regions should be addressed in order to enhance both economic competitiveness and social cohesion in Europe. This book focuses on policy implications related to air transport and regional development. It begins with chapters that generally discuss important policy issues related to air transport and regional development in relation to connectivity and accessibility; dependency; airport governance and regulation; and air traffic control frameworks. This is followed by a number of chapters that consider government subsidies and state aid. The final chapters focus on other policy implications (tourism development, airport expansion, passenger taxation and noise control). Currently, no other single source publication covers this topic area in such a comprehensive manner, insofar as it considers so many policies and examples. The book aims at becoming a major reference source on the topic, drawing from experienced researchers in the field, covering the diverse experience and knowledge of the members of the COST Action. The book will appeal to academics, practitioners and government bodies who have a particular interest in acquiring detailed comparative knowledge and understanding of the policy implications of air transport and regional development. Along with the other two books (Air Transport and Regional Development Methodologies and Air Transport and Regional Development Case Studies) it fills a much-needed gap in the literature.

Tupolev Paul Duffy, A. I. Kandalov. 1996 This book focuses on the aircraft designs of the man often referred to as the father of Russian aviation, Andrei Nikolaevich Tupolev. Born in Russia in 1888, Tupolev went on to design aircraft that earned Russia worldwide acclaim for their contributions to aviation in the 1920s, '30s, and '40s.

Russian Airlines and Their Aircraft Dmitriï Komissarov, Yefim Gordon. 2004 Following the ending of Aeroflot's monopoly in 1992 and the subsequent break-up of the Soviet Union, the Russian civil aviation scene has been transformed, with a host of airlines, large and small, competing fiercely to attract passengers. This full-color album covers the major airlines operating today, illustrating the types flown by each carrier and the various colour schemes worn by them. A brief history and fleet details are given for each airline.

Unmanned Systems Roadmap 2007-2032 (Color) Department of Defense. 2015-01-04 As the Department of Defense (DoD) develops and employs an increasingly sophisticated force of unmanned systems over the next 25 years (2007 to 2032), technologists, acquisition officials, and operational planners require a clear, coordinated plan for the evolution and transition of unmanned systems technology. With the publication of this document, individual roadmaps and master plans for UASs, UGVs, and UMSs (defined as Unmanned Undersea Vehicles (UUVs) and Unmanned Surface Vehicles (USVs)) have been incorporated into a comprehensive DoD Unmanned Systems Roadmap. This integrated Unmanned Systems Roadmap is the plan

for future prioritization and funding of these systems development and technology, thus ensuring an effective return on the Department's investment. Its overarching goal, in accordance with the Strategic Planning Guidance (SPG), is to guide military departments and defense agencies toward logically and systematically migrating applicable mission capabilities to this new class of military tools. This Roadmap highlights the most urgent mission needs that are supported both technologically and operationally by various unmanned systems. These needs, listed below, should be considered when prioritizing future research, development, and procurement of unmanned systems technology to ensure an effective return on the Department's investment.

Tupolev Tu-134 Dmitrii Komissarov.2004 81/2 x 11, 260 color & b&w photos, The Tu-134, which has given sterling service for 35 years now, has played a major role in Soviet/Russian civil aviation. It was the first jet type operated the flag carriers of several nations allied with the Soviet Union. The Tu-134 has seen service in 42 countries in Europe, Southeast Asia, the Middle East, Africa and South America. Apart from passenger flights, its multifarious activities include VIP transportation, support of Air Force, Army and Navy headquarters and miscellaneous research and test work. The type has helped train thousands of military pilots and navigators for the Soviet Air Forces' tactical and long-range bomber components. Compiled from first-hand Russian sources, the book gives an account of the Tu-134 and the type's design, test and operational history. Every known version, including military and various test aircraft, is painstakingly described here. Detailed fleet lists are given of all known Tu-134 operators. The book features a full production list of more than 800 aircraft and accident details.

Speaking the Nation Anandita Bajpai.2018-07-04 Untangling the logical, lexical, and semantic patterns of the multiple official speeches of Indian prime ministers, *Speaking the Nation* gauges how the Indian state has been projected by different governments in different times, in the face of challenges from internal and external actors that put pressure on its leaders to safeguard their status as legitimate elites in power. It analyses how Indian nationhood is consistently reshaped and reaffirmed by invoking its secular ethos and practice, as well as the experience of market liberalization. The book calls for serious engagement with political oratory in India. A close reading of speeches since 1991—from Narasimha Rao to Narendra Modi—it captures how, through these crosscutting topics, the prominent 'authors of the nation' and the 'vanguards of the state', speak India into being.

On Prayer Karl Rahner.1968 A positive restatement of the essentials of prayer in the context of modern thought and modern conditions of life.

Aeromobilities Saulo Cwerner,Sven Kesselring,John Urry.2009-01-13 *Aeromobilities* is a collection of essays that tackle in many different ways the growing importance of aviation and air travel in our hypermobile, globalized world. Providing a multidisciplinary focus on issues ranging from global airports to the production of airspace, from airline work to helicopters, and from movement in airports to software systems, *Aeromobilities* seeks to enhance our understanding of space, time and mobility in the age of mass air travel. From Sao Paulo to Sydney, *Aeromobilities* draws on local experiences of airspaces to generate theory and research that are global in scope. It is the first book of its kind, bringing together a wide range of theoretical and methodological approaches to aviation and air travel in the social sciences and humanities, while emphasizing the central role of aeromobilities in contemporary social relations. In a world where virtually every aspect of social life is touched upon, in one way or another, by the complex global network of airline flows, with its large passenger aircraft and iconic international airports, *Aeromobilities* provides innovative

analyses of some of the most fundamental and influential mobility networks of our time.

American Forces in Berlin Robert P. Grathwol,Donita M. Moorhus.1994 An engaging look at reality-based Christian leadership, The Four Faces of a Leader has the potential to utterly transform leaders and those they lead--not with bells and whistles, but with a soft whisper of truth about servant leadership. By emphasizing the leadership priorities Jesus demonstrated in the gospels, Rhoden engages the reader with practical applications for all pastors, whether they serve 3,000 or 200 members. Like a personal mentor sharing valuable life lessons, this book challenges, inspires, informs, and encourages. Based on four leadership faces of shepherd, servant, steward, and seer, this is a solid roadmap of practical insights for leaders of every generation who want to be the change the world is looking for.

Communist Parties Revisited Rüdiger Bergien,Jens Gieseke.2018-01-31 The ruling communist parties of the postwar Soviet Bloc possessed nearly unprecedented power to shape every level of society; perhaps in part because of this, they have been routinely depicted as monolithic, austere, and even opaque institutions. Communist Parties Revisited takes a markedly different approach, investigating everyday life within basic organizations to illuminate the inner workings of Eastern Bloc parties. Ranging across national and transnational contexts, the contributions assembled here reconstruct the rituals of party meetings, functionaries' informal practices, intra-party power struggles, and the social production of ideology to give a detailed account of state socialist policymaking on a micro-historical scale.

Stress Challenges and Immunity in Space Alexander Choukèr.2019-11-27 This book explains how stress - either psychological or physical - can activate and/or paralyse human innate or adaptive immunity. Adequate immunity is crucial for maintaining health, both on Earth and in space. During space flight, human physiology is specifically challenged by complex environmental stressors, which are most pronounced during lunar or interplanetary missions. Adopting an interdisciplinary approach, the book identifies the impact of these stressors - the space exposome - on immunity as a result of (dys-)functions of specific cells, organs and organ networks. These conditions (e.g. gravitation changes, radiation, isolation/confinement) affect immunity, but at the same time provide insights that may help to prevent, diagnose and address immune-related health alterations. Written by experts from academia, space agencies and industry, the book is a valuable resource for professionals, researchers and students in the field of medicine, biology and technology. The chapters "The Impact of Everyday Stressors on the Immune System and Health", "Stress and Radiation Responsiveness" and "Assessment of Radiosensitivity and Biomonitoring of Exposure to Space adiation" are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Nazi Buildings, Cold War Traces and Governmentality in Post-Unification Berlin Clare Copley.2020-05-28 Bringing together approaches from cultural and urban history, as well as German studies and political theory, Clare Copley's probing study reflects on post-unification responses to iconic Nazi architecture to reveal insights into power, legitimacy and memory politics in the Berlin Republic. Analysing public debates, physical interventions into the buildings and the structuring of the memory landscapes around them, the book demonstrates that the politics of memory impact not just upon the built environment of the post-dictatorship city, but upon the way decisions about it are made. In doing so, Nazi Buildings, Cold War Traces and Governmentality in Post-Unification Berlin makes the case for conceiving of a specifically 'post-authoritarian' governmentality and uses the responses to constructions like Goering's Aviation Ministry, Tempelhof Airport and the Olympic complex to explore its features.

Power and Protest Jeremi Suri.2005-04-15 In a brilliantly-conceived book, Jeremi Suri puts the tumultuous 1960s into a truly international perspective in the first study to examine the connections between great power diplomacy and global social protest. Profoundly disturbed by

increasing social and political discontent, Cold War powers united on the international front, in the policy of detente. Though reflecting traditional balance of power considerations, detente thus also developed from a common urge for stability among leaders who by the late 1960s were worried about increasingly threatening domestic social activism. In the early part of the decade, Cold War pressures simultaneously inspired activists and constrained leaders; within a few years activism turned revolutionary on a global scale. Suri examines the decade through leaders and protesters on three continents, including Mao Zedong, Charles de Gaulle, Martin Luther King Jr., Daniel Cohn-Bendit, and Aleksandr Solzhenitsyn. He describes connections between policy and protest from the Berkeley riots to the Prague Spring, from the Paris strikes to massive unrest in Wuhan, China. Designed to protect the existing political order and repress movements for change, detente gradually isolated politics from the public. The growth of distrust and disillusion in nearly every society left a lasting legacy of global unrest, fragmentation, and unprecedented public skepticism toward authority.

Cardiovascular System, Red Blood Cells, and Oxygen Transport in Microgravity Hanns-Christian Gunga, Victoria Weller von Ahlefeld, Hans-Joachim Appell Coriolano, Andreas Werner, Uwe Hoffmann. 2016-07-14 This book comprehensively describes the physiological changes and consequences that occur in humans during spaceflight. It specifically presents the adaptations of the cardiovascular and the respiratory system. Specific changes occurring after 10, 20 or more days in space are depicted. Furthermore, the book explains various effective countermeasures that are required upon return of the astronauts to Earth. The book is a must-have for all biomedical and clinical researchers in the field of cardiovascular biology and respiration, and a fascinating reading for all interested laymen, who wish to understand a bit more about spaceflight research and technology.

Urban Violence in the Middle East Ulrike Freitag, Nelida Fuccaro, Claudia Ghrawi, Nora Lafi. 2015-03-01 Covering a period from the late eighteenth century to today, this volume explores the phenomenon of urban violence in order to unveil general developments and historical specificities in a variety of Middle Eastern contexts. By situating incidents in particular processes and conflicts, the case studies seek to counter notions of a violent Middle East in order to foster a new understanding of violence beyond that of a meaningless and destructive social and political act. Contributions explore processes sparked by the transition from empires — Ottoman and Qajar, but also European — to the formation of nation states, and the resulting changes in cityscapes throughout the region.

The Blackbird Beth Fuller. When Ira is sent home early from his work on All Hallows' Eve, he finds a mysterious woman lingering on a bridge. She is desperate and wild, and as she falls into the river below, Ira follows, determined to save her against all odds. But when she awakens, he finds nearly drowning is the least of her worries. A far darker entity is haunting her. Can he save her before the time runs out?

Hidden Agendas Jane Kelsey. 2013-05-01 'Forget the label "free trade agreement". The TPPA, under negotiation between New Zealand, the USA and ten other countries, is a direct assault on our right to decide our own future.' In this hard-hitting BWB Text, Professor Jane Kelsey picks apart the current negotiations surrounding the proposed Trans-Pacific Partnership Agreement (TPPA) and comes to some disturbing conclusions. Such a treaty, she says in this new work, has little credible economic rationale but could have potentially dangerous effects on our ability to decide for ourselves how we address the economic, environmental, social and Treaty challenges of the twenty-first century. At a time of constitutional review, the secrecy surrounding the TPPA negotiations raises hard questions about the future shape of New Zealand.

A History Shared and Divided Frank Bösch. 2018-09-14 By and large, the histories of East and West Germany have been studied in relative isolation. And yet, for all their differences, the historical trajectories of both nations were interrelated in complex ways, shaped by economic crises, social and cultural changes, protest movements, and other phenomena so diffuse that they could hardly be contained by the Iron Curtain. Accordingly, *A History Shared and Divided* offers a collective portrait of the two Germanies that is both broad and deep. It brings together comprehensive thematic surveys

by specialists in social history, media, education, the environment, and similar topics to assemble a monumental account of both nations from the crises of the 1970s to—and beyond—the reunification era.

Airport Systems: Planning, Design and Management 2/E Richard de Neufville, Amedeo Odoni, Peter Belobaba, Tom Reynolds. 2013-04-23 THE MOST PRACTICAL, COMPREHENSIVE GUIDE TO THE PLANNING, DESIGN, AND MANAGEMENT OF AIRPORTS--UPDATED BY LEADING PROFESSIONALS With the accelerated rate of change occurring throughout the aviation industry, this edition is a timely and very effective resource for ensuring both airport professionals and those interested in airports acquire a comprehensive understanding of the changes taking place, and how they impact airports and the communities they serve. A must read. -- James M. Crites, Executive Vice President of Operations, Dallas/Fort Worth International Airport Airport Systems has been a must read for my management team and my graduate students because of its outstanding comprehensiveness and clarity. Now further enhanced by an expanded treatment of both environmental and air carrier issues, it promises to retain its place as the foremost text in the airport planning, engineering and management field. -- Dr. Lloyd McCoomb, retired CEO Toronto-Pearson Airport, Chair of Canadian Air Transport Security Authority The chapter on Dynamic Strategic Planning should be required reading for every airport CEO and CFO. As de Neufville and Odoni emphasise, the aviation world is constantly changing and airport master planning must evolve to be more strategic and adaptable to ever changing conditions. -- Dr. Michael Tretheway, Chief Economist, InterVISTAS Consulting Group Over the past decade, the airport industry has evolved considerably. Airport technology has changed. New research has taken place. The major airlines have consolidated, changing demand for airport services. In order to reflect these and other major shifts in the airport industry, some of the world's leading professionals have updated the premier text on airport design - making it, now more than ever, the field's most comprehensive resource of its kind. NEW TO THIS EDITION: Chapter-ending conclusions, with reference material, and exercises Coverage of the latest aircraft technology and air traffic control Advances in the design, planning, and management of airports Additional chapter on Aircraft Impact on Airports Updated environmental regulations and international rules Two contributing authors from Massachusetts Institute of Technology

Military Nanotechnology Jürgen Altmann. 2007-05-07 With revolutionary changes in nanotechnology (NT) now on the horizon, many countries have started major research and development (R&D) programmes, which are mainly civilian. Often overlooked are military R&D programmes - in particular those of the US government. This is the first systematic and comprehensive presentation of the potential military applications of NT. In ten to twenty years, these applications may include extremely small computers, robots, missiles, satellites, launchers and sensors. They may also provide lighter and stronger materials for vehicles and weapons, implants in soldiers' bodies, metal-free firearms, autonomous fighting systems, and smaller chemical and biological weapons. These potential uses raise strong concerns. This assessment is made from a viewpoint of international security, considering the new criteria of dangers for arms control and the international law of warfare, dangers for stability through potential new arms races and proliferation, and dangers for humans and society. Some military applications, such as computers, will be so close to civilian uses that limits are impractical. Others, such as sensors for biological-warfare agents, may contribute to stronger protection against terrorist attacks and better verification of compliance with arms-control treaties. For preventive limitation of these new technologies, specific approaches are proposed that balance positive civilian uses and take into account verification of compliance, with a view to international peace and security, not national military strength. This book will be of great interest to scholars of military technology, non-lethal weapons, disarmament and security studies in general.

Renamo Alex Vines. 1991 ... this study will testify to the nature of Renamo's chaotic search for power as Mozambique moves from Afro-Marxist policies toward a more democratic multiparty state. —Choice ... an invaluable contribution to understanding why things are so bad and providing some glimmering of how a solution might be found... provides a uniquely useful light on Renamo's murky origins and the means by which it manages

to sustain itself. —Africa Analysis ... Alex Vines has compiled the most comprehensive and balanced survey to date of the origins and evolution of the Mozambican counter-revolution. —Third World Quarterly Vines' wide-ranging survey is still the first place to turn for well-documented details on both internal and external aspects of Renamo's war. —International Journal of African Historical Studies ... very informative... it is precisely 'everything you wanted to know about the MNR but were afraid to ask.' —Terence Ranger Vines's encyclopedic book provides essential information about this successful rebel movement which continues to be dangerous for the Mozambican government, even though South Africa has disengaged from its day-to-day operations.

Airport capacity constraints and strategies for mitigation: A global perspective Marc Gelhausen, Peter Berster, Dieter Wilken. 2019-09-15 Capacities, Capacity Constraints and Capacity Reserves of Airports, Today and in the Future analyzes airport capacity constraints with empirical methods that forecast future capacities and their capacity shortfalls. When predicting the future of air traffic development, it is imperative for researchers and planners to possess the most accurate data for airport capacity constraints. The book discusses in detail the importance of airport capacity constraints on air traffic development, especially for international hubs, along with mitigation strategies for already packed airports. The book analyzes cross-sectional time-series data to provide greater insight into the problems of airport crowding and over-capacity. The authors go beyond mere strategies to derive capacity, adding estimates for comparable capacities and capacity constraints of airports worldwide. As expanding current airports becomes increasingly difficult, and time consuming—especially for hub—the study of current and future airport capacity constraints becomes ever more needed. Large international airports are especially essential to the global air transport network. The book provides insight into correctly assessing and quantifying the problem of limited airport capacity, while offering strategies for overcoming these issues for a healthy global air traffic network. Focuses on airport capacity constraints in the global air traffic network and their implications for the future of air traffic development Features empirical and model-based approaches that forecast airport capacities and capacity shortcomings Provides over capacity mitigation strategies based on sound and reliable data and methodology Addresses capacity constraints at hub airports, providing insight into correctly assessing and quantifying limited capacity for these important players in the global air transportation network Applies econometric models for the implication of restraining factors on the future volume and structure of air traffic

Internal Racism M. Fakhry Davids. 2020-04-21 Racism's external forms, from racial assault to petty discrimination, are readily recognized. However, its internal dimensions are easily overlooked: how can we understand what happens in the mind of those engaged in or experiencing racism? This book explores the inner relationship between the self and the socially stereotyped - 'racial' - other, providing a clinically derived model of how racist dynamics play out in the mind. Presenting an original theory of the psychology of racism, it: - Reviews and analyses the existing literature on racism and psychoanalysis, including an extensive study of Frantz Fanon's psychological model - Presents new, in-depth clinical observations of racist interchanges in the consulting room and group settings, and new perspectives on such interchanges in the outside world - Theorizes the way in which the race/class divide is internalized and operates, and considers the relationship between individual and institutional racism - Illustrates how racism can be addressed in group and individual settings Arguing that we cannot work with problems of racism without understanding the inner processes that underpin it, this book is an indispensable tool for trainee and experienced psychoanalysts, psychotherapists and counsellors. Its formulations are directly relevant to professionals and academics working across the boundaries of race in health, medical and social service settings.

Historic Airports Bob Hawkins, Gabriele Lechner, Paul Smith. 2005 The realisation of mankind's age-old dream of flight is probably one of the collective adventures that best characterises the century we have just left, its greatest novelty. In the space of only three or four generations aviation has conquered the entire planet and international airports have developed into sleepless cities. At the beginning of 1999, the European Commission

sponsored an international project on aviation's architectural heritage, set up at the instigation of the French Ministry of Culture together with English Heritage and Landesdenkmalamt Berlin, the official heritage body of the German capital. The project's primary aim was to contribute to the better understanding and conservation of aviation architecture, focusing on three pilot-sites: Berlin-Tempelhof, Paris-Le Bourget and Liverpool-Speke - all rare survivors from the late 1930s. An international network of expertise on aviation architecture grew out of three international workshops, the proceedings of which are presented here. Through contributions from historians, architects, development agencies and airline companies, among others, the book examines how best to identify and preserve the sites worth keeping, the place of the airport in the 21st-century city, and the future of our historic airports.

Transit Anna Seghers. 2013-05-07 Anna Seghers's *Transit* is an existential, political, literary thriller that explores the agonies of boredom, the vitality of storytelling, and the plight of the exile with extraordinary compassion and insight. Having escaped from a Nazi concentration camp in Germany in 1937, and later a camp in Rouen, the nameless twenty-seven-year-old German narrator of Seghers's multilayered masterpiece ends up in the dusty seaport of Marseille. Along the way he is asked to deliver a letter to a man named Weidel in Paris and discovers Weidel has committed suicide, leaving behind a suitcase containing letters and the manuscript of a novel. As he makes his way to Marseille to find Weidel's widow, the narrator assumes the identity of a refugee named Seidler, though the authorities think he is really Weidel. There in the giant waiting room of Marseille, the narrator converses with the refugees, listening to their stories over pizza and wine, while also gradually piecing together the story of Weidel, whose manuscript has shattered the narrator's "deathly boredom," bringing him to a deeper awareness of the transitory world the refugees inhabit as they wait and wait for that most precious of possessions: transit papers.
